Foreword

To follow up the treatise on NE DUKEKLĚ (Divine Popularism) that we have proposed as an alternative to substitute for the current decaying paradigm, it has become clear and compelling to develop in details some key areas of the New Civilizational Paradigm.

This paper is about the economic fortress to be erected as part of this new route leading to the intended destination.

This, hopefully, will shed more light on the overall scheme as set out in the treatise.

Now, we are bound to irremediably form a wall of unity and responsibility to work toward a rapid manifestation of balance and harmony on this material plane of Life experience.

In this blue paper, the following terms are defined as follows:

Ka-AkhnAton -- The Earth where the Creator Aton is praised and glorified

Ka-AkhnAtonite -- The inhabitants of Ka-AkhnAton

Terra-Urantia -- The Mother Earth, Urantia of her Cosmic baptismal name

1

The Monetary-Banking System

To demonstrate without a shadow of a possible doubt the premeditation underlying this pitfall of the monetary-banking system that drives the present so-called modern world, we will pick up excerpts of a valuable documentation that explains quite clearly the critical situation in which our civilization has been precipitated by the ill-minded minority that call themselves The Learned Elders Of Sion or The Moriah. Provided that they are at the root of all our very political and economic imbroglio and that their modus operandi is well exposed in their Protocols, reading of which is recommended in order for us to draw our own conclusions and have confirmation thereof.

Well Kept Secret

The process by which the Anti-Christ Bankers conquer nations economically is simply unbelievable because it is unbelievably simple. Here's how it works:

First, they seduce the political authority to grant them the monopoly power to issue the nation's money as debt at interest (usury).

Second, they create the money OTA (out of thin air) as a book or computer entry when they loan this bank-credit to the government and corporations in exchange for interest-bearing bonds, and to individuals in exchange for title to their property.

Third, where there is no unencumbered property remaining to collateralize more loans and there is insufficient money to repay the loans, the victims are foreclosed.

The reason that the above sequence is inevitable is the best kept economic secret in the world. Here it is. When the Anti-Christ Bankers and their associates (your friendly local banker) create the money as a bookkeeping entry to make a loan, say \$ 1,000 for one year, the interest (usury) on that loan, say 10%, or \$ 100 is NOT created and therefore **cannot be paid!**

When bank credit is put into circulation, it increases money supply and generates increased economic activity throughout the society. When the principal is repaid, the bank credit is eliminated and the economic activity is reduced accordingly. If that stops there, we could have an honest and potentially stable monetary system.

But then comes the rub. Since the interest amount has not been created, it stays in the economy as a bank claim on someone's property. Why? Because to pay the \$ 100 interest (which was NOT created) on the first loan, someone had to borrow it into circulation. Thus, an endless cycle of debt is instituted with the inevitable eventual result being that title to all real wealth in the nation is owned by the Anti-Christ Bankers.

This is the reason why your farms, homes and factories are being foreclosed by the thousands every week, especially in the Western world! This is also the real reason for inflation, which has reduced the "dollar" to about 10% of its value 50 years ago.

More clearly, the loan amounts are created, and of course not backed by any real value, but it is well taken care not to create the interest amounts, so any payment with interest is impossible leaving the borrower and his real property won by the sweat of his/her brow at the mercy of foreclosing by the banker. Of course, a minority will always manage to repay the principal of the debt along with the interest with the amount of money put into circulation as loans. But the wealth produced by the majority returns to the pockets of the Satanic conspirator as there is no more money in circulation.

Their Money Is Your Debt

ALL of your money, except for your coins and the few remaining US Notes, has been borrowed (OTA) (Out of thin air) into circulation as debt. About 95% of this debt exists as bank deposits (checkbook money) and about 5% exist as those Federal Reserve Notes you call bills. There is not enough money in circulation (called M1) to pay the 3 trillion plus dollars National Debt (U.S.A and this is valid for all countries), let alone the 7 trillion plus dollars of private debt! Talk about balancing the Federal Budget (or any budget, simply put), is just that -- stupid talk. If the Federal Government, under this Babylonian criminal monetary system (in the first place structured by the Khazars), did not continually borrow more Federal Reserve bank credit into circulation, you would have no medium of exchange. This is also why there is a portion of your Constitution that REQUIRES ANNUAL BALANCING OF THE BUDGET THROUGH APPORTIONMENT BY THE STATES, cannot be applied -- because there is no actual MONEY!

Furthermore, this debt exceeds the value of all the real estate in America, which is pledged for its payment. Therefore, you are now legally bankrupt!

In the words of Robert Hemphill, for many years Credit Manager of the Federal Reserve Bank:

"If all bank loans were paid, no one would have a bank deposit, and there would not be a dollar of currency in circulation. This is a staggering thought. We are completely dependent on the commercial banks. Someone has to borrow every dollar we have in circulation, cash or credit. If the banks create ample synthetic money, we are prosperous; if not, we starve. We are absolutely without a permanent money system. When one gets a complete grasp upon the picture, the tragic absurdity of our hopeless position is almost incredible--but there it is. It (the money problem) is the most important subject intelligent persons can investigate and reflect upon. It is so important that our present civilization may collapse unless it is widely understood and the defects remedied very soon".

The Borrower Is The Servant

Let us remember essentially from the preceding statement this: if we are in debt, we are not free, we are bonded slaves. Even if we do not have any personal debt, as an American citizen (which applies to any nation of this world operating under the supervision of the US Federal Reserve), our share of the National Debt is over \$ 20,000 and whatever properties we think we own, are pledged to pay that debt. And the government can and will come and confiscate everything we thought we had to pay it. As our own proclaimed Bible tells us in Proverbs 22: 7, "The borrower is a servant to the lender".

The manner in which bondslaves were to be controlled was put forth in The Bankers Manifest of 1934 and this is what it says:

Capital must protect itself in every way, through combination and through legislation. Debts must be collected and loans and mortgages foreclosed as soon as possible. When, through a process of law, the common people have lost their homes, they will be more tractable and more easily governed by the strong arm of the law, applied by the central power of wealth, under control of leading financiers. People without homes will not quarrel with their leaders. This is well known among our principal men now engaged in forming an imperialism of capital to govern the world. By dividing the people we can get them to expend their energies in fighting over questions of no importance to us except as teachers of the common herd.

Ill at ease and hot around the neckband? Rather good! Have we really get the above message? All other issues take a back seat and are secondary to the question of money! We have been divided into a thousand different camps ranging from anti-Communist to anti-racists and neutralized by waiting for the rapture, or boozing with the boob-tube. What is our favorite diversion? That is, if we have any time left after working more than six months every year for the Anti-God Banksters (AB's) and THEIR

"government". It is a very safe bet that we don't study history, or money, which, to re-quote that nice Robert Hemphill:

...is the most important subject intelligent persons can investigate and reflect upon. It is so important that our present civilization may well collapse unless it is widely understood and the defects remedied very soon

Conclusion, there should not and must not be any debt attached to a bank loan, and better yet no loans at all, since this money issued out of thin air has no value at all, while the work that the citizen performs for a product or service certainly has. And so what we pay (not pay back) is a financial scam-racket and that is what constitutes the real wealth that is found in the pockets of the banker-racketeers. In other words, it is we who enrich them by accepting to be their slave-servants.

Therefore, the entire banking system structured around this concept must be dismantled on a global scale to restore dignity to Humanity,

Omitted History

In order to understand how the Anti-Christ Bankers gained their absolute power over the nations, it is necessary to understand some history which has been omitted from the history books dealing with this matter -- for our history books are so devoid of history that we have a myriad of subjects which are left out and buried under the shroud of deceit and lies. Nonetheless, let's consider the current subject at hand. This knowledge is also necessary so that we do not repeat it, if we ever get the opportunity of control -- ONCE AGAIN!

In the beginning there was no money and there was no civilization. Each man provided for his own necessities of life -- food, shelter and clothing, through his own efforts in one way or another. It was probably the only period in history, apart from that ill-perceived "Eden", that man was really free and independent -- and that, too, is a dream, isn't it? However, it was a very difficult, dangerous and insecure lifestyle at best, what with tantalizing apples and deceitful ladies of the night and serpents in all the trees, and nothing but fig leaves to cover your assets, and so forth. Fig leaves are very uncomfortable in the middle of a blizzard or especially a sandstorm.

Finally, there developed a system of exchange of goods and services that we can call barter. In that economic system, every man benefited because he would only trade something he had for something that was of greater value in some manner to himself. For example, if Jim had ten potatoes and Bill ten fish, they could trade five potatoes for five fish and each would have a complete meal for his family. So there was "light".

It was soon realized that, by specialization, a man could produce a given commodity much more efficiently and exchange his surplus with other specialists to obtain all his needs. Thus, all those who efficiently produced something which many people needed or wanted could make a very comfortable living with "markers" for various items in exchange for their own production.

The value that each man placed on his own product was mainly a function of the time he spent producing it, what he spent for raw materials and tools -- AND THE MARKET DEMAND FOR HIS PRODUCT.

Creation of Coinage

It was soon realized, however, that bartering was a very inconvenient system and, fun though it might be, consumed much time in bargaining over the value of commodities. After all, every man values everything differently from every other man and at different times, places and circumstances.

Eventually, the use of certain durable commodities, such as gold and silver, became popular as a medium of exchange and greatly facilitated trade. Civilization began to develop as more men became specialists and an increasing variety of goods was produced for both production (tools) and consumption. The use of gold and silver bullion as media of exchange, although far superior to trading cows and corn, was still somewhat difficult, because their weight and purity had to be determined. Weighing them was relatively easy with balance scales but determining purity and quality was quite difficult. These problems were overcome with the introduction of "coins", which were certified by the issuing authority to be of the weight and purity represented by the denomination and purity stamped upon them.

Birth of the Baby-Monster Banking

As wealth increased, one of the trades developed was the manufacture of gold jewelry or goldsmith. Because goldsmiths were dealing with large quantities of gold, they needed safe vaults, or safes, to store their valuable product safe from theft.

Other people who bought large amounts of metallic money, especially traders and artisans, also needed security for their money. It quickly became a common practice for them to "deposit" their money in silversmiths for a small fee. In return, the goldsmith would give the depositor a receipt for the deposit amount. An applicant could then hand over his deposit receipt to a supplier for the payment of goods, rather than transferring the metal itself. This method of payment was so convenient and simple that it quickly became a common practice. On paper, one amount was simply

transferred to the accounts of another. Thus was born the company of the bank. So far so good.

Origin of Usury (Interest)

The shrewd Babylonian Elite goldsmiths soon realized that, of all the gold deposited with them, only a small percentage was reclaimed each month with the warehouse receipts they had issued. As wealthy men, they were often asked for loans. As shrewd men, they were soon lending out as much as 90% of the gold placed on deposit with them, typically requiring that four talents gold be returned to them in one year for every three they loaned, an interest rate of 33.33%!

As there was a limited amount of gold in circulation, they soon "monopolized" the gold market and became the richest men in Babylon. Their descendants still are and are referred to in Revelation 18:23: "For thy merchants were the great men of the earth, for by thy sorceries (Pharmacia = drugs) were all nations deceived". People who are drugged (poisoned) with alcohol, nicotine, caffeine, medicine, sugar, chlorine, fluoride, television, government, "education" and "religion", have short-circuited brains and simply cannot think logically.

If we were having trouble understanding this, we can now understand WHY! But there are so many other things that have poisoned us as a society.

Fractional Reserve Banking System

Ah, rears the head of the deadly poison serpent. With virtually all of the gold in their possession, the goldsmiths could loan out their "warehouse receipts" for amounts totalling more than ten times the amount of gold actually in their vaults and charge interest (usury) on something which had cost them virtually nothing (clay tablets were very cheap at the time for labor was so thrifty).

When this debt money was created and circulated in the society, it caused a temporary increase in trade and the production of real wealth until the loan was repaid. However, when the money was created, the amount of the interest was NOT CREATED and the ultimate result was a net reduction of money in circulation, causing depression and foreclosure, unless, of course, more money was loaned into circulation.

Thus was born "fractional reserve banking" and the system of usury which today rules the world. This is the lifeblood of the system identified in Revelation 18 as "MYSTERY, BABYLON THE GREAT".

The Priests of BAAL

Occasionally, the people holding these "gold certificates" would get wise to the fact that the goldsmith did not actually have enough gold on deposit with which to redeem his certificates. This would result in a "run on the bank" and his sudden demise, unless he had previously escaped with his hoard of gold.

Being shrewd, the goldsmiths recognized this as an unhealthy situation. Therefore, after very little thought, they decided to bring the king in as a "partner". After all, the king was always in need of gold to support his concubines and palace guard. Thus the king was only too happy to provide government sanction and protection for this racket in exchange for greatly discounted interest rates, even lower than the prime rate. But the shrewd goldsmiths thought that government protection might not be sufficient. After all, the police couldn't protect them 24 hours a day.

Since the king was also god in the combined state religion of Baalism,¹ the AB's decided that it would be safest for them to practice their black art under cover of religion. After all, there might be many who would revolt against slavery and risk imprisonment or death; what's the difference? But few religionists, even though enslaved, will challenge "authority" and risk eternal torment by being "excommunicated". Thus, many AB's became BAAL Priests and practiced their banking scam in the temples with complete safety--even picking up as much as 10% tithing, free, for being there.

Thus was joined the unholy Babylonian trinity of; Government, Religion, and Banking (GRAB) which rules your world this day as a Great Mystery to the deceived "goyim", especially Christians, who are their prime target. Great pains and cares were also taken to REWRITE portions of the rule books for these goyim to fit with the Baal religion and keep the good little contributors happy and feeling "saved" at the same time.

The Monetary Problem

To solve a problem, the very first mandatory step is to analyze it. Every problem is the result of a cause. And the reason for this analysis is to determine this cause. When the cause is clearly understood, the solution naturally becomes obvious.

"CURRENCY" is defined as a **medium of exchange and a measure of value**, regardless of the form it may take. There are two major forms of money: **commodity**

¹ Baalism was a kind of cult of materialism, practiced by those who exercise a right of property, authority or control; it designated the owner of a slave, of a beast; a chief, and even the citizens of a city. Finally, it was commonly attributed to the many Canaanite divinities, under the generic name of Baal in singular or Baalim in plural.

money (gold, silver, etc.) and the created or fiat money. A commodity money system is in fact a barter system of trading one commodity with a certain market value for another commodity or service of a certain market value.

Incidentally, no commodity has "intrinsic"² value, which only Humans have. All commodity prices in a free market result from the law of "supply and demand". The price of gold, which is probably the most worthless of all metals for human use, is artificially established by the "gnomes" of London and Zurich, by which they control the economic health of every nation.

Created money is the only thing man can create. It is created out of nothing but paper and ink or computer bytes, but represents, or is a claim on, wealth. Created money is *not wealth*. Wealth is that which men produce for human use through the intelligent application of energy to natural resources. Fiat is a French word which means "So be it", and in operation applies to an order or edict by authority. ALL paper money is "fiat" money. However, as part of the AB's' semantic subversion to control our thinking, "fiat" is used as a term of approbation, applied to government issued, debt-free money to obscure and protect their criminal racket of Fed and bank-issued fiat debt money..

² Belonging naturally; essential to a person, a thing.

2

The Monetary Drift

To begin, let's go back to history through a text from the important documentation made hardly accessible by the Kabalist Elite Planner of the One World Government.

Control Of Money

Schiff³ became the primary cog in the plan to control the American money system. He came to New York with orders to buy into a banking house which would be the "springboard" into acquiring ultimate control of your economy. He had several primary assignments:

1. The most important was to acquire control of the American economy,
2. He was to find men in important government and business positions in your country who would be willing to serve as "front men" for the conspiracy,
3. He was to create minority group strife, particularly between Blacks and Whites, and,
4. He was to create a movement which would eventually destroy Christianity in America.

Let us trace the trail of Schiff's actions as he set out to accomplish challenge #1, control of the American Money System.

His first step was to buy into a banking house, using Rothchild money. It had to be a house over which he would have complete control. After carefully scouting around, Schiff bought a partnership in a New York firm called Kuehn and Loeb. Like Schiff, both Kuehn and Loeb were German Jews who had immigrated to the U.S. in the 1840's from the ghettos of Germany. Both of them started their business careers as itinerant peddlers. In the mid 1840's, they pooled their interests and purchased a merchandising store in Lafayette, Indiana under the name of Kuehn-Loeb. They serviced covered wagons heading west. In a few years, they had a string of stores in Cincinnati and St. Louis. Then they added "pawn brokering" to their pursuits. By the

³ Jacob H. Schiff, born Jacob Hirsch Schiff on January 10, 1847 in Frankfurt-on-Main and died on September 25, 1920 in New York, is a banker and so-called American philanthropist. Coming from a rabbinical Jewish family in Hesse, whose lineage dates back to the 14th century, his father was a broker in the Rothschild bank in Frankfurt.

time Schiff arrived on the scene, Kuehn and Loeb were well-known bankers in the U.S.

Shortly after Jacob bought into the firm, he married Loeb's daughter, Theresa. Then he bought out Kuehn's interest and the firm, headquartered in New York City became known as Kuehn, Loeb *and Company*, International Bankers. By this time, Schiff was in complete control of the firm.

From the very beginning this agent of an adversarial conspiracy posed as a great philanthropist and a man of great religious holiness. But under his pious exterior, he carried out the satanic policies of his masters with nothing short of brilliance.

To achieve control of the U.S. Money System, Schiff had to get cooperation from the Big Banking elements in your country. In those days, Wall Street was the heart of the American Money Mart. J.P. Morgan was its unchallenged dictator. Next in line were Biddle and Drexel, two great banks from Philadelphia. All the money interests in America danced to the beat these three banks played, with Morgan always in the drummer's lead.

At first, these banks treated the little bewhiskered Jew from Germany with contempt. But Jacob knew how to overcome that. He threw them a few Rothschild bones consisting of the distribution of European stocks and bonds which master Rothschild controlled.

But he had an even more potent weapon available. Following the Civil War, American industries had a phenomenal growth. The world had never seen anything like it. You had great railroad systems to build; oil was discovered; your mines were producing untold wealth; steel and textile industries were bursting out of the seams. All this called for vast financing and of course, most of this financing came from abroad, where it was controlled by the Rothschild interests. Schiff, playing a crafty game, became the "patron saint" of such men as John D. Rockefeller, Edward Harriman and Andrew Carnegie. He financed Standard Oil for "Rocky"; the railroad empire for Harriman and the steel industry for Carnegie. Now wouldn't you all like a nice "sugar daddy" like that one?

Next, he opened the money doors of the Rothschild's to Morgan, Biddle and Drexel, as he arranged for them to set up branches of their banks in major European cities. Cleverly arranged, these banks were always in a partnership with the Rothschild interests and subordinate to them. Each partner was expected to "pay his pound of flesh" to the Rothschilds. It was clear to the "Big Three" from the beginning that Schiff was the boss and they simply swallowed their pride and accepted it. After all, "business comes first!".

By the turn of the century, Schiff had tight control over the banking fraternity of America. This included the Lehman Brothers; Goldwin-Sachs and other International banks, plus the "Big three of Morgan, Biddle and Drexel".

With full control of the American Banking System in his pocket, Schiff was now ready for the giant step which would gain full control of America's money system. Under your Constitutional system, all control of your money was to remain under the control of Congress (does anyone remember?). So Schiff's task was to seduce Congress into betraying the Constitutional edict by surrendering that control to the hierarchy of the Illuminati. In order to legalize this surrender, it would be necessary for Congress to enact special legislation. To accomplish this, Schiff had to infiltrate Rothschild stooges into both houses of Congress and even more important, *he would have to have a Rothschild stooge in the PRESIDENCY*, a man without moral scruples or integrity, who would obey every order that came to him from the Rothschild's and sign this legislation into law. To accomplish this, he had to gain control over one of the major political parties with intent to control all political parties as the plan would move along. I believe you can see that that has been magnificently accomplished.

The Democratic Party seemed to be the more vulnerable at the time, since it was the hungrier of the two. With the exception of Grover Cleveland, they had been unable to place their man in the White House since before the Civil War. There were two major reasons for this. First, the Democrat party was a poor party and secondly, there were considerably more Republican voters than there were Democrats. This obviously had to be changed.

Rothschild's Money

In 1908, Schiff decided that the time was ripe to take charge of America's economy. His chief agent for this seizure was a man named Colonel Edward Mandel House who was a close friend of Woodrow Wilson and who would later become his Presidential advisor. House had spent his entire adult life as an agent and courier of the Schiff enterprises and had worked closely with Bernard Baruch and Herbert Lehman, two more of the most influential of the conspirators. In the fall of 1908, these conspirators met at the Jekyll Island Hunt Club, located on Jekyll Island, Georgia, and owned by J. P. Morgan. This was to be a "top secret" meeting in which they would lay the final plans for the money takeover.

Among those present were J. P. Morgan, John D. Rockefeller, Col. House, Senator Nelson Aldrich, Jacob Schiff, the heads of the New York City International Banks, Eugene Meyers, Herbert Lehman and Paul Warburg--in short, all the important International Bankers in the United States all of whom were also in the Illuminati

hierarchy. So secret was this meeting that the regular employees of the Hunt Club were dismissed during the meeting, and cooks, waiters, butlers, security personnel, in fact all help, were people who were trusted by the conspirators.

After a week of business and revelry, they emerged with a plan which they called THE FEDERAL RESERVE SYSTEM. Senator Aldrich had the honor of being picked as the "stooge" who would "railroad" the Act through Congress. They held up on putting this plan into immediate action for one reason. First, they had to plant one of their men in the White House. He had to be a man who would be completely subservient to their desires. This was necessary so that he could sign the Federal Reserve Act into law. They knew that even if the Congress passed it, the President would have to sign it and that if the President were to veto it, there was too much chance of their plans for money control being revealed.

They found their man in a 67 year-old Democrat from the State of Virginia. Woodrow Wilson became President in 1912 and immediately after his inauguration; Senator Aldrich began the process which would make the FEDERAL RESERVE ACT into law. Wilson waited impatiently in the wings to do the bidding of his masters and sign the bill. On December 23, 1913, when most of the Congress were home for the holidays (sound familiar?), the few remaining, mostly those who had been "hand picked" for the purpose, passed this treasonous bill which has become the "greatest money scam in the world's history".

To give you an idea of how heinous this act really was you must understand that your Founding Fathers realized the power of money. They knew that whoever held this power would control the country so they were extremely careful when writing the Constitution to set forth in writing that only the elected representatives of the people would have the power to coin the nation's money.

The Constitutional language was brief and concise. It was plain enough so that the average citizen could understand it without the interpretation of some lawyer. In Article II, Sec. 8, par. 5, you can read--and this defines the power of Congress: "to coin money, regulate the value thereof, and of foreign coin, and standards of weights and measures".

Today, almost 80 years after this act of treason, most Americans believe that THE FEDERAL RESERVE SYSTEM is part of the American Government. They have no idea that it is governed by Federal Banks, whose heads are aliens, who are members of the International Illuminati conspiracy.

Who are these bankers? According to sources who are quite reliable, in Switzerland, the following banks hold the controlling interest in THE FEDERAL RESERVE

SYSTEM. They are all Jewish owned and/or controlled. In their order of importance they are:

1. Rothschild Bank of London and Berlin.
2. Lazard Brothers Bank of Paris.
3. Israel Moses Seif Bank of Italy.
4. Warburg Bank of Amsterdam and Hamburg.
5. Lehman Brothers of New York City.
6. Kuehn-Loeb Bank of New York City.
7. Chase-Manhattan Bank of New York City (David Rockefeller)
8. Goldman, Sachs Bank of New York City.

PLEASE TAKE NOTE THAT THE FIRST FOUR BANKS ARE ALL FOREIGN BANKS IN LOCATION AS WELL AS ORIGIN AND OWNERSHIP.

Approximately 300 people who are closely associated, many by marriage, own and control this system by holding stock or shares in the system. They control and interlocking, international banking cartel of wealth beyond most of which has been stolen from the working man of America through their Federal Reserve System.

Here the observation is again so clearly laid out that the whole banking system, set in motion in the West before moving on to take over the monetary system of the United States, is a conspiracy intended and thought by a minority through the monopoly of some banking institutions based on the European soil whose tentacles eventually spread to encircle the entire Planet.

This system of the Federal Reserve, under the control of the Federal Reserve Bank of New York, has been erected into the Central Bank of Central Banks. And the policy dictated by the Central is what pulls the strings and behind which all banks line up.

Therefore, what is thought by others in order to dominate the world must be rethought by us to serve our desire for Freedom, Brotherhood and Dignity. Not doing it out of ignorance can be understood, but moving away from that for lack of courage when we have full knowledge of what IS, is a crime against God's Creation, ourselves.

No reform or revolution will take root if politics remain molded on the prevailing pattern and which is leading the world to ruin and destruction.

How Does This Work?

First, the U.S. A. needs, say, a billion dollars to pay bills;

Secondly, it notifies the U.S. Bureau of engraving⁴ to print one billion dollars in U.S. Bonds;

Thirdly, the U.S. Government delivers the bonds to the Federal Reserve Bank as Promissory Notes.⁵

The U.S. Government promises to pay for these, its own Bonds, when they mature;

Fourthly, the Federal Reserve Bank deposits these bonds for which they paid nothing, with the Comptroller of Currency; and then, the Federal Reserve then receives one billion dollars in Federal Reserve "money". THEN, NOTE HOW YOU GET "HAD":

The Federal Reserve Bank retains ownership of the one billion dollars in bonds, which it received free of charge.

The Federal Reserve notes are now distributed to member banks, so they have money available to pay the bills of government, cash government checks, cash checks citizens have received, make loans to citizens, etc. (Please note that under present banking laws, member banks can loan out some twenty times the amount they have on deposit -- over and over and over and over).

Then the Federal Reserve Bank receives interest on its bonds, for which they paid nothing, note now how they laid it on you good people!

First the Federal Reserve got a billion dollars for nothing. In the meantime they get interest on the bonds they got for nothing and when they eventually cash them they get the money again. Now we are speaking of a mere "billion" -- your government now deals in "trillions". For example, you borrow tremendous amounts each year so that you can give it away in foreign loans--mostly to nations that despise you.

If you believe these conspirators are content with the control of your money, you are miserably in error, and you are in for additional shock after shock after shock.

Here is where the real rub comes into play. While the Federal Reserve could control America's money, there was no way it could touch the earnings of the American worker, because your Constitution expressly forbids it---BUT--SNAKES IN THE WOODPILE!--you simply got stabbed with a plank out of the communist Manifesto--

⁴ The Bureau of Engraving and Printing (BEP) is a government agency within the United States Department of the Treasury that designs and produces a variety of security products for the United States government, most notable of which is Federal Reserve Notes (paper money) for the Federal Reserve, the nation's central bank.

⁵ A **promissory note**, sometimes referred to as a note payable, is a legal instrument (more particularly, a financial instrument and a debt instrument), in which one party (the maker or issuer) promises in writing to pay a determinate sum of money to the other (the payee), either at a fixed or determinable future time or on demand of the payee, under specific terms.

IT WAS CALLED THE GRADUATED PROGRESSIVE INCOME TAX". This would lead eventually to the complete confiscation of all private property in the nation and the complete control of each individual's earning power. However, such a tax could not be brought about without an amendment to the Constitution.

BUT, as they had done with the Federal Reserve Act, these same traitors, with the same President, arranged for the 16th Amendment to become the law of the land and they "hoodwinked" the American people into accepting this absolute control over their earning power.

A little research will show you that most of the Congressmen who voted for the 16th Amendment knew very little about it because only two had even bothered to read it before they voted it into law.

Thus payment of taxes and other charges is but a swindle instigated by the Globalist authority and adopted by the different nations or imposed upon them. Take the same and start again and again and go further until the loop is complete.

Anti-Christ Bankers Destroy Germany

One of the most favored examples of "fiat" money or "printing press inflation" which the "gold bugs" or "sound money" advocates use to condemn government issued money is the inflation of the German mark after World War I. They do so as either ignorant dupes or deceiving agents of the Anti-Christ Bankers.

The true story of this crime against the German people has been beautifully detailed elsewhere so I shall skim over it quickly.

The World War ended in 1918. As of March 31, 1919, just before the "Peace" Conference was called and the Versailles Treaty signed, the price levels of Germany were only 117% higher than they were before the World War began. This was a smaller price rise than had actually taken place in the United States. The public debt of Germany from the beginning of the World War until March 31, 1919, had increased one hundred thirty billion Marks. In terms of dollars that would be, roughly, thirty billion dollars. The United States had increased its own public debt to a similar amount.

The German financial structure was not in any condition whatever to warrant the destruction of the currency, if that had not been the planned intention of the international money-lenders.

Under the terms of the Versailles Treaty, practically all of Germany's gold was taken away from her, together with 75% of her iron ore deposits and mines. All of her colonies were taken away and about 25% of her other physical property. The terms of

this Treaty were diabolical. They were directed to destroy the real German people. From the time of the signing of the Treaty in June 1919 until the beginning of 1922, the international money powers who were in control of the Reichsbank and the German Government were manipulating to gain control of actual physical property in Germany. They went so far as to get the banking laws of Germany drastically changed, so that they could borrow unlimited amounts from the Reichsbank and purchase physical property with the knowledge that the loans could later be repaid with worthless currency.

To give one some idea of the volume of currency that was turned out in Germany, one has only to note what happened to the price levels. Remember that during the war the German price levels had not increased as much as they had in the United States. In 1920 the price level in Germany increased 1500% over the pre-war level; in 1921 it reached 3500% over the pre-war level, and by October 23rd, when the currency became worthless, it was 709 BILLION PERCENT over the pre-war level. In other words, predatory internationalists had printed private marks and forced them into the money stream with the avowed purpose of destroying the money system of Germany. That meant the destruction of all insurance policies and mortgages owned by the real German people.

The international bankers had prepared themselves. They had obtained control of the physical properties and could later pay loans, many of which had been manipulated through the privately owned Reichsbank, with worthless money.

The inflation in Germany was misnamed. It was not a German inflation. It was a private money issue inflation, perpetrated by international schemers.

The inflation was not a government money inflation. It was an inflation of private Reichsbank notes. The officers of the Reichsbank--a privately owned institution--were responsible for issuing money in sufficient volume to destroy the entire banking structure and make all of the money of Germany worthless. And if you can't see that which is coming down on America with the endless outflow of TRILLIONS of unbacked phony money into everything from welfare to the welfare programs of every other nation in the world, to support and financing of endless wars and defense--of other nations, not yours, then you are blind, chelas!

If you are wondering why the Germans accepted such devastating terms, it might have had something to do with the fact that, among the dozens of AB's agents at the conference, Paul Warburg (one of the biggest bankers in your own nation), Vice-Chairman of the Federal Reserve, was advising the American delegation, while his brother, Max Warburg, who had been chief of the German secret service, sat across the table advising the German delegation.

And What About Counterfeit Money

What about funds? Well, let us examine some facts which should also begin to give you clues as to why the Jewish community insists on keeping the "holocaust" in the forefront of people's minds some forty plus years later. IT SIMPLY IS NOT LIKE YOU HAVE BEEN TOLD IT IS, AND WAS!

Let us look into the counterfeit situation. Hitler had again already planned, with great foresight, for this inevitability. In captivity in concentration camps such as Dachau, Buchenwald and Auschwitz, were Europe's best-known and most skilled forgers, many of them JEWS. They were geniuses at their particular craft. A secret order was issued from Berlin code-named "Operation Bernhard". All the forgery experts were collected and were offered life and freedom if they cooperated in producing for Hitler, perfect forgeries of some of the allied currencies, but in particular, forgeries of the British pound and the American dollar, in various denominations. At first the forgers refused, but one by one they cooperated and in an astonishingly short space of time, they produced what seemed to be perfect forgeries. The German government supplied from its own papermills what is usually the stumbling block to perfect counterfeiting -- high quality paper. The plates and paper were perfect, but not satisfied with their own judgement, a secret agent was sent to neutral Switzerland with a suitcase full of "German-made" pounds and dollars as well as other currencies in all denominations. This agent went to one of Switzerland's largest banks and requested to see the manager and stated: "I am negotiating a business deal with a man I suspect of being a Nazi agent, and he intends to pay me in this currency with these bills. Please test them and see if they are genuine".

The bank manager explained he could not do this right away since it was in foreign currency, so the Nazi agent left the bills with the bank manager arranging to return within a few days. Upon his return, he was told that the money was genuine, and that the bank would be pleased to accept it for exchange. The agent returned to Germany and the printing presses started rolling in Auschwitz and Buchenwald. Untold millions were printed, so much so that Britain, after the war, withdrew from circulation its five pound note--a first in British history.

"Come now Hatonn" you say: "This is too much!" Well, let us look at a documented incident and sequel to this story.

Rumors persisted about Operation Bernhard long after the end of the war and one such rumor was checked out quite thoroughly by you human entities. For weeks a group of Austrian government frogmen searched Lake Toplitz in Austria. Eventually they found the wreckage of a German plane, the skeleton of the dead pilot still strapped to his seat. In the hold were large metal trunks which, when pried open, revealed over 300,000 British five-pound notes, in neat bundles, perfectly unspoiled

and with them, some of the printing plates. The money was confiscated by the Austrian authorities, although it was at that time useless as the five pound note had been withdrawn from circulation by the British.

To summarize, we are undeniably in the presence of well-organized groups who master and control the monetary system and manipulate at will the manufacture of money in the pure evil intention of destroying and/or taking control of a competing economy for submission. And in the same way, others with ease are taking hold of major shares of markets and lining their pockets at the expense of the toiling masses. This is the danger faced by all nations trapped in this monetary-financial system wherein it is difficult to have absolute control or control, plainly put.

And What About The Manipulation of Money Supply?

The money supply would represent the amount of money that circulates in the economy at a given moment. This would be measured through statistical indicators set by the country Central Bank or monetary zone. This, it is said, corresponds to all media of payment that can be transformed into cash.

These aggregates would indicate the level of cash of certain economic agents and are represented by the following symbols:

M1 which corresponds to coins and notes in the current accounts

M2 which corresponds to M1 plus booklets deposits and short-term credits

M3 which includes M1 and M2 plus long-term deposits (more than 2 years).

It, the money supply, would allow regulation of the financial market by adopting measures that allow either to remedy a shortage of money or to regulate a large amount of money in circulation. It is supposedly strictly controlled and regulated by the Central Bank because if it were to be too consistent, it could cause inflation and disturb the market.

The money supply and the monetary base would be two different things. The monetary base would correspond to notes and coins in circulation representing approximately 15% of the money supply M1; monetary assets held by account holders at the Central Bank, that is, mainly commercial banks.

But it turns out that global economies are more or less in permanent inflation. One more reason to understand that these official, and even unofficial, explanations are bogus and only half-truths at most.

What ultimately determine the relative value of money would be the amount that is in circulation. The main way for central banks to increase or decrease the amount of money in circulation in the long run would be through the purchase or sale of treasury bills, that is government debt obligations. They no longer would buy them directly from governments but rather from commercial banks, which themselves bought them from governments when they issue them to finance their current budget deficit or refinance their maturing debt.

By buying treasury bills from commercial banks, the central bank would obtain a debt obligation and deposits the corresponding amount in the commercial bank account. This money is "created" out of thin air, which the central bank can do as much as it wants. It "monetizes" the government debt and inflates the "monetary base", which is the narrowest definition of the money supply.

Conversely, if the central bank wants to reduce the money supply, it would sell treasury bills. It thus would remove from circulation the money that banks give it as payment, money that it can make disappear in the same way that it created it.

As it has been brightly stated in previous chapters, this is a banking-financial holdup orchestrated by the criminal Global Elite worldwide. A supposedly sovereign State has a need of money to finance its activities of various kinds. Instead of logically issuing the desired amount directly, it issues government bonds, which it hands over to the bank as a debt acknowledgment to receive a loan from the latter. And this money, the so-called Central Bank create it out of thin air; it should be noted that it would have been better for the State to issue this amount directly without debt and interest.

Governments, therefore, do not have to run into debt stupidly with a generally private banking institution, even a central bank. This will be explained in the following chapters. The State is supreme and there should be no power above except the Nation.

Now the following questions come to mind. If this is the definition of the money supply, what role does the printing press play or the injection of large amounts of money into the economies especially by the central banks of the West; upon what basis do they proceed? To whom or in what is this new money injected?

What makes that in any case, economies are systematically or periodically in crisis situations due to inflation or deflation or outright depression? And why, despite all the so-called years of growth, overnight, these economies fall into difficulties to the point of having to submit to borrowing and draconian measures?

Where do all these accumulated benefits during years, even decades, go that are not even fairly shared among citizens, or at all?

All of this is the fabrication and outright manipulation of real economies by Dark Internationalist forces to serve their own purposes: The Global System of Economic Interdependency which is supposed to finalize the process of global takeover.

In reality, in an honest economy it is the volume of national production and the mechanism and media of exchange that are essential; the money supply should not affect the economy of a Nation if everything is done in correctness.

The current type of economy is what is at stake and that is what serves as the breeding ground for and delights the banking-financial monster.

3

Money Creation of Modern Times

Today things are much more complex. The invention of money in the form of paper money, according to so-called experts of the system, would occur whenever new banknotes are put into circulation and this additional issue of notes (or also coins) may take place whenever the Central Bank carries out one of the following operations:

Transactions with State: these can be advanced payments on funds that the State looks forward to collect through taxes or credits granted to it through the acquisition of public debt securities.

Transactions with individuals -- and especially with banks -- can also include advanced payments on securities or commodity, or credit to banks through the rediscounting of commercial bills.⁶

Foreign exchange transactions: purchase of foreign currency.

Thus, in the current configuration, the State has become the client of the bank over which one has no clear idea of who commands.

If the banking institution is above the State which is the emanation of the People who holds the real power, then where has gone the actual exercise of this power, if not in the hands of bankers who have overthrown the State that has turned itself into a monster wielding the power of the People against the People?

Something has gone wrong obviously and this state of things must stop so that the power returns into the hands of its owner, the People.

Now how does the Central Bank buy foreign currencies, whether in countries whose currencies are convertible and can be built up into foreign exchange reserves or in those whose ones are not?

A foreign exchange reserve is a currency held in large quantity by the State, which is supposed to be used to pay for amounts of goods bought abroad. The amount of reserves held therefore depends, in theory, on the currencies in which the transactions take place.

⁶ **Rediscounting of commercial bills** is an activity involving bills where a financial institution discount unmatured discounted commercial bills with another financial institution by rediscounting. It is a way of financing among financial institutions.

States, which are not issuers of reserve currency, are normally expected to build up foreign exchange reserves through the sale of export products or, in the worst case, have recourse to loans on the financial market.

And, how do the countries issuing reserve currency proceed?

Well, in fact, the banks overseeing these States are creating money and lending it to the governments to finance their activities. And for foreign currencies, they buy it by the same means. And in this scheme we can clearly perceive the imbalance set up for the hegemony of the banking institution in an enslaving mold within which all are trampled but divided into several antagonistic sides of privileged versus underprivileged and always to our own detriment. All this for the sole benefit of the Zionist Globalist Establishment.

The theory commonly accepted by scholars says that the possibility of invention of scriptural money depends of three realities.

First reality. The issuance of purchasing power by the Central Bank. If the Central Bank does not create new purchasing power, private banks cannot do it either.

But it is well-known in the inner circles that other monetary and manipulative maneuvers of the Stock Market are set in motion to achieve the desired goals, outside or with the complicity of the Central Bank.

Second reality: The relationship between workforce and deposits chosen by the public. Indeed, if people prefer to keep paper money at home, instead of bringing it to the bank, the deposits will be smaller, and will be lesser, therefore, the ability to invent purchasing power from these deposits. Conversely, the more one deposits in the bank, the greater the ability of the bank to provide credits.

This is a criminal practice instituted through the fractional reserve system whose beginnings goes back to the practice of goldsmiths receiving for safekeeping against deposit receipts the tradesmen's gold. And it is also true that if people keep their funds at home, the hands of the criminal bankers are severely bound ... but parallel to all these mechanisms presented and taught officially, there is the counterfeit money that participates in the same order as the money printing press, and other criminal maneuvers.

Third reality: The relationship between reserves and deposits maintained by each bank.

In reality only the actual deposits constitute the money available for loans. The system of fractional and compulsory reserves means the right for a commercial bank to lend, by means of book entries, money that it does not have and on

which, in addition to repayment by the debtor, it will receive interest. The commercial bank is authorized under this system to lend up to several (20) times the amount of their customers' deposits, whereas only a small portion of these deposits is actually stored in real money and remains available for withdrawals and this after constitution of a deposit of outstanding loans with the Central Bank.

The existence of a speculative currency market is also a crucial point to consider. The possibility of changing currencies against others, without this movement responding to a parallel movement of goods, encourages to a large extent the performance of purely speculative transactions.

As paper money is anonymous and depersonalized, we could say that the current monetary system is an anti-documentary system. This reality has important consequences, not only in the strictly mercantile field, but also in the social field, and even more so, in the informative field. Thanks to its anonymity, the current monetary system makes it possible, with complete impunity, to commit acts of corruption that are obviously very harmful to society: theft, tax evasion, capital flight, corruption of judges, civil servants, etc.

In the end, a maze of monetary and financial mechanisms is created in which the players themselves end up being caught in a trap of their own making. But anyway, the consequences always come off the backs of the masses through their Anti-Divine Government-puppets.

What are Inflation, Deflation and Depression?

Inflation would mean a long-lasting, general, and self-sustaining increase in the prices of goods and services. It would also be characterized by the increase in money circulation (money supply). As for demand-pull inflation, it is supposedly a general and lasting increase in prices due to excessive demand in relation to supply. The lack of products and services would then mechanically generate inflation. The greater the imbalance, the higher the demand-pull inflation.

Proponents of monetarist theory identify the relationship between the money supply in circulation and inflation. The more money in circulation in an economy is important, the more the price would rise as a result of a depreciation of the value of the currency.

Here are the questions:

How can introducing an amount of money into the money supply increase the price of goods and commodity?

Why should too much demand in relation to supply lead to higher prices?

What comes into play to bring about this depreciation of the currency?

The answer is undeniably human psychology corrupted by the lure of personal and opportunely egotistical gain. And that plays a central role in all this.

What about deflation. It supposedly is a phenomenon of general decline in prices over a sufficiently long period. It would be the result of a global demand that is not sufficient to absorb the quantity of goods and services produced by the economy or in other words, a gain in the purchasing power of the currency which results in a lasting decline of the general level of prices.

How can a decrease in global demand lead to a general decline in product prices?

What comes into play to bring about this gain in the purchasing power of money?

Why should a decline in aggregate demand relative to supply lead to a decline in the general price level? The supply-demand relationship it is said conventionally, without anything special to add. But what really determines this manipulation or fluctuation of the market?

Here we come again to a response of an identical nature, that of human psychology at the control of an economy of evil and egotistical predation.

On the one hand, there is the decrease in the amount of money in circulation which is a maneuver directed by the controllers of the system; on the other hand, there is this slackening which forces the merchant-traders wanting to sell off their products without risk of losing them, as far as consumables are concerned. As for other non-perishable consumer products, there are other considerations such as the threat of bankruptcy, indebtedness, and so on.

The Depression would mean a serious form of crisis that is characterized by a significant and lasting slowdown in economic activity: production, investment, consumption. It is associated with lower prices and a sharp rise in unemployment.

Why is that?

Our view is that if demand is too high, supply simply has to align itself by providing or responding adequately in a humanized and humanizing economy.

And how would the increase in the money supply increase the demand for goods and services, unless a wage increase, and hence purchasing power, becomes a direct and systematic consequence? Which is not usually the case.

And what, concretely, causes the phenomenon?

Some of the reasons are: The credit crunch; The decrease in the money supply leading to the bankruptcy of corporations or at least difficulties requiring a reduction of staff. These three factors alone cause a depression and they are not cyclical as it is claimed. It is an intentionally evil human intervention that is the cause.

In the same vein, the increase in the money supply, for example, by raising wages, will normally make it possible to solve the problems of precariousness and other problems, and especially of the inflation that States struggle to control, not the opposite. Fixing commodity prices on the other side will solve the issue of both inflation and deflation.

All those analyses and conclusions are therefore absurd because the issue is very simple to solve. Inflation is therefore a speculative psychological problem. Exchange rate instability and the extraversion of economies and their reliance upon imports for its most vital needs are some of the causes.

4

Of The Franc CFA Monetary Zone

In addition to the dangers presented by the current International Monetary System, the FCFA monetary zone, or the Francs of the French Community of Africa operates other unofficial and hidden mechanisms whose evidence is veiled by the explanatory confusion of experts in monetary matters. Even the revelations made by certain AkhnAtonites specialists who have helped citizens of the continent open their eyes on the subject will not have been able to get their hands on its orchestrated gravities.

The CFA franc(s) are one or currencies that have no real existence other than within the framework of the national economies of the Ka-Akhenaton countries which even more have no influence on its manipulation.

All financial/commercial transactions being conducted in dollars or foreign currencies paid directly to the French treasury on so-called comptes d'opérations (transaction accounts), it would rather be France that holds and sells our raw materials, in other terms our wealth.

The stories of deposits of 50% of the foreign currencies in the French Treasury are only covers of the great orchestrated economic-financial scam, the details of which are not all known even by the so-called "great" economists.

The 50% so-called hold in French Treasury as a collaterals of convertibility and otherwise are but in actuality a way of hiding the fact that it is the totality that is confiscated by the French State, since the other supposed 50% are handed over to the countries in local currency (FCFA) that the same France takes care to issue in lieu of concerned Nations for their local use only. Therefore, ultimately, France retains 100% of the foreign currencies generated by the foreign trade of the countries of the continent under its total control, invests these funds to derive profits undeclared, lends these same funds to these countries with interest.

Now how exactly do these countries proceed for their purchases outside their monetary zone?

On the one hand, part of the other half, which is supposed to be converted into FCFA for the internal use of countries, is used to cover certain imports under the paternalistic inspection of the French Treasury.

On the other hand, by loans from this same France and international financial institutions with interests on top to ensure the endless debt and thus the maintenance in enslavement. And all these currencies obtained via loans pass necessarily by the French Treasury which is in charge of deciding what use should be made of it.

She is the exclusive supplier for those countries that have to run into debt for their external purchases. Therefore, all that these countries need to buy must have the green light of France if it is beyond her capabilities to provide them with overbilling, since it is the French Treasury that pays via the foreign exchange reserves of aforementioned transaction accounts after conversion of the amount in FCFA into foreign currencies.

Even the smallest portions that are returned to the States of the monetary zone are paid to them in local FCFA, as has been said, and it is not even sure that this is done according to the percentage of currency earnings from exporting that this amount of money is injected into the economies. From all this it comes out that all the profits are taken away by the colonizer. I mean that after the 50% of the export currency earnings are paid to the so-called transaction accounts, the other half going back to the States is paid to them in FCFA, manufacturing of which France takes care with interests in addition.

Furthermore, the economies of this monetary zone are under a severe inflation censored by the monetary institutions and experts of the matter or completely ignored by them. Stagnant wages and rising prices, especially after a devaluation, lead to a decline in purchasing power and consequently to a factual increase in the prices of the various products and services that are the hallmark of inflation.

5

Nature & Mechanisms of Debt

Hereinafter I insert an edifying extract that explains very well the shameful and criminal scam that the mechanism of indebtedness is and its ugly nature. Thereafter, further conclusions will be drawn.

Quote:

Money, Taxes & Government Debt

This is perhaps the hardest human puzzle for individuals to understand for the wrong ideas have been foisted upon you for so long that you must retrain your entire thought processes regarding the above issues. I get hundreds of requests to "simplify it" again and again. Further, ones ponder how to integrate God, Cosmic Beings and human money exchange -- THAT IS EASIEST OF ALL TO SIMPLIFY: GOD RESPONDS TO THAT WHICH YOU REQUEST AND REQUIRE AND CAESAR HAS NOTHING SAVE THAT WHICH HE HAS STOLEN FROM GOD -- THEREFORE, YOU WILL ALWAYS FIND GOD WHERE YOU ARE!

You are totally blasted and mind-boggled daily by the media and pulse beamed at night while you sleep--relentlessly. Part of the bombardment is total confusion regarding the subject of taxes and government debt. If you people understood money, despotism could not reign as legitimate government, as you have allowed to occur.

You MUST realize that there are TWO kinds of what you recognize as "money". We will stick to the U.S. operation but the same is applicable all over the globe for the intention and actions are underway, now, bringing into the marketplace the one-world currency until such time as a totally cashless society is perfected through this "New World Order" of which Mr. Bush speaks so often.

There is what is recognized as "Constitutional money" which is measured in weights of gold and silver brought into existence by human production and used as a medium of exchange and a store of value. It no longer exists in a constitutional capacity!

Then there is "modern money" which is created out of notes in unlimited amounts by the Federal Reserve (which is NOT a Federal agency but rather, a private bank corporation) along with other commercial banks. As a carryover from "Constitutional money", the people assume that modern money is also a medium of exchange and a store of wealth. The tip-off that modern money had a sinister

purpose came when the people were forced to accept it via legal tender laws. The second clue came when Gresham's Law worked perfectly, that is bad money (new money) drove Constitutional money (gold and silver) out of circulation. And it only took a few months for gold and silver money to disappear after 1964.

Simply stated then, Constitutional money as described in Article I Section 10 is production out of the precious metals of the earth, whereas modern money is non-production created by a monopoly oligarchy to regulate and own all human action and production. In other words, modern money has one central purpose. It is used to expropriate wealth. Dictionary definition of "expropriate" is "to take or transfer the ownership (of wealth) from one owner to another". The conclusion is that modern governments, whether communist or democratic, use modern money (non-production) to expropriate or steal your production and your savings. Yes, the same money system operates the world over.

Please blank your mind and forget everything else and answer this question. If the government and its bankers or the bankers and their government (non-producers of wealth) can take your labor and your savings without payment, Who is your master???

Modern money expropriates wealth.

Dear ones, it is a great illusion to contemplate freedom under a world slave system where all production and wealth flows to the money creators. The reason that the illusion of freedom works decade after decade is because of government police power to REGULATE. Governments and central bankers create economic cycles pumping "money" (credit) and then withdrawing so that the money creators don't self-destruct. And essential to the survival of the system is the police power to reduce consumption, i.e. "income tax".

Then what conclusions can be established?

Government gets all wealth and production for nothing because it "pays" with money (credit) that costs nothing. "Of all the contrivances for cheating the working classes of mankind, perhaps none is so effectual as that which deludes them with paper money". Quoted from your own Daniel Webster and projects wisdom.

This means that government deficits DO NOT and CANNOT EXIST! Another quote: "The Federal Reserve in cooperation with the federal government has the inherent power to create money--almost any amount of it. This power makes technical bankruptcy out of the question". (The National Debt, published by the Federal Reserve of Philadelphia).

This in turn means that there is no money of account in the United States. No government official, including the IRS, will answer the question, "What is current as

money"? They refuse because there is no money of account, only a credit system. The Federal Reserve System works only with credit!

This means, then, that the income tax system (which is Constitutionally unlawful at best) was not designed to collect taxes. In a credit system there can be no money going to Washington as taxes. What you think of as taxes is not money--but credit.

Therefore, when the IRS reduces your credit in your bank account it goes out of existence. IT DOES NOT GO TO WASHINGTON to support the government or pay its bills. Why would government need your credit when it can create any amount?

What then is the so-called income tax system for?

Let us have a little hint of truth from one, Beardsley Ruml, speaking to the American Bar Association in 1946. Mr. Ruml, by the way, was Chairman of the Federal Reserve Bank of New York. He stated that "axes for revenue are obsolete". His thesis was that "...given 1. control of a central banking system and 2. an inconvertible currency, a sovereign national government is finally free of money worries and need no longer levy taxes for the purpose of providing itself with revenue". (Please read this last statement as many as five times and then again if you didn't "get it"!)

In that same speech Mr. Ruml outlined the purpose of "taxes". Please remember that modern taxation is a system of reducing consumption by reducing credit. It is NOT a system to support government.

Quoting further from Mr. Ruml:

"Federal taxes can be made to serve four principal purposes of a social and economic character. They are:

"1. As an instrument of fiscal policy to help stabilize the purchasing power of the dollar";

Note please: How does one stabilize a unit of credit, the dollar? By reducing credit by reducing consumption and calling it income tax! Therefore, the purpose of the IRS is to help stabilize or regulate the credit system. The credit system would not work without regulation, and the IRS is the regulator. Hence, friends, its awesome power!

"2. To express public policy in the distribution of wealth and of income, as in the case of the progressive income and estate taxes"; (This should be most painfully clear as to its intent).

"3. To express public policy in subsidizing or in penalizing various industries and economic groups;

"4. To isolate and assess directly the costs of certain national benefits, such as highways and social security".

The conclusion must be that income taxes or any other taxes do not have anything to do with paying government expenses, but is a system of credit distribution as determined by government.

Do you get the picture? Are you so intellectually dead that you cannot understand and decipher government propaganda? What is really going on in Washington is that the politicians and bureaucrats are bickering over how to regulate consumption with the credit system, under pretense of how to pay government expenses and reduce government debt with more income taxes. Can you see that if governments should refrain from regulation (of your consumption and their counterfeit) the worthlessness of the money would become apparent and the fraud upon the public could not be longer concealed?

This means that the volume of money (credit) regulates its value. Whoever controls the volume of money (credit) in any country is the absolute master of all trade and industry. Which means that the central banks of the world are doing counterfeiting and you are forced to take it by the force of legal tender laws.

Which means that no matter what a national government calls itself, either communist or capitalist, all have the same money system, i.e. credit system, which guarantees a world economic slave system of production for use and not for profit, meaning that the credit money system limits production for profit as far as the people are concerned.

Amassing of wealth is limited by the "income tax" system and inheritance taxes.

This means that the more production and wealth are transferred to the government and the bankers via "money", **there must be a greater restriction of consumption.** Money (credit) would keep its value if there were fewer people bidding against each other. This raises a very important and relevant point:

Quite simply, the Fed wants you dead and they plan for you to expire when you retire so as to cut consumption. There is much to help with that task in point; there is poison fluoridated and chlorinated water and cancer, AIDS, etc., to eliminate you (and your consumption). If all people lived to be 100 on your placement, a government banker counterfeiting system would collapse from too much non-production and consumption. **It cannot and will not be ALLOWED!** If you understood money you would know why government funds research and controls and limits disease and cancer cures. Consumption of the people is a major problem for the money creators.

The sole function of legal tender (modern money) is to get both labor and wealth without payment!

End quote

It follows that debts as conceived and perceived by the conspirational Internationalist Institutions do not exist or exist only in our schizophrenic and ignorant minds of the reality of this globe, in other words, the sequence of true historical events of life of the nations of this planet.

First and foremost, the true nature of the real debt stems from the imbalances knowingly perpetrated by the acts of nations toward other nations and especially by power factions against races and entire peoples in their quest for total hegemony and planetary control.

Then we have the organized and sophisticated banking-financial mechanisms to further confuse and force the nations to acquiesce to the diktats of the conspirational forces in order to accelerate the march towards the total enslavement of the masses of peoples of this world. This last type of debt is what has taken precedence in the politico-financial considerations and perceptions of the individual and governmental institutions. And it is on the basis of this that we consider a state of indebtedness and non-indebtedness.

But the latter is the most false and illusory, a total swindle of the kind voluntary and willing victim of the evil vampirism exercised by the Anti-Christ forces through the Internationalist Bankers. This is the most cruel hoax suffered by world civilization. A debt-money-wealth that is not, created out of thin air to subdue the peoples and get their hands on their real wealth, that is the natural resources, workforce, etc. From the nonexistence of this debt it follows that it cannot and must not be paid. Need be to urgently put an end to these ravages based only on the true nature of it.

On the other hand, the devastating effects of this affairs are to be added to the account of the real blood debt. And it is on this ground that we can talk about indebtedness and possible repayment and who can be considered "debtor" or "creditor". But ultimately, what we must take into consideration is the humanistic path toward definite balance within all these psycho-materialistic deviances.

Hence, pecuniary/financial debts are a serious crime and should not be paid, far from it; and the settlement of the so-called blood debt must find a just, equitable and lighted solution for our civilization to regain a status of enlightened Humanity. Understanding banking and finance of today puts everything in the right perspective.

6

The Transitional Foundation To The Troceconomy

As a result of all the previous developments, the dangers embodied in the monetary and financial system and its criminal character are clearly exposed and obvious. The deduction is that in order to stabilize and sustain the economies of our Nations, it is necessary to migrate to an economic-monetary system whose foundations will have qualities that will preserve them from all these drifts and inconsistencies.

This migration must then necessarily go through a transition that will naturally serve as the foundation for the new Global Economic Concept.

We are therefore going to have to lay the foundations for a foolproof/impregnable monetary economy to begin with, and then, taking into account the factors and criteria that will be highlighted in the following developments, tackle the major and final stage of anchoring the new cashless economy that goes hand in hand with the Autarchic Troceconomy.

The Foundation Of An Unerring Monetary Economy

Monetary Freedom?

Was there ever a time when men were free of the usurers' yoke of bondage? Yes, and it was a glorious period that lasted for nearly six centuries and provided nearly "utopian" conditions for the working people in England, and for shorter periods in the other European nations. This period is known as the Renaissance, but the reason for it is a carefully kept secret. Why? Because the revelation of this knowledge would again result in the banishment of the AB's and a flowering of debt-free freedom.

In 1100 A.D. Henry I became King of England and found the treasury empty. The supply of gold and silver coin had mostly gone with the Crusaders to Palestine (oh woe is me) and a medium of exchange was urgently required. Rather than seeking loans from AB's, Henry issued into circulation for payment of government debt, or as receipts for goods and services rendered, marked pieces of wood called tallies.

These sticks varied in size from about four inches long up to some 8 1/2 feet long. The longest represented 50,000 pounds. Notches were cut into the side, the width of the notch representing the value in pounds sterling, and the amount written on two sides. (A pound sterling was originally an actual pound of silver). The sticks were then split

and one-half paid into circulation, debt free. They were readily used by the people in trade, because they derived their value from the fact that they were receivable in payment of taxes. When the tally was presented for payment of taxes, it had to exactly match, that is tally, with the half retained in the treasury, called a foil. Forgery was nearly impossible. Silver coins continued to circulate also.

Usury (interest), being strictly prohibited by Scripture, was also prohibited by both the Christian church and government. However, there were those who continued the evil practice until they were banished from England in 1290 A.D.--and would you care to guess where they went? That's right! With an honest and convenient money system, an English working man could supply his family's needs for a year by working only 14 weeks! This left a great deal of leisure time available for intellectual, religious and charitable pursuits. This is the reason that the incredible cathedrals of England and Europe were built completely with volunteer labor. Do you think that is amazing? What is really amazing is how this information, essential to your freedom, has been so successfully kept concealed from you!

This tally money system continued to operate in England until 1783, when it was abolished by statute. Nevertheless, tallies continued to be used in rural areas until 1826.

The model that has just been outlined is a testimony of what is possible and much more practical for the world's economies. And they took good care to hide it from the peoples to better lock us in the dead-end paths of the so-called Globalization.

The system finally managed to entrap the civilization into an artificial Anti-Divine paradigm that ended up connecting us to an automatic mode of induced thoughts that are not ours. We will therefore take example of the few old concepts that have worked well to build the new Civilizational paradigm.

Failure Of Gold And Other Precious Metals As Standard

After all, every man values everything differently from every other man and also differently at other times and places. Therefore, the first thing necessary to establish a "Standard of Value" is to determine what the general requirements for ALL "standards" are:

First, a standard must have **similitude**. That is, it must be similar to that which it measures. A standard of weight must have weight, a standard of length must have length, etc.

Second, a standard must have **stability**. That is, its value must remain constant under all conditions throughout the system which it serves. An inch is exactly the same length whenever and wherever it is used.

Third, a standard must have **commonality**. That is, everyone in the system must understand and have, or have easy access to, the standard unit.

If you compare any product, and especially gold, to the criteria for a monetary standard of wealth valuation, you find them sadly inadequate.

If you compare any commodity, and most especially gold, against these criteria for a **monetary standard** with which to measure **wealth**, you find them to be woefully inadequate.

With respect to the first criterion, **similitude**, there is no relationship whatsoever. The value of gold is determined by its weight and purity. While the price of many commodities (coal, wheat, meat, fruit etc.) is determined by weight, the price of manufactured goods bears little, if any, relationship to their weight, the major cost factor being that of "labor".

With respect to the second criterion, **stability**, you find that gold is only chemically stable, that is, durable. As a commodity in a free market its price would vary in accordance with the law of "supply and demand". As a controlled commodity, its price has been less stable than that of the stock market, and for the very same reasons.

With respect to the third criterion, **commonality**, while many people have gold wedding rings and some have gold fillings, very few have any gold coins which could be used as money.

Furthermore, the vast majority of the worlds' gold is owned or controlled by the AB's. **THINK ABOUT THAT CAREFULLY.**

Thus, it is obvious that of these three criteria for ALL standards of measurement, gold and silver meet none of them as a monetary standard.

Incidentally, the "gold bugs" insist that money, in addition to serving as a medium of exchange and **measure** of value, must also be a **store** of value, which most of them erroneously refer to as "intrinsic" value. **But these are contradictory requirements.** Money, in order to serve its function as a medium of exchange, must be kept in circulation and the faster it circulates the better it serves that function. If it is "saved" or hoarded, it cannot function as a medium of exchange.

In reality the best stores of value are, in order of priority: food, water, fuel, seeds, tools storage and briefly products of primary necessity of all type covering the daily needs.

Time and Money

Since no commodity has all of the criteria to serve as a monetary Standard of Value, what in the world does?

A clue to what this might be is given in Revelation 18:12, 13, which lists the treasures of end-time Babylon in descending order of value. The first are "cargoes of gold and silver" and the last are "slaves and human lives". Yes, the lives of men are the least valuable thing in Babylon. This well proves that we live under Babylonian rule today, when we allow a little group of unbalanced thugs to create paper-money with or without backing of anything at all to buy and rule over our lives with our consent; when we send our finest young men to fight, suffer and die in the AB's' no-win wars and, even worse, permit helpless, unborn babies to be murdered by the millions?

If the Babylonian system is to be overthrown, then its value system must be reversed. Instead of everything being measured by gold, silver or other precious metals, the proper standard should be the **lives of men**. And how are the lives of men measured? By "TIME"! Therefore there comes to the forefront the FACT that the only REAL MEASURE of value be somehow established based upon the time of men's lives, or **man-hours of work**.

The price of all things can be, and frequently is, based upon the man-hours of labor required to make them and market them. The price of something is often quoted in terms of the average man-hours of labor required to purchase it, especially in comparisons between different nations or time periods. In fact, this is the conscious or unconscious means by which everyone determines the value of anything to himself; how much of his life "time" must he exchange for it? It's already collectively accepted that "Time IS MONEY". This certainly would clear out the financial middlemen and predators right away. Also the politicians who spend time running after material wealth, for instance, would be able to do so indeed. All would find themselves on an equal footing as of labour.

Now that we have made all this historical finding within these edifying excerpts of what is wrong in the system and why, we can now go to a projection of a paradigm much more balanced and respecting Human Life and Freedom.

Standard Of Value

We will therefore arbitrarily establish our monetary standard as one average human-hour of labor. This new standard of monetary value, let's call it the "Ki" and its 1% division the "Kilia".

How well does a Ki meet the requirements of a standard? Let's clarify it.

First, **similitude**. Labor time is the primary factor in determining the price of everything and also the value of everything to each person, as already mentioned.

Second, **stability**. There is nothing more stable than time, which remains fixed through all generations and Nations.

Third, **commonality**. Nothing is more common among men than time, which is distributed to all men equally; 24 hours a day and you can't take it with you when you leave.

Everyone understands time and virtually everyone has its standard of measurement on his wrist or kitchen wall. We measure and regulate our lives by "time". So it seems logical to measure progress through this third dimension by our primary commodity, "perceived time". For many things in our dimension, there is no other means of measurement. There is no money value (Dollar, Naira, Cedi or Euro) which we can place on the work required to produce a lengthy document, nor on the experience, discipline, communications, etc., required to study, research, analyze, understand, and solve a problem. The only cost that can be placed on the effort is the TIME involved to accomplish the finished product. Thus, we'll find that the Ki not only meets all of the requirements for standards in general, but uniquely serves as a monetary **Standard of Value**.

Secure Monetary Mechanism

In order to guarantee the inerrancy of the medium of exchange against globalist predators of all types, it is proposed to present it in the dual form of scriptural and paper as follows:

Paper money -- Issuance of paper money in the form of cheques-notes, the counterfoils of which are kept by the National Bank as witnesses (sellers and buyers receiving only the other half put into circulation).

It must be issued with a personal identification number of the holder registered and recognizable by the National Bank. This way, all banknotes in circulation are easily traceable and controlled by the National banking institution.

The notes checkbooks are also equipped with heels which are the double of those kept at the National Bank.

Notes are issued in all denominations, from the smallest to the largest, which must not exceed an amount for trade facilitation in cash.

The metallic coinage are therefore removed and replaced by banknotes denominations.

This type of cheque-note is a national medium of payment under the control of the National Bank. It plays the role of fiat money in the current system but in an individualized and secure form.

This mode of operation of paper money will have the capacity of rendering counterfeit, real-forged banknotes, which constitute the primary medium of hitting nations' economy through the depreciation of currencies.

This can come about, among other possibilities, as follows.

An amount is allocated to each account, whether individual or familial.

A notes checkbook equivalent to 100,000 currency units (Ki) is due monthly to each citizen. Based on the principle of common ownership of the wealth of the nation, this cannot be otherwise.

The citizen cannot spend more than the monthly amount due. And there is account replenishment only when it runs out of funds.

Purchases are paid with the cheques-notes which counterfoil are kept at the National Bank. Any other currency is forbidden.

The heels of the checkbooks received are subsequently returned for accounting and replenishment to the National Bank.

All banknotes in circulation lose their validity after a period of one year and must be returned to the National Bank more or less before this deadline.

New notes change color to secure the process.

Workers will be paid above this living wage due and dignifying guaranteed to each citizen until the effective reorganization of labor on the basis of the Popularist System, NE DUKEKLĚ, where any disparity will disappear, since each will contribute in the same way to the National production.

Ki is only used in national exchanges. The supply of locally unavailable products is provided by the National Administration which makes them available for the needs of the citizens until the achievement of the goals set up for the Autarchic Troceconomy. And these import products are determined taking into account only and strictly the real needs of the People.

Scriptural Money -- It is used for the management of operations through individual bank account and/or familial held at the National Bank.

For validation, a device is provided to verify authenticity of the cheques-notes. The notes are personalized by the engraving of the fingerprint of the entitled person. A scanner of fingerprint on the banknotes is provided for the use of the citizen and this device would be linked directly to the database of the National Bank.

For electronic payments, a bank identification number is entered which is then validated by fingerprint.

The adoption of fingerprint identification in lieu of the bank card has the merit of rendering the use of the medium of payment simple and safe for all with a minimum of literacy teaching.

In the medium term, it is this last modus of payment alone that will be retained for any operation on the national level.

With this secure and very Popularist monetary system, it is certain that economies will be better off and that our nations will finally be able to enjoy the human resources and material riches in their possessions in a more balanced giving and regiving.

Function

Ki refers here only to the life span (life force) of Human. Kilia refers to the hundredth (centime) of Ki.

The Ki monetary system can be instituted by any governmental authority anywhere in the world, and should be, and this will allow trade to be conducted with any other economy based on the same system on an equal basis, since all Ki would be issued according to the same standard. As a result, a product manufactured at a given location worth 100 Ki automatically retains the same value anywhere in the world and can be exchanged without any intermediary manipulation of speculative market agents. Consequently, the false values, economic in this case, erected by the conspirational Globalists of the evil Global Regime of Interdependency will dissolve into oblivion.

The Administration and the Money Issuance Authority would issue as many Ki as needed to meet its authorized expenses. These would be put into circulation as monthly payments for worker-servants of the Administration and for corporations for goods and services. Monthly payments could be maintained at the rate of 1 Ki per hour or adapted according to the economic context.

All goods and services are also valued at the rate of 1 Ki per hour worked or spent, and on this basis exchanges occur between individuals, various community groups, and between them and the State Administrations.

With this monetary system, taxes TO PAY FOR ADMINISTRATION EXPENDITURES WILL NOT BE NECESSARY, since the Administration will issue all the necessary money -- in accordance with the Constitution.

The adoption of the Ki monetary system would produce many benefits:

A stable monetary system based on a Standard of Value that everyone understands.

The elimination of the current legalized system of organized crime, theft and slavery through usury.

The elimination of the tax burden through the abolition of all forms of taxes such as Personal Income Tax, Value Added Tax (VAT) and Corporate Tax, Rolling Tax etc.

The elimination of unemployment, since sufficient money would be available to ensure the employment of each individual Member of the Nation as contributors and servant-workers of Administrations, Industry and Communities of Life.

The three destabilizing economic factors of inflation, deflation and depression will no longer be possible in such a system.

The perfect situation targeted by all this reform projected in the preceding developments is the rapid migration toward a cashless society, which cannot be trapped in a dynamic of hoarding, accumulation of false wealth, so that products can rather be stored and exchanged on the basis of this standard of value.

This brings us to the concept of the Popularist Autarchic Troceconomy, the rooting of which will be the culmination of this Humanizing civilizational re-evolution.

7

The Volitional Autarchic Troceconomy

In this paper, economy is viewed from the angle of the Management of elements, parts of a whole; the manner in which its parts are distributed or apportioned.

Moving from the transitional monetary system as developed in the previous chapter to a cashless economy should be an easier and simpler step. And what is referred to as the Autarchic Troceconomy, which goes hand in hand with the elimination of money, is the major step that will end up sealing the nation's economy from any external dependency risk factor of fragilization.

Things will be unfolding in the form of the concept referred to as:

Volitional Autarchic Troceconomy or Self-Centered Economic Endogeneity

Definitions of terms to begin.

Autarchy: *The situation of a country that voluntarily tends to be self-sufficient in terms of economy.*

Volition: *Act of Will; determining one's will in relation to something that may be a fact or an idea.*

Endogeneity: *Quality of what is produced by the structure itself without any external input, as opposed to exogenous.*

It can be asserted, given the state of advanced general rottenness of this world, that the world economies have intentionally been forced into a mold of evil, imbalanced and weakening interdependency, and this to allow a global control to take hold for the benefit of the conspirators and promoters of the system that is more correct to call Global Regime of Interdependency.

Manipulation of raw material prices, quotation of corporations through a Stock Market designed as another tool to promote so-called financial values that are not, investment capital accumulated by theft and predation etc., allow to take control at will and/or destroy the real economies of Nations, no matter which ones.

The free-trade so much touted by the Elite media, in fact, collide with the human free-will of life experience. Overreliance, if not total, on the markets and resources of the economies of nations in general and Western ones, in particular, renders them frail malleable dwarfs for some of them and giants with feet of clay for others who will collapse overnight with acute socio-economic and political consequences, should the

situation be reversed or balance restored. It is this severe and dangerous dependency which is veiled under the disguise of the so-called Free-Trade, promoted by obscure interests often invisible.

Multinationals, stock markets, banking and monetary system, educational system, etc., are all tools of the current system of socio-economic predation and domination that must inevitably and irremediably give way to an enlightened approach.

The scheme as orchestrated in the current economic regime on a world scale is rather a perceived constraint made normal in the eyes of the world, fomented by the proponents of the system but whose disastrous consequences fall exclusively on the heads of the citizens of the States involved, in other words, the world as a whole. Thus, this economic road is a choice dictated by others for very specific obscure purposes.

Our world economies today are so bad that it should be obvious for some time now that we have been misled away from the exercise of the Gift of Reason and Free Will at a point of total confusion that leaves peoples in the hands of the same conspirators, who continue to put them down more than ever.

Ask yourself, how can a trader or a corporation from a developing country or not freely decide to compete unfairly in its own market with products that are otherwise subsidized on the pretext of an overture to the other market where he or she has no chance of prospering. And on what basis is this prosperity occur, assuming that there really is one? The present system can only prosper on a nurtured imbalance otherwise everything collapses. It is obvious.

The fact is that all manufactured goods such as foodstuff, technological products and others are supplied by a handful of countries in the West essentially under the control of an Evil Globalist Elite, and all the others are reduced to a state of Useless Eaters to get rid of. Nonsenses of this kind, sufficiently demonstrate the inconsistencies and the serious threat posed by the system.

All this unfair practice has led to a potentially dangerous situation of increased and unbalanced artificial interdependency of world economies defying logic and, above all, a virtual dependency of the latter vis-à-vis the multinationals who crush down States on the pretext of globalization. This collide with the notion of Freedom and is therefore in complete opposite of a fulfilling community life.

A more balanced system that is more respectful of Life Principles must imperatively and quickly take over from what is currently going on.

The Economy which is projected in this new Civilizational paradigm is what will guarantee permanently the stability and invulnerability of a Nation.

Here is a summary of what is proposed to all Humanity.

Economies built on the principle of Volitional Autarchic Troceconomy, in other words, Self-Sufficient Economic Endogeneity, within large Federal Territories and with an optimal qualitative Demography under enlightened control.

Contributionism,⁷ Complementarity and Equality are at the heart of the concept and this assumes the reasonable pooling of the skills and competences of individuals in Communities for a search for solutions taking into account the needs of each and every one of them equally. Beyond this notion of common interests, there is this search for Humanity and promotion of values, which make each of us a useful element of the society, and the assurance of harmony and social peace.

This is a societal model with a circular pattern underpinned by the principle of Divine Love and which takes into account the equality and unity of all links in the circle, each being created equal in the image of the Creator. The new perspective posed by the new societal model will see frustrations and inhibitions evaporated and the individual fully fulfilled into the balance of his Being.

Agriculture, infrastructure construction (industry, housing, road and various), technology, Science, all sectors of the nation's activities must have a national rooting so as not to depend on any external sources and resources. This socioeconomic system is aware of the unlimited possibilities of Creation, whose mastery is made possible through the High Natural Science, cf. Walter Russell's New Concept of the Universe, makes the conscious choice to be self-sufficient in the production of its needs from raw materials to final consumer goods and continually seeking ways and means of increased progress in Harmony and Balance.

This socioeconomic model places the respect and protection of the Planet, and the empowerment of citizens at the forefront. So, in the same vein, the same Perception-Sentiment-Thinking is naturally directed toward the citizens of other Nations of the World. Not only does each Nation have to base its economic fabric on the concept of the Autarchic Troceconomy, but each Community of Life must go as far as possible in achieving this goal, in the medium term, within the Nation or Federal State which coordinates the whole in an unwavering unity.

Therefore, this Royal Road, the one above all others, is the one we need to walk and promote for a fair, stable and sustainable global economy. This way, each individual within each Nation is put to task for the good of all and in addition, it removes any

⁷ Contributionism, as taken in this book, represents a society wherein everyone contributes to the greater good of the whole community. Everyone is honored and respected, as a human being, of flesh and blood, and as an infinite soul, part of the Divine creation of the Creator of All Things

possibility of influence and economic blackmail from the outside and puts an end to fratricidal wars.

Major sectors of the State's economic life will be structured along the lines outlined in the following developments.

Banking and Money

The banking system as explained and proposed in the previous chapters will now play a most simple and balanced role for the Autarchic Troceconomy. Banking-monetary system only manage and supervise transactions between Communities, States and individuals, that which we call regulation under the strict standard of value as defined previously.

Money then becomes a simple mechanism for regulating trade where need be only. Thus we do speak of money where there is absence of the thing as we know it in the present system.

In reality, it is not even necessary to issue money in paper or scriptural form, products and time spent by the production being or representing the effective value to be taken into account in barter-trades.

The banking-monetary system thus has the role of setting up this system of evaluation allowing honesty and justice in the quoted value of goods-products for and in the Autarchic Troceconomy or the possible exchanges with the outside world aligned with the same.

Finance And Labor

Finance

According to an accepted definition of the term, Finance covers a field of activity which consists in providing the money necessary for the realization of an economic operation. This area concerns individuals, households as well as public or private corporations, but also states.

But the practices of international finance, based on the mechanisms of the banking monster, as we know it today, are diametrically opposed to Life and require a deep restructuring for alignment with the philosophy of the new system. The assets and resources of the Nation belonging to all equally, there can be no question of bank loans of any kind whatsoever made to citizens for one necessity or another. The role of Finance is therefore to make available to all the national medium of exchange and to

ensure equity and equal access in transactions-operations between individuals and Communities of Life and the State.

A currency having no intrinsic value, no institution, was it State-owned, has the right to issuance of same to lend amounts to be repaid with or without interest. And this whatever the economic arguments that can be put forward.

Since the State is empowered to issue as much as amount of money needed for its operating budget, including for the payment of government worker-servants and worker-contributors of public corporations and industry, there is no taxation or selling off of underground natural resources for foreign exchange earnings for the National Bank to build up foreign exchange reserves, nor the risk of inflation-deflation-depression.

Funding is therefore a Divine Right made available to all Communities of Life or conurbations of Communities of Life by the granting of funds or national resources according to the actual needs expressed. This is rather an inalienable right that cannot be derogated from except if one chooses to remain in the Anti-Divine practices of the using of a majority by a minority. Consequently, there will be no question of borrowing money or being unable to finance legitimate projects. Everything being guaranteed at all levels, it will be enough to pool the workforce for the Community and the Nation.

All the global production being provided by the Communities throughout the national territory in a self-sufficient contributionism, each contributor will have everything he needs for a dignified and fulfilling life. Gaps or other extras will be filled by the system of barter between the Communities of Life.

The banking-financial system therefore plays a key role in the success of the rapid anchoring of the Autarchic Troceconomy. The scriptural monetary system and secure cheque-note Ki/Kilia is the ideal.

External Exchanges

As aforementioned, the maliciously orchestrated interdependency of the economies of this planet is a major mutual risk of instability, precariousness in the sense that a 'little sneeze' is enough somewhere along the economic chain for the rest to be contaminated. And a small Elite group holds the reins and systematically manages its economic maneuvers to serve its purposes.

Economies, such as those developing or are confined in an economic mold of "periphery" exploitable at will on the Ka-AkhnAtonite Continent, where everything is built on export of products derived from cash crops and others, are intended for ruin

either with the exhaustion of resources, or victims of an economic war on the part of structures representing these obscure interests, from the moment when a quest for fulfillment is set in motion. Cases are abundant on the continent throughout history that there is no need to enumerate.

As a result, foreign trade must be reduced to the strict minimum in the interval of the transition from the current to the new Autarchic Troceconomy. It must rely solely on the barter/exchange system through bilateral bargainings with our raw materials as products to be exchanged for real needs available with the other party. In the event of impossibility, the financial mechanism of the current monetary system would be used by resorting to the services of the UNOITC (we will talk about it later), the one institution with authority to deal with the Nations of this World in finance and investment, in lieu of the IMF, the World Bank and other clubs of Paris, of Rome etc., completely illegal and criminal.

An economy well built on good new foundations, on the principle of Volitional Systemic Autarchy and all the prerequisites previously developed, will always stand despite external hazards, since its very strength comes from its strong independency vis-à-vis this outside world precisely.

And then there is a fact to consider. With the West owing so much to Nations exploited for so long, in terms of moral, financial reparations, we must use our reconquered new strong position to demand a U-turn toward balance through compensatory actions on their part. Our raw materials have been wasted so much, there is no logic in having to barter even more of our subsoils in exchange for what our Nations need from them eventually to get back on their feet. It is from my point of view that an embargo on the resources that their industries depend upon and badly need will break the padlock of the unworthy imperialist paternalism.

IF WE HAVE TO GO THAT ROUTE, SO WILL IT BE.

The United Nations Office of International Treasury Control

Access to external investments and credits, if any, during the initial phase of the Autarchic System, would only pass through UNOITC, which is a sovereign institution in charge for more than two decades of the Combined International Collateral Accounts of the Global Debt Facility. The management of this organism entrusted to the three countries of France, United Kingdom and United States by the United Nations in the wake of the Second World War by the Trilateral Trillenniuml Tripartite Gold Commission has proved disastrous.

(From 1944/5 - 1994/5 The Trilateral Trillennium Tripartite Gold Commission (TTTGC) was organised and implemented, by the Nations of the World, with a Term period of Fifty (50) years. During this term period the Commission held the Mandate, Rights and Authorities over The Combined International Collateral Accounts of the Global Debt Facility. (*Note: This Commission should not be confused with the Trilateral Commission that exists today*). Following the expiry of the 50 year term, the Nations of the World, disappointed with the biased way The Combined International Collateral Accounts had been utilised within the 50 years, agreed not to extend the term of the TTTGC, but instead appointed a single independent person to the position of International Treasury Controller with full rights, authority, and legal ownership of the Combined International Collateral Accounts).

This is therefore a Divine body whose political line is the opposite of the criminal methods of the IMF, World Bank..., which from the outset were founded as outlaw organizations in total opposition to the stated goals. It holds the real assets and properties of this world giving it the ability to play the true and right role, in lieu of the current criminal system, to bring about balance and equity in the world of banking and finance. All countries that freely and sovereignly request it, according to their statutes, are supported in the financing of all strategic and common interest projects by loans refundable in the short, medium and long term; loans that are converted into domestic debt and local currency regardless of the amount of investment. In addition, funds invested in principle will never be repatriated and will continue to benefit countries for generations. (Check out the U.N.O.I.T.C website: <http://www.unoitc.org/>, and you will see that everything is in place and functional). All that prevents this dynamic from setting in is the criminal network of Internationalist Bankers who maintain the grip on state men and institutions of our poor countries, in the North as in the South, relying on the puppets they always take care to put in power in almost all the countries of this Globe.

Therefore what is needed is nothing but to have in the leading roles of our States informed politicians that think outside the narrow and distorted paradigmatic mold of the evil Globalist Elite, and who take their courage and responsibility in the face of history to bring about the necessary change for the good of the world Peoples in their entirety.

The Labor

Wage-Earning & Taxation Slavery

Generalized governmental assistencialism, Welfare State, is the yoke under which we bent on this planet, mainly in the West. It is a gangrene resulting from the current scornful system used, together with monetary economy and Wage-earning, to manage and control Humanity in the interest of those who claim to "own" both our Humanity and the Planet.

A state of affairs doubled by an absoluteness of the State. It is on the basis of this supposed assistencialism that labor has been rendered a drudgery and an obligation in our so-called Human societies for the benefit of a handful of unbalanced power-mongers individuals. Labor, supposed to contribute to personal and collective well-being, has become a burden in this materialistic world to the extreme where God has become a misunderstood term, abusively pronounced at every turn in an almost exclusively egocentric perception.

And into this direction want or aspire to rush all so-called underdeveloped nations.

The wages of these workers are limited and arbitrarily capped while they are exploited excessively by the proponents of the system who pay themselves masses of banknotes as wages among other benefits, while it is these very workers who essentially do the required job in any given area of life. Working 5 or 6 days a week without respite, 8 to 10 hours a day, for a meager monthly salary and this for the most vitalizing part of his/her life while waiting for a hypothetical pension for the rest of his life in decline, is nothing but abject slavery. People do not even have the time to enjoy the fruits of their labor, let alone life in its first reality.

Moreover, this political assistencialism, which is not at all practiced in Ka-AkhnAton in particular, has produced a series of taxes to allegedly finance the operating budget of State, Region and Commune by a parasitic infantilizing system. These are simply to be categorized as abuses and crimes against citizens and must simply be expressly abolished from State practices. There are many examples of over-taxation of the poor citizens-cattle of the so-called Elite of our world.

Two cases are VAT (the Value Added Tax) and the PIT (Personal Income Tax). The logical reasons are that VAT, for example, which is supposed to impose the added value produced on a given product or service, rather illogically penalizes the poor consumer rather than taking it from the producer of the good. It is not normal that the citizen has to pay a tax for consumption, in other words to spend his own money moreover won by the sweat of his brow. As for the PIT, it imposes heavily and unjustly the wage of the citizen under the fallacious pretext of social security. As a wage is not an accrued profit, no excuse can justify this practice, given already the

weakness of the purchasing power and the harshness of the working conditions imposed on the masses.

In reality, VAT and PIT are a double scam in the sense that the income of the citizen is directly taxed, PIT, withholding on the one hand, and indirectly on the other via this so-called value-added tax. And we do not list all the others collected by municipalities, regions/provinces, road taxes, tolls etc. It is imperative that in a State that sees itself as a promoter and custodian of the prosperity and well-being of the people, these abominations disappear. Comfort and prosperity among the people would guarantee welfare and social justice and consequently less, if any, welfare government which is an authoritarian drift to begin with.

We are thus trampling Life and its Laws under our feet and this is disgraceful. This degrading stupidity considered as materialism has gone too far. This state of affairs ought to disappear if our ideal is to be higher, that is to say the realization of a Human Civilization in alignment with the Love Nature of the Creator God.

Labor Structuring

The Communities of Life must be responsible for financing and providing their own essential facilities and services, such as local roads and transportation, schools, health care, local police services, etc., rather than depending on a central authority that decides which resources to grant them for their own productivity and functioning. Currently, the centralized system diverts very important resources away from communities to the benefit of inexplicable and highly inefficient national bureaucracies, military activities, and so on. Corruption, mismanagement and poor distribution of resources create a sense of dependency within the Communities thus subjugated, as well as among the individuals making up these Communities.

Therefore, the road chosen for the structuring of labor within this Volitional Systemic Autarchy is projected differently and is presented as follows.

At the level of the Federal and States Administrations we will have:

- Worker-servants of Administrations.
- Worker-contributors of public corporations and industry.

Within each Community, we will have the following socio-professional associations:

- Community worker-servants of Administrations
- Worker-contributors of the Communities of Life

It is far more natural and far better to manifest a literally paradisiac reality on Terra through this Divine Popularism (NE DUKEKLĚ) materialized through this Volitional Autarchic Troceconomy. With this structuring the whole Nation, at the level of each Community of Life, is put to task and this in the respect of the abilities and the aspirations of each citizen. It is here that Communautarism and Individualism express themselves in balance and harmony according to the Universe.

The structuring of labor within the Community is the key to the success of this society where unemployment is a concept that does not exist.

At the four levels of Housing, Health, Agriculture and Education, the Communities must develop a consistent autonomy and involve all members in the productions and services required for their sustenance. This autonomy is coordinated and supported by the State under the control of the Federal.

The remodeling of the socio-economic system in an orientation of service to Life and fulfillment of the Divine creature that is the Human being is intended to allow such a thing. As the economy has been restructured to serve only national interests and depend solely on its own material and human resources, there is no reason why not all citizens should be involved, each in its community. Material sustenance is assured without the infantilizing, controlling, and degrading financial assistance of the State, as we see today in welfare States around the world, and far more sophisticated in the Western world, especially, with this STATE ABSOLUTENESS reducing citizens to slavery of WAGE-EARNING AND TAXATION AMONG OTHERS.

Having a civilization wherein beings are involved at all stages of production of goods and services with the same status is more rewarding and deserving. In other words, peoples will be living in an **Equal Interdependency**.

A time investment of four (4) hours per day for four (4) days out of the seven (7) days of a week may be retained and should be more than sufficient to ensure the material maintenance of each Community of Life. The other half of the time available is devoted to various leisure activities, to the family and especially to Culture of the Evolution of Soul, primary goal of the Incarnational Experience of the Spirit-Soul.

Of such a Community of Souls, it could be said that it is finally aligned with the primary purpose of its incarnation in lieu of this rat race **toward obscurantist and imbalanced materialism.**

The Form Of Corporations

In harmony with this new Civilizational paradigm based on the positive values of Life, it is clear that economic initiatives in this socio-political territories can only take a collective form. So we see only two main forms of corporation that come in communal and public forms.

We will therefore have corporations and industries operating under the operating system of Community Sector and Public Sector.

Within the Communities of Life, any corporation must exclusively operate as a branch of the whole, that is to say on the basis of community shareholding. There is no employer-employee relationship.

State corporations and industries, are under the regime of public property. All worker-contributors in the sector are associates or partners with the State in the management of public structures.

The public sector is the one that operates the major industries that will allow, with scientific research, a rapid realization of the goals of the Autarchic Troceconomy. It is of paramount importance that it is held and supported literally and predominantly by the Federal Administration

The Public Maintenance Service

Community works or services such as cleaning and maintenance of public streets and sanitary facilities, generally considered as degrading, are not reserved for any specific professional class. These are provided by all members of the Community organized for the task. At all levels of the Federation and the States Administration, this system must be in force, because it is the Divine Principle of equality of all things, Respect and Responsibility of each and everyone which is at stake.

The Energy

Currently the world uses energy production methods such as nuclear, hydroelectricity, thermal, oil, natural gas, etc., all polluting, heavy, dangerous and expensive for most users and the environment. These resources are collected by irresponsibly mining in the depths of Terra-Urantia and are exhaustible.

But it can be easily obvious to any normal mind that if one continues to frantically dig holes wherever one smells the presence of a metal or some so-called precious raw

material, we run a great risk of finding ourselves with giant holes everywhere. And these holes will undoubtedly end up burying us, since in the end all our habitable and cultivable lands will undergo same treatment as well. The pursuit of such a Satanic road can only lead prematurely to the ruin of our Humanity.

The Vision of an Enlightened Civilization is projected over hundreds of thousands, even millions of years; so, we must have and have every opportunity to make the conscious choice of a U-turn towards a lighted path of using of clean and inexhaustible energy.

Advanced scientific discoveries have been made making possible technologies for the production of this clean and less expensive, almost free, energy since the beginning of the 20th century, more than a hundred (100) years now. And recently we have applications of discoveries related to the Science of Plasma allowing wonderful things for the ease of Humans and respect for Nature. These would simply allow to design devices that would replace the technologies of shame and indignity that are thrown at our face and imposed by the incompetent invisible would-be Sovereigns of this world.

All these follies can be stopped overnight and must be stopped to the great relief of Mother Terra-Urantia. The impacts on lands, waters, environment and air we breathe will make a big difference to the quality of life of the residents of the globe.

A clean, simple electricity production aligned with the Laws of Nature that will bring us more than solar and wind turbine is what is absolutely recommended. Thus, means of transportation, factories, public and domestic lighting and other daily energy needs will be supplied with free electricity available for the use of every citizen on Terra without exception, without permanent cost and damaging consequences for Nature.

The Industry

There is already in this world for more than a century a High Science whose principles have been stated and implemented by exceptionally talented scientists. This Science is that which understands and operates according to Nature-Universe.

The science of this world in comparison has completely deviated from this path and wades into a mess created by humans who have never understood the Creator-Creation and its Laws. It is this Science finally understood and mastered that must and will be the foundation of the new industry on this road to Renaissance.

Technology being naturally daughter of Science, and this must be strictly observed and integrated into the Terrestrial perception of the thing, any technological invention will be the result of the understanding of this Natural Science and be aligned with it.

Nature-aligned scientific education will allow training of innovative researchers and discoverers of aligned technology that will be used by the General Industry.

The logic remaining in coherence, the industry thus brought to be based on this new Science, gift of the Father Creator to the new nascent Humanity through the Great Scientist W. Russell and partner Lao Russell and others following them, must do everything in a way that put focus on the sustainability of industrial creations, and on Human in general. The lure of gain at all costs by programming the rapid degradation of things that we are currently experiencing as a completely unbalanced global civilization must stop. This will dramatically reduce the production of various wastes. In the same vein, industrial production respecting the values of Light and Life must be diverted from evil productions that rather harm the Human body, Divine temple, instead of making it more alive and healthy in the long term.

In this perspective, we need to set up industrial structures aimed at transforming our raw materials, reasonably used, for the National consumer, and National only, and allow or help others, if necessary to do likewise and until the new Science allows us to do better. It will never be a matter of positioning oneself to invest and take whole sectors of foreign economies hostage. Knowledge must be shared in Brotherhood in alignment with the Giving-Regiving Law of the Rhythmic Balanced Interchange of Creation.

As the Creator gives us, we must give equally. When we receive from Him, no material price is demanded, so we have the duty of Regiving to the other Person or Community without any price and/or control requirement. Only in this way is a Balance maintained that allows the perpetuation and advancement of a Civilization-Humanity in the Light of Knowledge of its Creator. Because in this way the loop is complete and the Sacred Circle of Infinity becomes manifest in every aspect of all things only progressing toward and in more Divine Light.

This achievement lays the foundation for an emancipated Nation on the path of Sovereignty and Independence within the natural Interdependency of Terra-Urantia Ecosystem.

The industry must be operated by both the Community, the State and the Federation under a strict regulation that allows no deviation from the Divine and Subsequent Laws introduced in the Federal Constitution and those of the States.

In line with this realization and choice, we will have the ability to modify our urban infrastructures, among others, to a simpler and less cumbersome mode.

In terms of the water supply system we have the possibility to develop water collection devices from the energy of the vacuum of space. In so doing, the heavy polluting and polluted piped installations will disappear quickly in favor of a self-

sufficiency in water supply for all the individual dwellings and buildings of public service.

Ditto for electricity that is free, abundant and non-polluting leading to a complete and spectacular metamorphosis in this area. The transmission will be made by wireless technology directly captured in the atmosphere offering the same possibility of energy self-sufficiency as for water.

And this will be observed in all areas of National Life to the happiness of the Planetary Being as a Whole.

The Agrarian and Land Regime

One of the conditions underlying the realization of the NE DUKEKLĚ, is a deep land and subsequently agrarian reform. The planet belongs to all and has not been created by any particular person or group of individuals. It logically follows that there cannot and will be no question of a system of claiming ownership and sale on parcels of land by a first settled community, a family or an individual. The Peoples as a whole will retain only the title of custodians of the lands and the State will be the Great Custodian.

Without Earth (Planet) there is no Society or Human Civilization possible, since there must be a Planet somewhere in the Universe that could bear Life before one can imagine an evolution towards the creation of a civilization. It is therefore of utmost importance that we return first and foremost to the enlightened Ancestral approach of welcome and sharing with all in a fraternal understanding. Better still, It, the Terra, must become again the communal good of the occupying Peoples, for which it was destined at the beginning. In other words, the purchase and sale of land for any purpose should be formally banned as a practice and introduced into the State constitution. This concept of all commercial and all profit is therefore to be abandoned imperatively, and in this case with regard to Earth/Land, the very foundation of Physical Life.

This reform is what will allow the new economy a solid foundation and an easier operation. It is therefore essential for the desired Self-Centered Systemic Endogeneity.

The distribution to and management of land by the Peoples in the Communities of Life is one of the requirements for the success of this new enlightened politics.

The Transportation System

Sea Route and Airway

The option of sea transport as we currently use it primarily for trade, must and can be abandoned if we make the choice of depollution and respect for marine life, and, above all, Life simply. The consequences of dumping into the waters of all these toxic products by tankers and others are beyond our ability even to remedy. Ability that we do not even bother to develop.

Water and air being vital to Nature and its residents, our efforts must always be in the direction of their preservation.

What is clear is that we can, in the current state of technological discoveries, do without sea route and content ourselves with airways. And since the choice is oriented towards Self-Centered Troceconomy, our civilization will soon have less need of all these polluting modes of transport, which moreover is not efficient, since it is quite possible to reduce to a third or a quarter the duration of trips made by current means in use. The fact of the technological idiocy shoved down the throats of Human societies to the detriment of the Planetary Life as a whole cannot suffer from any challenge.

Railway and Road

The system of railway tracks for their part requires a lot of heavy facilities and the technologies used on this ground are very primitive when we know that we have the opportunity to do better and very quickly, the means being already present. Thus the abandonment of this means of transport is another proof of commitment to the respect of the environment, since the laying of thousands of kilometers of railroads, in parallel to dangerous and nasty electrical facilities, is another source of pollution and destruction of Nature.

As for transportation by road, it must be adapted to the new Civilizational paradigm of simplicity, ease and availability. New road infrastructures must exclusively use local and very natural materials. Asphalts must be set aside in view of the toxic condition of their nature since oil extraction itself must be brought to a halt rapidly.

The new means of transportation adopted must be propelled by an anti-gravitational electromagnetic system, free and clean energy, the discovery and availability of which are effective, but subject to censorship and monopolized by the Globalists pretenders who sit enthroned over our sick world. Using of this technology, as mentioned above, will allow us to reduce travel time from one point to another, and do so with greater ease.

Anti-gravitational platforms and vehicles have been in existence in this world for nearly a century developed by powers such as Russia, the United States, and well before them, the German Nazi regime during the Second World War. Their existence is known in unofficial circles, but officially hidden from us. So we just have to get our hands on this knowledge, make it available and in use for the public.

Consequently, constructions of works such as bridges to pass from one side to the other of a stream, a ravine, etc., roads to cross deserts or forests in order to join an inhabited territory on the other side, highway and highway interchange systems will become obsolete. It is clear that these so-called modern infrastructures, so valued by our civilization, are nothing more than a concrete jungle designed by a society that has moved away from the ways of Nature-God, in which things are done simply and durably in a vitalizing beauty.

Health Program

Health is undeniably the primary element of any economy. With a failing health, it is obvious that a society cannot be productive, and without productivity, sustenance and autonomy, endogenous or not, are impossible and at this stage we cannot even talk about economy anymore.

The health sector will therefore have to undergo a restructuring taking into account the goals set by and for the Troceconomy. In a quick first step, the remodeled infrastructures will essentially be based on ancestral national know-how. And this will be done by combining the most valid part of modern medicine as currently practiced. In so doing, our Nations will drastically reduce their dependency on the West and its poison-drugs, which in any case do not cure Man; quite the opposite.

Subsequently, our ways will have to rapidly evolve towards the mastery of Holistic Healing and the advanced and very simple of use technologies relating to plasma and electromagnetism. Electromagnetism for the rebalancing and reprogramming of the light body surrounding the physical body allowing to get rid of any viral, microbial presence and other accumulations of elements preventing its proper functioning.

But in the end, it is healing through and with the Spirit, Divine gift to every human being, which must be taught, mastered and practiced systematically, individually and collectively.
