*PROPHECIES ARE THAT WHICH HAS BEEN AND REPEATED;
THE "FUTURE" IS FOR "CREATING" THAT WHICH WILL BE.*

As you come to recognize the script and the players within the PLAY and PLAN you will see that naught is but a rerun of that which was wrong and never corrected--repeating of that which should have been corrected. The "FUTURE", therefore, is an open slate for the creation of the script and play. It is the opportunity to utilize wisdom, knowledge and "knowing" that prophecies do not have to be repeated in error of action and perception. May GOD guide your thoughts -- for thoughts ARE CREATION!

*Aton Michael, Christ
Excerpt from Phoenix Journals*

All of history, as we now know it, has been revised, rewritten, twisted and tweaked by selfishly motivated men to achieve and maintain control over other men. When one can understand that everything is comprised of "energy" and that even physical matter is "coalesced" energy, and that all energy emanates from God's thought, one can accept the idea that the successful focusing of millions of minds on one expected happening will cause it to happen.

If the many prophecies made over thousands of years are accepted, these are the "end times" (the year 2000, the second millennium, specifically). That would put us in the "sorting" period and only a few short years from the finish line. God has said that in the end-times would come the WORD -- to the four corners of the world -- so that each could decide his/her own course toward, or away from, Divinity -- based upon TRUTH.

*Aton Michael, Christ
Excerpt from The Phoenix Journals*

This book is dedicated to Terra-Urantia and those who have chosen and will choose to bear the new Global Civilization of the Golden Age hereon this plane, which many call paradise on Terra without having a clear idea of what it might mean.

FOREWORD

The idea of bringing forth this treatise, which I chose to call the Blue Book of Terra-Urantia,¹ came to me after a long journey of research and experiment embracing all facets of the Human Civilization and a number of observations of the political, social, economic and cultural life on this Earth that have led to uplifting conclusions.

For me, it became clear that the society created by Man had totally lost all value and required a new orientation beyond all proposals of solutions that would seem logical for many, but all of which would lead to a certain dead end.

This is an initiating input to the matrix of a new system serving as a foundation for the builders of a new Terra-Urantia where everything is redefined according to the Nature and Universal Laws that preserve and sustain our Terra Abode, and all Life upon and within Her.

You will therefore see, throughout my development, a path that sometimes seems familiar, but for the most part confusing with the introduction of new concepts for a new Global Civilization.

IN THIS POLITICAL-CIVILIZATIONAL TREATY, KA-AKHENATON OR KA-AKHENE-ATON, WHICH MEANS THE LANDS WHERE ATON, THE CREATOR FATHER, IS PRAISED, IS THE NEW NAME GIVEN TO MOTHER AFRIKA

¹ Urantia, Terra Father-Mother

PRELUDE

If you do not know where you come from, know where you are headed. A very common saying often uttered in circumstances where things seem confused and uncertain in the life of an individual or a whole people. But this raises an important question that is:

IS IT REALLY POSSIBLE TO KNOW WHERE ONE IS HEADED FOR WITHOUT KNOWING WHERE ONE COMES FROM?

On the relevance of a clear and unambiguous answer to this questioning depends the effectiveness and efficiency of the solution to be conceived by 'enlightened minds' for the purpose of a worthwhile correction to set things to right in our Human societies wherever need be. And this need is everywhere on the surface of Terra-Urantia urgently felt. This applies to the individual as to the community, of course.

In the situation of Ka-AkhnAton² Peoples, long despoiled and cut off from their roots, as is the case for all peoples anyway, the problem is crucial or central to all the problematics we face at all levels of manifestation of Life on the material and philosophical-spiritual levels. A confused and lost mind (Spirit) cannot do a thing worthwhile in a body or of a body (Matter) as beautiful, adorable and perfect as it may be and vice versa. Go ask a skilled and talented musician to produce beautiful harmonies on a faulty instrument. This is simply impossible.

'Where one comes from' refers to the **PAST** whether of a person, a family, a people, or a race. And 'where one is headed for' refers to the **FUTURE** that is yet to be. The determination of this Future is made from this third segment of time which is the **PRESENT** (the Present Moment). This Present, therefore, holds a crucial importance in relation to the Future since it serves as a matrix for the creation of what will be and of the quality of the 'present moment' depends the **FUTURE** in the making. **Thus the Present is the Past of the Future and the same Present is the Future of the Past.**

On the basis of what has just been stated, we can say without a shadow of a doubt that the Past and the Future are in the Present since in the same way that this Present creates and impacts the Future, the Past created and continues to influence the Present. Our actions, thoughts, beliefs of the moment are, to a certain extent, not to say almost always with regard to the majority of the minds on the scale of evolution, determined by the experiences we have lived in the Past. And this inter-reaction, conditioned by our Past, with our present environment creates the pattern of happy or unhappy events to come. Now beyond these 3 spatiotemporal parameters, there is this individual and collective consciousness (the Divine Spirit) that is involved in the

² Ka-Akhene-Aton -- The Lands where Aton, The Father Creator, is praised; new name given to Mother Afrika in this political and civilizational treatise.

equation, using its Divine attributes as free will, sense of judgment and discernment among others, to make life evolve in one direction rather than the other.

But for this to happen as God-Nature intended, it still require the mind to function naturally without artificially erected obstacles to cause dysfunctions. This assumes that the Past is recognized as such in its entirety and integrity, without any falsifications or omissions, so that the individual and collective Conscious Mind of a People, Race, may know of it and bring it under control and proceed to "corrections" and "readjustments" certainly necessary to the release of certain pitfalls that would confront it in its evolutionary path.

The Ka-AkhnAtonites³ and Earth Races as a whole, do not fit into this scheme at all, far from it. And it seems to us that only the Indigo Race has let itself be pulled down that far. How with a Past as fuzzy, tortured as uncertain, with huge holes deliberately dug by men and women mostly from elsewhere, armed with the most criminal intents, can the children of the Mother Ka-AkhnAton properly master a Present which elude them completely for the most part? This Past which is of vital significance to understand this Present within which everything is happening.

The Indigo Race Peoples in particular, the Human Race in general, are to be compared to this traveler following a specific route who somewhere in the middle of his journey is being attacked by a band of thugs ill-intentioned at the forefront of technology Armament and Practice of Anti-Christ Evil Methods. He loses consciousness, enters a comatose state, and becomes almost completely amnesic, even schizophrenic in reality. Unable to say who he is, where he comes from and for where he is headed. To cure this great sick one, the Peoples of the Continent, we must hand him back his Past, and by that, **HIS FREEDOM, HIS TRUST, HIS SELF-ESTEEM AND HIS WISDOM.**

Cut the roots to a tree, and you can be sure that you have surely condemned it to perish, being now unable to be sustained by the life force of Mother Terra-Urantia. In this respect, humans do not differ from the other realms of life that populate Urantia and the other worlds of the Great Sidereal. The result produced by the relentlessness of a certain West on the societies of the Indigo People is not unique. Have it been the same with the People of the West that it would have produced the same devastating effect. Our cultures, our experiences, our history are our benchmarks to move forward in life, encouraging us to build ourselves better than before. When we see that all of this is reduced to a trickle and, what is more, has become a subtle cruel mechanism maintained for the perpetuation of this state of affairs, I let you easily note the degree of difficulty that our societies have to face.

³ Inhabitants of the Continent Ka-AkhnAton (Afrika)

It is therefore of utmost importance that all sons and daughters of Ka-AkhnAton, who nourish dreams of Freedom and Greatness for the Mother, face this enormous, demanding and exciting work of rediscovering **WHO WE ARE AND FROM WHERE WE COME**. A work of deconditioning and stripping of old truncated, falsified patterns implanted in our minds and which have the merit of plugging us into automatic mode to swallow and support all the stupidities orchestrated by **THE GLOBALIST ELITE** and relayed by his propaganda machine which the controlled media, among others, are. It has gone so far that we make ourselves defenders of our own **PERSECUTORS** without realizing it at the expense of the interests of our brothers and sisters. We Ka-AkhnAtonites must not only take a trip of exploring our **True Past** but also be ready to welcome with detachment everything it reveals to us in black and white. This will be our strength and our light for the road ahead.

It goes without saying that faster a **POWERFUL MINORITY** will emerge to constitute a central catalyst core by which and around which we will work toward a true and rapid mastering of our destiny, more quickly the number of "awakened" will reach the desired and necessary critical mass to recover, correct and perpetuate the attributes-achievements already garnered from our journey and those to come.

Thus, and only thus, can we be assured that sad, unproductive and unclear scenarios of restraining and sabotaging organizations in the image of those in which we wallow in indignity on the Continent, under the diktat of Exogenous forces will become ancient history and the Peoples of Ka-AkhnAton will walk head up high, fully aware of who they are, of their past recovered and knowing where they are headed for.

The enlightening road, which has just been exposed, will lead us, as a Civilization, to this Position or State of Higher Human Being where we see emerge a Terra carrying a **True Galactic Human Civilization** anchored in **Divine Wisdom**. This Highest Position of Divinity incarnated in the Perfection of the Father/Mother Supreme is achieved by the fulfillment of some criteria through the achievement of inspiring experiences in the individual and collective ability to recognize and live in harmony and within the Laws of Terra-Urantia which are those of **THE BALANCED RHYTHMIC INTERCHANGE OF CREATION**. It is desperately more than urgent that the Human species as a whole, for its very survival, and in this case its Ka-AkhnAtonite component, turns away from the downward spiral fueled by its social paradigm with all the imbalance, inconsistencies and contradictions that have already led us into a dead end. Our insistence to continue in the same direction would only be suicidal and pure masochism.

A total reconsideration is undoubtedly imperative and requires beyond courage, a high level of knowledge on the part of men and women of the type of pioneers who will

move forward on playground for most of the time never walked before, or at least not in recent memory of Man. This march will bring major rectifications to existing schemes or will imply new sets for a new scene where the economic, political, social, communal, philosophical etc., will play a new scenario of a WHOLE which is balanced and more in harmony with LIFE in service of which it is supposed to be in the first place.

IT IS UP TO US, THEREFORE, TO KNOW WHERE WE COME FROM, WHY WE ARE HERE ON THIS TERRA-URANTIA TO KNOW WHERE WE MUST HEAD FOR.

I

THE STATE OF THE WORLD

The norm in our current Human societies is individualism in competition at all costs and at all times. Whether at the level of relations between states, between communities or individuals, on the economic, political and social front, this dual pattern is omnipresent. In all areas of life we train and inculcate in our children this mode of functioning which calls for the existence of a first, a second etc.; strong and weak; rich and poor; useful and useless; smart people destined to become graduate intellectuals and fools directed to the so-called degrading manual and other trades.

In this dynamics of competition there is a pre-established dual antagonist of winner-loser and this in a perspective of permanent rivalry nourished by a devastating individualism, the desire to appear, of recognition at all costs. Now it is quite clear that without a first there cannot be a second; that without a strong there can be a weak and so on. It always goes in pairs, one being the counterpart of the other.

We are busy and encouraged to struggle like poor beasts to get rid of our miserable living conditions by only intellectual and material means whereas solely with our powerful fully functional Inner Divine Spirit can we create, act and manifest/modify the material reality that we desire or do not desire or anymore. Large and small churches are put to task, more than anything else, to feed the Peoples of drugs or spiritual garbage, fear, and all kinds of wrong attitudes and beliefs that keep them in the illusion of separation from the Divine Being that they really are, and consequently, in utter helplessness. The so-called traditional spiritual practices are at the heart of the evil as well, confirming the fact that the problem has its source well within the consciousness and not the other way around.

The way in which popular political struggles are conducted and managed almost everywhere in Ka-AkhnAton, with the involvement of the religious institution, which after all embodies the conspiracy and perpetuation of Evil, in the representation of the three so-called great monotheistic religions, Christianity, Islam and Judaism, which ended up assimilating and taking control of all the others, is indicative of the despair and disarray of the Peoples held hostage by their leaders who have become puppets in the hands of the most evil operating through a supranational pyramidal structure.

Therefore, our world is certainly not governed by so-called democratic regimes on the one hand and autocratic ones on the other and certainly not by the official and

unofficial puppets that are constantly agitated before our eyes. Neither in the North, nor in the South, nor in Developed Countries, nor in so-called Developing Countries. We are governed by an Underground Global Dictatorship -- the Holders of Globalism -- who, cautiously, through multinationals, organized Anti-Divine Religions, banking system, among others, proceeds by successive scale towards a visible and accepted final structure and/or imposed on all of us, at least on the sleeping majority. The remaining minority, rebellious and unbowed, being purely and simply destined to be returned to barbarous slavery or outright taken out.

The critical times humanity is currently experiencing are those of a long decadent world, gradually over millennia, prey to a merciless struggle between Darkness and Light and dispossessed of its creating power through the progressive degradation of collective consciousness and a number of conditions favorable to the Dark Brotherhood acting through the embodied entities that we are.

This is a world that must rise again by claiming its Divine Attributes with the help of CREATOR FATHER/MOTHER and CELESTIAL HOSTS.

But as we know, erecting the New if the old one has not been demolished before is impossible, since this New must take foundation on the ashes of the old. The only way to save the world and preserve the Human species is to save ourselves by freeing ourselves from the yoke of ignorance and obscurantism upon which the old one stands. By stopping pretending.

KNOW THE TRUTH AND IT WILL SET YOU FREE. AND YOU WILL DEFINITELY KNOW THYSELF.

A Mother is never ever really happy when her offspring are in total loss. All the alarm bells and suffering that Our Mother Terra-Urantia is sending us seem to fall only in the ears of a Humanity that has become insensitive and numb with the drugs and follies of the ego. The Peoples and the Races are therefore, and will always be, faced with the consequences of deeds, thoughts and words of imbalance and irresponsibility performed for thousands of years vis-à-vis themselves and the very Being who gives them board and lodging with so much love and for so long.

Wars erupting here and there, manufactured from the Headquarters of the Dark Forces, the stubbornness of the "White Elite" in maintaining at all costs the Peoples of Ka-AkhnAton, and of elsewhere as well, under their dominion and diktat, the geological and climatic upheavals that are becoming more and more intense, etc. all contribute to the need for an individual and global awareness for a radical awakening of dormant HUMANITY so that his homework too long neglected be ultimately assumed.

The reactions and interpretations observed in the face of destabilizing situations orchestrated among the Indigo AkhnAtonites give proof that we Human beings are malleable and subjugated at will on an overwhelming scale. It suffices to agitate before us pseudo-revolutions and prefabricated concepts and we buy them immediately without any questioning, but with such frenzy and a blindness that is beyond comprehension. And all that comes later through alternative sources more objective and serious to alert and enlighten the poor misinformed and manipulated people, is brush aside without any regard by those very ones who in a hurry swallow and make us swallow anything we are presented with. Yet the story of the last two millennia has been a succession of repetitions of the same attitudes having produced the same disastrous consequences for the many Human civilizations that have spread out upon the surface of Terra-Urantia.

In always sweeping under the rug by apathy and facility, we end up undoubtedly faced one good day with a tough mountain of garbage to clean. There we are.

And when we are aware that everything proceed from Energy and that it is SPIRIT that IS unlike MATTER (physical) that is only the projection of the first, we will agree that all approaches aiming at the resolution of any problematic of this material world must put the Spirit (and not the Religion) above the materialized (physical) or at least give true importance to the two levels of manifestation. This have not been the case in our civilizations for so long.

Pride; Spiritual and Intellectual Laziness; Selfishness; Sterile and Stupid Materialism; Fear; Lack of Vision and Self-Esteem; Apathy. The latters have finally emptied us of our powers of creators and masters of our lives that we are, leaving us, whole Peoples and Communities, at the mercy of unbalanced powerful manipulators with suicidal ambitions.

We are therefore led to go beyond the stage of dualistic perception of Life if our will is to found or re-found a **Civilization of Freedom and Equality in a permanent Balance.**

2

THE UNDERLYING GLOBAL SYSTEM

We must know our enemy or we cannot "change" one thing in our "reality" because our "perceptions" are INCORRECT!

Ka-AkhnAtonites must never lose sight of this big mess of planetary scale, which is an opposition to the natural order of things and a rebellion against the Human, the crippling and redhibitory⁴ nature of the mechanism that the Occult Internationalist Organization, the masters of the fool's game of the Darkness, has put in place in the form of a 'natural' reality that originates from that dark underside of the imperfect beings that we are. This is not true; if it were only the 'Natural' nature of the Human, it is clear that we would never have gone that far. On the contrary, the means operated are more artificial and involve forms of life and exceptionally distorted actions. Cloned duplicates, look-alikes, men and women controlled by electronic chips and other devices implanted in their nervous systems connected to powerful computers operating via satellites, are in use away from public knowledge.

There is an insidious and disloyal war that threatens the very existence of civilizations and certain races, including ours, through an absolute and complete takeover of all Nations on Terra, a forced march towards a standardization of lifestyles and visions leading to a Satanized and slave society according to the views of a handful of individuals rebellious to the Divine Order.

There is no way of compromise with the legal and personified Evil on this Terra-Urantia. We are on the way to being purely and simply miserably exterminated from the surface of this orb without having learned anything.

Basically, the values that the Global System claims to embody from the Political, Economic-Financial, Social, Religious/Occult standpoints, etc., are just bill of goods sold us by our enemy who led and is still leading us on a primrose path.

An artificial seeming conflict is maintained in a limiting mould through a cynical GAME of 'Thesis-Antithesis-Synthesis' on which everything was constructed from the onset. The Thesis-Antithesis-Synthesis triadic concept is an association of

⁴ Redhibitory : Essential flaw, capable of being an absolute impediment. Which constitutes a radical obstacle to an action.

concepts whose modern use is widespread and at the heart of the Globalists' methods of mass manipulation to cause them to swallow the bitter pills of their evil agenda.

The HEGELIAN concept represents the process of transforming in two stages a non-existent problem created from scratch towards the realization of a desired and prefabricated solution:

By applying the Hegelian Principle and the irresistible financial influence, the hidden psychotics seek to dismantle the social and political structures by which free humans govern themselves.

Their goal is to emasculate sovereign States, to merge nations under the One World Government, to centralize economic powers and to control the peoples and resources of the world.

Here's how it works:

The Thesis consists in creating the problem.

The Antithesis is the generation of opposition to the created problem (fear, panic, hysteria), the expected and fostered reaction.

The Synthesis aims to offer the predetermined solution to the problem created in the first stage for the adoption of the populace -- a change that would have been impossible to impose on the Peoples without the appropriate psychological conditioning achieved in stages one and two.

There is therefore a manipulated orientation of public opinion to make it claim and demand a solution already known and preconceived by the invisible leaders of this world.

On the Political level, if you look closely, you will see, certainly with clarity, that the divisions and colors put forward are just lures. The seizure of power by one party or the other in endless votes does not prevent and has never prevented living conditions from deteriorating in every respect -- working more to earn more; or working more to earn less in the hope of keeping a tenuous job at any rate.

It is very clear that Socialism and Liberalism, even in their actual limited conception, cannot exclude each other. It's as if we say that Individualism and Communitarianism are not compatible. Both enter in the same equation for Balance and Harmony, Equality and Diversity, Freedom and Solidarity. The underside of the cards is thus otherwise thought for purposes of world domination other than what is officially proclaimed and publicly taught.

On the Economic-Financial level, we have a monetary system and an economy oriented Systemic Scam, Crime and Predation. The banking-monetary system operates on the basis of the system of fractional reserves which designates the right for a commercial bank to lend, by book entries, money which it does not have and on which, besides repayment by the debtor, it will earn interest. This right is granted by the criminal Private Central Bank which creates money from thin air.

Currencies are pledged on wind and two sources of counterfeit money are Central Banks and commercial banks through the system of fractional reserves. And the Federal Reserve System, issuing the Dollar, is a Private Bank that serves as the Central Bank of the Central Banks of the World. The whole system is private and criminal. So a gang of organized thugs arranged to have monopoly of making useless printed paper that we have or have been forced to adopt as currency. The prerogatives of our states, which otherwise are beyond the control of its true holders, are handed over in the hands of individuals who have finally taken the Peoples and their future hostage. All of this is leading us to an exclusively economic Globalization under a World Government where the Humanity of the planet will find itself in a scheme of enslavement by the Slave Masters of the Elite few.

On the Occult-Religious level, we have a pyramidal structure with several branches. The latter, at the summit of which sits the Council of 13, controls all the occult and religious organizations including the Vatican. Directly under the 13 we have the Council of 33 where are represented the Freemasons of the highest ranks in the world of Politics, Economy, Army and Church. They are the Elite of the Committee of 500, the Bilderberg Group, which constitutes The World Government. It represents the global banking system as a whole. All banks are connected to the Council of 13.

So we have an occult organization that owns and controls the Global Private Banking System under the umbrella of the US Federal Reserve Bank. This system makes it possible to bribe and subdue the World policies if not through voluntary cooperation. Through Multinationals created and supported by the Internationalist Central Bankers, national economies are seized and altered to be merged into a Global Interdependency Regime hidden under the label of New World Order or Globalization.

This Interdependency is not something that occurs naturally through the evolution of Free Trade as economic theories claim. It is an orchestration of the Evil Elite that has been going on for at least centuries. It is a strategy.

Here is an edifying excerpt that explains a very important part of the situation.

THE STATE IS ABSOLUTE

Get across to the Peoples what is really an elementary observation is probably the most difficult task in this work. The OBJECTIVE of the Secret Cercle (The Order) that rules this world is neither "left" nor "right". "Left" and "Right" are artificial devices to bring about changes, and the extremes of political Left and political Right are vital elements in the process of controlled change.

The answer to this seeming political puzzle lies in *Hegelianism*. In reality, Marx and Hitler, the extremes of the "Left" and the "Right", which the textbooks present as enemies, have evolved on the same philosophical system: Hegelianism. That brings screams of intellectual anguish from some Partisans, but is well known to any student of political systems.

The dialectical process⁵ did NOT ORIGINATE WITH *MARX* as Marxists claim, but with *Fichte and Hegel* in the late 18th and early 19th Century Germany. In the dialectical process a clash of opposites brings about a synthesis. For example, a clash of political right and political left brings about another political system, a synthesis of the two, neither left nor right. *This conflict of opposites is essential to bring about change*. Today this process can be identified in the literature of the Trilateral Commission where "change" is promoted and "conflict management" is termed the means to bring about this change.

In the Hegelian system conflict is essential. Furthermore, *for Hegel and systems based on Hegel, the STATE IS ABSOLUTE*. The State requires complete obedience from the individual citizen. *An individual does not exist for himself in these so called organic systems but only to perform a role in the operation of the State. There was no freedom in Hitler's Germany, there was not freedom for the individual under Marxism, neither will there be in the NEW WORLD ORDER.*

In brief, the State is supreme and conflict is used to bring about the ideal society. *Individuals find freedom in obedience to the rulers.*

So who or what is the State? OBVIOUSLY IT'S A SELF APPOINTED ELITE. It is interesting that Fichte, who developed these ideas before Hegel, was a Freemason, almost certainly Illuminati,⁶ and certainly was promoted by the Illuminati.

⁵ Dialectic Process: Reasoning in which question-answer approach (dialectic) is used to examine the correctness, legitimacy, or validity of an assumption, idea, opinion, etc.

⁶ The Illuminati is a secret organization that has infiltrated and controls Freemasonry. It is an Elite in the elite. It is the most secret of the organizations of those who claim to be "Masters of the World".

Furthermore, the *Illuminati* principle that the "end justifies the means", a principle that *Quigley*⁷ scores as immoral and used by The Order, is rooted in Hegel.

When its cofounder, William Russell, was in Germany in 1831-32, there was no way he could have avoided *Hegelian theory and discussion*. It was the talk of the campus. *It swept intellectual Germany like a Pac Man craze. Its assumptions are completely at variance with our sense of individual freedom and Constitutional guarantees. Most of us believe THE STATE exists to serve the individual, not vice versa.*

The Order believes the opposite to most of us. This is crucial to understanding what they are about. So any discussion between left and right, while essential to promote change, is never allowed to develop into a discussion along the lines of Jeffersonian "Republic" "democracy" i.e., the best government is the least government. *The discussion and the funding is always towards more STATE power, use of state power and away from individual rights.* So it does not matter from the viewpoint of The Order whether it is termed Left, Right, Democratic, Republican, Secular or Religious -- so long as the discussion is kept within the framework of the STATE and the POWER OF THE STATE.

This is the common feature between the seemingly dissimilar positions taken by members -- *they have a higher common objective in which clash of ideas is essential.* So long as rights of the individual are not introduced into the discussion the clash of ideas generates the conflict necessary for change.

As the objective is global control, emphasis is placed on global thinking, i.e. internationalism. *This is done through World Organizations and World Law.*

Aton Michael, Christ,
Excerpt from Phoenix Journals

The above statement puts things very plain. It is therefore only pure stupid outmaneuverings inspired and used by EVIL to maintain control over our Humanity. We, therefore, have to take our Peoples out of this Satanic March of the World. Our Policies and Economies need to be rethought as part of a New Civilization based on positive Values in Service to LIFE.

Only high ideas derived from the convictions of enlightened men and women, led to the conduct of the affairs of any AkhnAtonite state, and supported by at least a strong, well-organized and structured fringe of the People, will make a difference.

⁷ Carroll Quigley (1910 – 1977) was an American historian and theorist of the evolution of civilizations. He is noted for his teaching work as a professor at Georgetown University and for his academic publications.

OVERVIEW OF THE ACTUAL GENERAL POLITICAL SYSTEM

1. Of The Political Parties

A structure referred to as a political party, defined as an association of people who share the same interests, goals and opinions for the purpose of conquest and exercising of political power, has become essentially the only possible route of eventual access to the governing of our states. Yet its emergence dating back to barely two (2) centuries represents the beginning of the most sophisticatedly darkened period relatively to the history of Mankind on the surface of this Orb. Human civilization has functioned relatively better otherwise. This structure is therefore very reductive and maintains much more the risk of phagocytosis and control by organized dark forces, from within and without, pursuing veiled purposes as we have been experiencing these last centuries in this world that has become unbearable.

It is clear that what we have instituted as a political party, which is funded at the expense of the taxpayer, on one side, and used mostly by evil foreign Globalist organizations, acts rather as a consciousness inhibitor, a subverter-perverter and misleader of the political march of societies towards a well-being and a global fulfillment. By this positioning to the right, left or center or etc., whatever, the dice are already piped from the onset, imposing a narrow and fragmented vision of the reality of things of life. Add to all this the dualistic postures of the ruling party versus the opposing parties with all the preconceived and pre-established that we know and are constantly witnessing, and we soon see the limits and dangers of this kind of practice.

It is out of the confrontation of authentic ideas emanating from free and empowered individuals, that light springs, in other words, the best approaches to solutions. And thought (idea) is dynamic and evolutionary. This is not often allowed, not to say at all, by the rigid concept of pre-positioned and pre-oriented political party. Since in most cases, the political programs and promises that are put forth by either the parties that do not yet exercise power or those who are in chair, are only pure bait intended to seduce the often ignorant and credulous peoples. It must be said that in their defense, they generally do not have the means to be better informed, any more than our careerists of politicians face with the extent of the real issues.

More than the pre-elaborated programs in the 'political' laboratories to which the People does not understand much, it is the vital needs of the latter that are of primary importance. And these are not only material, they are above all also spiritual. And this should be left to the direct management of this People who knows better than all the political and economic "experts" that the current system produces in mass, and whose existence depends on the maintenance of the peoples in question in this contemptuous infantilizing state.

All this brings us to the acknowledgement of the uselessness, even the harmfulness, of this structure called political party through which the political life of a whole People would be directed and organized, moreover confiscated.

Conclusion, this system is to be dismissed urgently.

2. Of The Commonly Practiced Regimes

2.1 Of The Semi-Presidential Regime

The semi-presidential regime is one of the most aberrant that has been instituted. An ambiguous bicephalous system that serves as a cover for all the machinations and games of deception of politics vis-à-vis the citizens. In this context, a President receives a direct mandate from the voters to represent the state with full power, subcontracts through a Prime Minister who enforces his policy but finds himself alone with the government to endorse all the responsibilities in the events of a glitch. Under this regime, in particular, the Head of State can afford 'ERRORS' without any immediate threat by hiding behind his Prime Minister.

If the People are to elect directly, by universal suffrage as they say, a legitimate ruler with full authority, then it is preferable that he be directly RESPONSIBLE and IN COMMANDS of governmental action.

2.2 Of The Parliamentary Regime

This regime has the advantage of clearly identifying the responsibilities for the exercise of political power: the executive and the legislative. Citizens theoretically have control through their elected representatives in Parliament. But here again, these citizens are the object of ongoing deception, tricks and political-mafia compromises, due to the mediocrity and egocentricity of politicians supposed to represent them.

The system is so locked down that they have only recourse to periodic elections to try to put other men and women in place who would represent them better. And as it becomes more and more obvious, vote and even alternation are revealed as a decoy to trample on and make a fool of the People while hidden agendas are set in motion. The authentic and true representativity of the latter cannot be ensured by this type of system.

2.3 Of The Presidential Regime

Here, the separation of powers is clearly organized, and this very strictly, that is to say that the various powers do not have means of pressure to influence others. Theoretically.

There is no political responsibility of the executive to the legislature, that is, the government cannot be overthrown by Parliament. And the same for the executive power which cannot dissolve Parliament.

The two powers, the executive and the legislative, are of equal legitimacy. So there is, at least here, a greater balance and relative clarity in the power play. But the problem remains at the level of the lack of direct control of the citizen on the mechanisms of the political apparatus that would allow it to intervene when necessary to remedy a deviation minutely conspired by some greedy and disturbed minds that do not lack unfortunately in any of our societies on Earth.

All these regimes commonly practiced on Terra have undeniably failed in their proclaimed goals forcing the need to take a new path.

3

THE ALTERNATIVE :

Recognizing The Oneness Of ALL, Serving Only Life

Herein I am submitting to you a telepathic communication very edifying for the subject addressed in this chapter.

Quote:

This World, That You inhabit within and upon and Surrounding, this World is being given an Extraordinary, Unique et Singular Gift of many and multitudinous and varied Gifts SPIRITUALLY, MENTALLY, EMOTIONALLY, and PHYSICALLY, from CREATION, from CREATOR, from PARADISE TRINITY, from CHRIST MICHAEL ATON, and from MYSELF and from Others In This UNIVERSE, This SUPERUNIVERSE, This REALM OF BEING and DOING, from all Dimensions, from THE CENTRAL UNIVERSE, from THE PARADISE ISLE INFINITE AND ETERNAL LIFE, LIGHT, LOVE abundant supply.

But know this. Ye who have been raised to perceive only separation and can only see and understand and understand and comprehend that which separates the near infinite SUBSETS of Existence and Being shall find yourselves further separated.....

For what comes is the Foundation of UNITY.

Unity of Thought; Unity of Feeling;

MIND AND HEART AS ONE IN GOD AND WITH EACH OTHER YE ARE ALL SOVEREIGN CITIZENS OF CREATION.

SOVEREIGN CITIZENS OF THIS SUPERUNIVERSE OF ORVONTON;⁸

SOVEREIGN CITIZENS OF THIS UNIVERSE OF NEBADON;

SOVEREIGN CITIZENS OF THIS SYSTEM OF SATANIA;

⁸ For your information our solar system is part of a local system called SATANIA which itself is part of a Local Universe, our Universe of belonging, named NÉBADON. ORVONTON is the Super-Universe that encompasses everything and there are 7 Super-Universes. See The Urantia Book.

SOVEREIGN CITIZENS OF WHAT YOU CALL YOUR SOLAR SYSTEM;

SOVEREIGN CITIZENS OF THIS, YOUR PLANET, URANTIA, EARTH, EARTH SHAN GAIA.

Soon your differences will fade away and melt and be cast to the wayside.

YOUR RACIAL DIFFERENCES

YOUR GENDER DIFFERENCES

YOUR POLITICAL DIFFERENCES

YOUR RELIGIOUS DIFFERENCES

AND THE THOUSANDS OF MINUTE DIFFERENCES THAT YOU USE TO DETERMINE
YOUR ENSUING AND MANIPULATED AND ENCOURAGED PREJUDICES OF THE DAY;

YOUR NATIONAL DIFFERENCES

YOUR LANGUAGE DIFFERENCES

YOUR REGIONAL DIFFERENCES

YOUR CULTURE DIFFERENCES

YOUR ECONOMIC DIFFERENCES

YOUR INTELLECTUAL DIFFERENCES

YOUR HEIGHT AND WEIGHT AND SIGHT AND SOUND DIFFERENCES

AND THE REMAINING HOST OF OTHER CATEGORIES THAT YOU HAVE BEEN GROWN
TO ACCEPT AND CONTRIBUTE TO AND PERPETUATE AMONG YOURSELVES;

ALL OF THAT SHALL FADE AND MELT AWAY AND BE CAST TO THE WAYSIDE ON THE
CONTINUING PATH OF YOUR LIVES TOGETHER BACK TO THAT FOUNDATIONAL
POINT OF YOUR ORIGIN GOD.

THE ONE, CREATOR, CREATION.....

*And you will understand it better by and by. But as that by and by is being experienced, you will give
up your opposition to each other; you will give up your COSMIC IGNORANCE and replace it with A*

COSMIC KNOWING OF THE UNITY OF ALL THINGS AS ONE IN AND WITH THAT...THING THAT YOU STRUGGLE TO RELATE TO AS GOD. NOT JUST YOUR GOD BUT GOD OF ALL EVERYWHERE IN CREATION. AND NOT JUST WHERE YOU ARE AND NOT JUST YOU, BUT ALL, ALL ONES, ALL THINGS EVERYWHERE.

Dabi Micael, Creator Son

End quote

As stated, quality produces quantities. Priority must be given to Quality and Quantities undeniably will ensue. Quality of Life, quality of Love. And here it is the perception of the Oneness of All in the Higher Consciousness of the ONE, the Creator of All Things, that makes and is Quality. And from this Quality flows Real Abundance without perversion.

The point to be taken into account in the light of the aforementioned is the need for the recognition of this Oneness in the acts of a Brotherhood of Men and Women bearing a degree of light, both by their high level of consciousness and integrity and their mastering of the political reality of this world, to serve as anchors of Light on the territories of their very residence or in connection in Spirit and Heart wherever they happen to be in order to counterbalance the dark energies nourished and sustained by Dark ones in the collective consciousness of the Peoples. The energies of Light must take place, be rooted and supplant the manifestations of the Darkness.

This Is The Recognition of the Oneness of All.

This must be done with love in impartiality by meditative techniques intentionally in communion with the Father/Mother within each of us so that the Divine Plan can be fulfilled in perfection without Human interference often self-seeking, immature and therefore unbalanced.

And this enlightened Brotherhood will be a Lighthouse and a Stabilizing Core that will ensure that the Light always inspires the thoughts and actions of the leadership and individual. This will coordinate the march of things and have the merit of neutralizing the confusion and disunion insinuated subtly in minds by evil forces. We need a disconnection from the illusion fabricated and sustained by the official religions to which many of our brothers and sisters are subjected, as well as traditional religions/practices, the first of which are only more sophisticated versions.

Souls who feel or receive an inner call (Divinely authentic, very important) and are clearly aware of their life mission, must make the decision to go into active service by agreeing to be **at the right place at the right time, doing the right thing**. It is

important to listen to and follow one's heart in a total overcoming of fear, the mortal enemy N° 1, and to develop an absolute trust in the **Inner Divine Being**.

This Is Service To LIFE.

Before setting in place any political action whatsoever, it is a matter of ensuring that a good and solid spiritual foundation is instituted by and between those who are called to serve as pillars of what may be called the **Nourishing and Protective Matrix** of what we will call the **Great National Resurrectional Structure**. In this structure guardian of Cohesion, Unity and Stability, the Peoples will inevitably gather together. In this way, any moles, unconscious agents, and weak spirits can hardly infiltrate the structures, in any form whatsoever to sow disunity, confusion and treachery.

The monocephalous national liberation movement embodied in the person of a single 'charismatic' leader has shown its weakness and limitations in that it suffices to take out or put off the head to sow disarray amongst and often definitively demolish the entire structure. We must put an end to this. **The high structure merging politics (dense) and spiritual (subtle) will ensure that there is a strategy that aims not only for before, during and after, but also short, medium and long term of every aspect of the Global Thing.** It is this clever strategy, it must be confessed, that we face on the side of the Dark Brotherhood proven master in the art of manipulation and recapture.

4

NE DUKEKLĚ

Or

DIVINE POPULARISM In KA-AKHNATON on TERRA-URANTIA

'Be The Change You Want To See Manifested In Society'

As a result of the relevant analyses and observations of the international and continental socio-political scene, as mentioned in the previous chapters, an ideal political system at the foundation of a Balanced and Harmonic⁹ Civilization has emerged in my Mind. And it is one who must respect the criteria as formulated below.

We must make room for the Free and Direct Expression of the Citizen by taking care to choose a form of the State such that anarchy and disunion do not take over at the expense of the very assigned goals of the institution of the said structure. And for probative results, the reconstruction of our territories must be rethought, taking into account the essential foundations that are:

1 -- Optimal Demography

2 -- Socio-Cultural Affinities

3 -- Systemic Autarchy

Demography. A greater functional Harmony of an improved Direct and Representative type regime requires an organization of the People into substantial medium sized communities. What is more, an excessive concentration of population in cities with monstrous demography leads to an imbalance at the political, socio-economic and human levels in relation to natural resources, to the quality of Life, to Nature. It is very important to take this into consideration.

Socio-Cultural Affinities: It is important that Peoples be grouped together on the basis of their socio-cultural affinities and in their integrality. Artificially induced separations under the pretext of anti-tribalist fighting are based solely on fear and

⁹ **Harmony** - Happy relationship between the parts of a whole, of a society, of Nature. State of relations between people or in a human group, which results from the agreement of thoughts, feelings, wills.

misunderstanding of the Human. Individually and collectively, the Peoples must be led to constitute themselves in factual cultural groups to which they identify themselves most at a given moment of their life path so as not to slow down their spiritual growth.

Systemic Autarchy: It consists of the adoption of a development strategy that puts the systemic culture of substantial self-centered autonomy within each Community at the forefront, as far as possible. The whole in a completeness and a federation through a national and/or federal policies. The strengths are thus pooled and the temporary gaps/weaknesses are handled appropriately.

In this dynamic, the inviolability of the so-called inherited frontiers of colonization is undeniably called into question. States must be rebuilt in the light of the millennial cultural prevailing. Never again should a frontier separate Peoples of the same culture and filiation. The new States are based on the new paradigm of Re-Evolution towards a Civilization of Light and Life. **And it is only from the prevailing accepted and understood that a society can validly progress in Harmonic Convergence towards this new Civilization.**

Therefore, the only pattern that can serve as a base for this High Divine Aspiration Civilization is Creation and Nature themselves, since in all wisdom it is impossible to know better than The Creator. Thus, it is clear that the Principles and Laws that govern Nature, our Nature, must be understood and mastered by the leaders and the Peoples themselves who, ultimately, are the receptacle receiving and maintaining this Consciousness of Life which determines the nature and values upon which is based the Civilization. All areas of life must be built on these Immutable Divine Principles-Laws if we are to go far as Humanity without repetitively falling; and this in order to establish a system by which the citizens of the various Territorial Communities of Life would be constituted in Popular Councils from which directly and more easily partake in the administration of their Communities and be involved at all levels in the conducting of state affairs and the decisions making concerning them. Social cohesion will be reborn and take hold.

We have chosen to designate this under the authentic name of **NE DUKEKLĚ** or **THE DIVINE POPULARISM**.

It will thus be necessary to well-pave the way to the emergence of a true consciousness of unity leading slowly to the birth of a true Nation Enlightened in the hearts and minds of the Peoples, and this instead of this unnatural debilitating retention in the self-denial-disdain rather imposed on the AkhnAtonites, especially. In Ka-AkhnAton, we are naturally led to begin with large Transnational Federal States remodeled to naturally as well move on towards National Federal States.

The objectives to be attained are **Liberation, Empowerment and Illumination** as the sole guardians of a Civilization in progress towards and into the High Consciousness. A society in which Peoples are united and in solidarity because they have made consciously this choice and not because they believe they have no control over their lives and futures.

OF THE POLITICAL ORGANIZATION OF THE STATE

1. Of The Direct and Representative Regime

As it is accepted by all that power belongs first and foremost to the People who may or may not decide to entrust it to representatives who will exercise it in their name, it must be clear enough in our minds that this People has the right and the obligation to ensure that it retains effective and efficient control over the mechanisms of representation and exercise of power in parallel with the mandates entrusted to the elected representatives and thus allowed spaces for direct intervention without recourse in the conducting of state affairs.

The Direct Regime calls for the wisdom and maturity of the People to assume their primary role as bearer and protector of everyday life, to identify and put their choice on the most enlightened individuals in light of their actions and daily experiences in the midst of their peers to represent it where it is necessary.

It is obvious that the current 'democratic' system, inherited from a civilization which is far from being the best birthed by this world, does not allow the political game and the interest of the People to merge in clarity in the service of goodness of the whole.

So, ideally, a Political Regime (System) that is both Direct and Representative seems the most likely to bring about a sustainable and sustained balance through a socio-political system that would be structured in such a way as to guarantee respect for the common and individual life and the interests of the citizens in all circumstances through an exceptional Constitution with safeguards for this purpose.

It is therefore of relevancy to operate a Territorial Political-Administrative Organization that takes into account the criteria that make practicable what we here refer to as **NE DUKEKLĚ** or the **Divine Popularist Political System**. The Direct Administration (almost equivalent to Direct Democracy), which is one of the components, is retained for the Federated States and the Federal State as well. This form of administration, a balanced mix of Direct and Representative is rather wise and

relevant. But everything must be redefined, reworked to suit the nature of the system that is here in projection.

The Administration and the Legislature of the States are directly chosen by the People, who are organized as a whole in the High Federated People's Council, according to the pattern defined in the chapter below devoted to the modus of operation of the institutions. This pattern is the same in terms of the choice of the Federation's Counselors-Representatives.

The legal age of majority for the voting right must be at least 21 years of age, in order to see the citizen reach a minimum of maturity before political empowerment.

2. Of The Territorial Space

In this area, it will be necessary to operate an authentic territorial reform. The federal system is the obvious choice with a federal state that is less invasive, yet coherent and efficient. Centralized unitarian states are too infantilizing and oppressive, as are the federal states wherein there is too much of State. The ultimate goal is to empower and involve the citizen in the affairs of his home Community and to leave a much more direct control in his hands.

This restructuring should take into account the cultural and sociological affinities of the Peoples. The current frontiers of our States will therefore, as already mentioned, give way to groupings and delimitations more respectful of the natural tendencies of the Peoples occupying the territories. The development of a sense of national affiliation cannot and should not be antinomic to the respect of ethnic, cultural and regional specificities and their highlighting. On the contrary, this is to be taken in the same way as the individualities that we all display and which constitute real wealth within a given group or Community of Life. It is Brotherhood, Balance and Harmony between the different components of the Nation that are to be sought and constantly sustained. And the only way towards a truly transcendental unity is through education and free accession.

3. Of The Constitution of the States of The Federation

We must redefine the borderlines of our States in the coming Federations, taking care to include within the same State all the cultural areas occupied by a homogeneous

people. And state entities thus constituted must imperatively be multicultural to promote the constant search for harmony and balance.

For the Western KA-AKHNATON with superficies of about 6,200,000 km² and about 400 ethnic groups, we have 16 States in borders defined by the colonial fact and a population of 300.000.000 inhabitants. These territories can be redrawn in 50 or more States according to pre-established criteria.

For the Central KA-AKHNATON, we have 6,640,600 km² occupied by 9 states and about 140,000,000 inhabitants. The same number of more or less 50 states within a United Federation would be appropriate.

In addition, we have all the other sub-regional groupings of Eastern, Southern and Northern KA-AKHNATON, which will have to follow the same Federal political pattern.

4. Of The Community of Life

The Community of Life referred to in this politico-civilizational treatise is projected as follows. It is the basic unit-cell of the political and philosophical organization of the society. It must be considered in the same way as the cell of a human body, independent within the system of cellular interdependence of the whole body. Around it is built the whole Civilizational System of the new Enlightened Nation.

Communities of Life are cities and at the same time constitute electoral communities. Their demography must be between 50,000 and 100,000 inhabitants. And big cities are limited to 1,500,000 citizens, no more. Within the latter, the constituencies are made for two (2) Representatives per 100,000 inhabitants. Similarly for the Communities of 100,000. Those who have fewer retain the same status.

Let us take the instance of the Western Sub-Region of Ka-AkhnAton. As for its concrete structuring, here is what could be projected. The overall population of this Sub-Region is approximately 300 million (2018). On the basis of 100,000 per Community of Life, we obtain the constitution of 3000 Electoral Communities of Life. For a population of 3,000,000 people within a state, we have the constitution of 30 Communities of Life of 100,000 inhabitants. For another 60,000,000 individuals, we obtain 600 of 100,000 inhabitants.

The Communities being represented by two (2) members, we obtain, for a population of 3 Millions, a representation of 60 Counselors-Representatives. For a population of 12 million, for example, we have 240.

The electorate includes all the inhabitants of the State, babies, young people and adults represented by citizens of voting age.

5. Of The Elective Mandates

The Federated and Federal Administrators and Counselors-Representatives do not receive a fixed term mandate. They can be replaced at any time for one reason or another, at the initiative of the electorate, since they are only faithful spokesmen of their Communities.

The mandate is imperative, that is to say that only a small margin of maneuver is recognized to the mandatory. He is designated by the electorate to perform precisely defined tasks, in this case faithfully represent his electorate, from which he cannot deviate under penalty of provoking his own dismissal. The chosen one is therefore only a simple executor of a sovereignty which exists only in the People who proceeded to its designation.

The duration of a position will therefore be boiled down to efficiency, equity and wisdom. In this case, it is possible for elected representatives to spend 50 years or more in their positions without controversy of any kind, since their maintenance depends on a renewed popular choice.

6. Of The High Federated People's Council or DUNYAJE

At the level of the Federated States, the practice is based on the Modus of Direct Administration, where all citizens of legal voting age constitute, as a whole, the Legislative Power. The People act directly as Legislator and Censor.

The People designates among themselves Representatives, all free from any partisan attachment, who will assume office in the team of Servants of the Federated Administration.

The Electoral Communities of Life formed designate two (2) Representatives to carry their votes and positions within the High Federated People's Council. Positions are

taken in community level debates as mentioned in the chapter on the political modus of operation later in the document.

7. Of The Federal High Council

The Modus of Direct Administration remains the system retained at the level of the Federal State. It should be tricameral, composed of a **High People's Council**, a **High National Council** and a **High Supreme Council**.

The Federal High Council, mandatory of the power of the Peoples, will have the traditional prerogatives of approval, control, voting of the laws etc...

7.1 The High People's Federal Council or DUNYAJE

Its members are directly elected by the Communities of Life (High People's Councils) of the Federated States under a single quota determined by the Federal Electoral Code. This House represents the whole of the Peoples in the natural demographic proportions.

On the basis of a total population of about 300 Million inhabitants, if we choose a quota of one (1) Counselor-Representative per Community of Life (100,000 inhabitants), we get 3000. Which is too much to manage, if not impossible unless the structure is otherwise organized. It can therefore be considered the choice of one (1) Popular Counselor-Representative for three (3) Communities of Life, which reduces the number to 1000.

The Counselors-Representatives can be dismissed at any time by referendum initiated by their electorates.

7.2 Of The Federal High National Council or DUSENAJE

The members of this Council are also directly elected by the High Federated Popular Councils through the electoral structure of the Communities of Life. At this level, all States get the same quota of representativity, regardless of the size of their demography. This Council acts as a second classic House, the **DUSENAJE** (Senate), which by its qualified majority exercises the power to approve or disapprove any decision taken at the level of the High People's Federal Council. The demographic

"imbalance" is counterbalanced at this stage where a restoration of balance is observed.

Thus a double majority is required for the passing of any act, that is to say the approval of the popular majority represented in the High People's Council and also that of a majority of the States of the Federation represented in the High National Council.

The HNC being the center of the balance of political forces, each State sends in the same number of Counselors-Representatives. Three (3) per State, making a total of 150 based on 50 states.

All the Communities of Life of each Federated State therefore proceed by the same modus of appointment described for the first House to elect the three (3) National Counselors-Representatives for the 2nd House.

Let us again consider the basis of a population of 3 million people within a state, made up of 30 Communities of Life of 100,000 inhabitants. Each Community designates one (1) candidate. The thirty (30) elected representatives thus meet to elect among themselves the three (3) National Counselors-Representatives of the State.

Now let's consider the doubling of the population taken previously, that is to say 6 Million individuals constituted in 60 Communities of Life. The vote of the latter designates 60 elected. The 60 elect 3 in their midst or split in 3 groups of 20 each to designate one (1) candidate.

In the case of a population of 12 Million individuals constituted in 120 Communities of Life, the vote of the latter designates 120 elected. The 120 split in 3 groups of 40 each to designate one (1) candidate. Etc...

National Counselors-Representatives can be dismissed at any time by referendum initiated by their electorates.

7.3 Federal Supreme High Council or FEDUKEKLĚ

The SHC is made up of great sages from the various socio-cultural, scientific and artistic communities, political veterans and former judges of the Federation from all the constituent States. Enlightened personalities who have singled out themselves by their services to the Peoples of the Federation.

Its members will be elected for life by a college constituted by the General Administrators of the States of the Federation and Prime Administrators of the Federal State, and the different Federated and Federal Institutions.

Its advisory role is of great importance and valuable counsel to the Executives in assisting them in the making of decisions in accordance with the law and in wisdom, on crucial issues affecting the unity and future of the Peoples which the Administrations would have to face.

It will help ensure that laws and various decisions be aligned with the Universal Laws entrenched in the Constitution at both the State and Federal levels.

It can be composed of 50 to 100 members and may hold a veto right as part of its functions as guardian of the integrity of the Universal Laws Constitutionally adopted.

OF THE ADMINISTRATION

1. Functions, Denominations And Attributions

Administration: Portion served at Table; what serves, which is in charge of serving.

A redefinition of the functions and denominations of the various positions of the Administration, namely ministries, secretariats and presidencies as conceived in these so-called modern times, as well as their interrelations is necessary. It is due to the perception of the very essence of the thing, the communal thing.

To do this, we rather choose to present them under the formulation of Administration in order to shed light on the primordial function of service to the People and Life. In this dynamics, emerges the following reformulation:

President: Prime Federal Administrator

Vice-President: Vice-Prime Federal Administrator

Minister: Federal Administrator

Deputy Minister: Deputy Federal Administrator

Administration Staff: Federal Servant-Service

Names of Administrations and Administrators in Ka-AkhnAtonite Language (Ewe, Western Ka-AkhnAton).

- Administration or DUDᵒFE
- Prime Federal Administrator or TADUDᵒNUNᵒLA
- Vice-Prime Federal Administrator or TADUDᵒNUNᵒLATE
- Federal Administrator or DUDᵒNUNᵒLA
- Deputy Federal Administrator or DUDᵒNUNᵒLATE

Attributions of the offices of the Federal Administration

- Prime Federal Administrator
- Vice-Prime Federal Administrator
- Administrator-Administration of Defense
- Administrator-Administration of Industry and Technology
- Administrator-Administration of Economy, Commerce, Finance and Natural Resources
- Administrator-Administration of Science and Philosophy
- Administrator-Administration of Justice
- Administrator-Administration of External Relations
- Administrator-Administration of Health, Agriculture and Demography

Attributions of the offices of the Federated Administration

- General Administrator
- Vice-General Administrator
- Administrator-Administration of Popular Defense and Police
- Administrator-Administration of Territory, Planning and Land
- Administrator-Administration of Habitat and Housing
- Administrator-Administration of Labor and Economy
- Administrator-Administration of Education, Human Development and Communication
- Administrator-Administration of Transportation and Energy

The Administrations of the Federate States, other than those defined in this Treatise, are free from determination by the latter except those which are the domain or exclusive prerogative of the Central Federal Administration. To lead the whole thing safely and with less turbulence, the Federation must have a firm hand on certain fields in order to avoid any deviation due to the weakness or freshness of a new structure of a type never explored before.

The exercise of the Administrations' action is collective and unitarian. Everything is undertaken, coordinated and done in cohesion and coherence in the service of the interests of the Peoples.

2. Of The Federal State Administration

Administrators are elected through a process that must be based solely on the reputation of integrity and wisdom. From the long experience we have gone through as Civilization, it is clear that to establish a lasting civilizational order, there is need for three golden ingredients: Equity, Wisdom and Discipline.

Discipline: Rule of conduct that one imposes on self, self-control, sense of duty.

Equity: The quality of attributing to everyone what is due to them by reference to the principles of natural justice; impartiality.

Wisdom: Higher ideal of life proposed by a high spiritual or philosophical teaching; the daily experience of this knowledge.

Candidates for positions of responsibility must be chosen solely on the basis of these ingredients on an individual basis.

Now the modus of appointment of the Administrators of the Federation is of vital importance in this Divine Popularism which we project in this treatise. How to proceed to elect or choose primarily on the basis of the three (3) golden ingredients beyond the popularity of the candidates is the central question here.

So the process could take form as follows.

1-/ The candidates are appointed at the level of each State of the Federation. Each Community that constitute the State presents a candidate or not for the office of Prime Federal Administrator.

2-/ Election (show of hands) within the Community organized in 100 electoral groups or districts of 1000 inhabitants. Each district elects a candidate.

3-/ The vote releases 100 elected representatives of the Community of Life who in their turn designate by vote one (1) Sage-Leader.

4-/ These Representatives of all Communities of Life meet together to choose one (1) Sage-Leader to represent the State.

5-/ The final election of the State Representative also takes place by show of hands.

Thus, for a State of 3 Million people, the 30 Communities designate thirty elected representatives who will make the final choice.

All these Sages-Leaders meet at the Federal Capital to proceed with the election by secret ballot of the two (2) Sages who will occupy the offices of Prime Federal Administrator, for the one who finishes first, and Vice-Prime Federal Administrator, for the second.

The Prime Federal Administrator then forms his Administration, which is subject to the approval of both Houses of the Federal High Council.

The General Administrators of the States and Prime Administrators the Federal State do not receive a fixed mandate and the number of mandate is not limited, since they are under a direct and permanent control of the Communities of Life through the Divine Populist System.

The age of eligibility can be set between 40 and 70 years or more, depending on the status of the candidate in question.

3. Of The Federate State Administration

The procedure observed at the level of the Federate Administrations is as follows.

1-/ Each Community of Life presents a candidate or not to the position of First Administrator.

2-/ Election (show of hands) within the Community organized in 100 electoral groups or districts of 1000 inhabitants. Each district elects a candidate.

3-/ The vote releases 100 elected representatives of the Community of Life who in their turn designate by secret ballot two (2) Sages-Leaders. The one who finishes first is the General Administrator of the State and the second is the Vice-General Administrator.

4. Of The Political Modus Operandi

Any proposal or project of the Administration is directly subject to the approval of the People through its Counselors-Representatives. Initiatives from the People and the

Communities follow the same path until a final decision at the level of the final layer of the Popularist Legislature. It is here that an intelligent and well-organized electoral structuring makes perfect sense.

The debates take place at the level of each Community of Life after communication of the projects by the Administration and the decisions made are confronted at the High Federated People's Council in order to determine if the popular opinion is or not in favor of the project of the Administration.

The following pattern is followed. 1000 groups of 100 discuss on issues and release a majority position; the 1000 Delegates meet in 10 groups of 100 and proceed in the same way to release a position that will carry 10 Delegates; and at the end the majority vote of the 10 is the decision of the 100,000 of the Community to be defended by their Representatives.

OF THE ADMINISTRATION OF JUSTICE

1. Justice Courts or SENYAFÉ

The Universal Law decrees that Man's primary obligation, regardless of which planet he happens to inhabit, is to develop his Divine Spirit.

I AM! I AM THE LAW, THE TRUTH, AND THE WORD. You need no burning bushes nor snakes into the staff--nor do you need blazing wheels in the cosmos. Hear Me clearly, children, for you who have been misled into the corners of darkness and into behaviors which have unbalanced your planet and soiled the places of perfection, shall hear Me, find Truth and turn unto that Truth in the days that follow, or you shall be separated into the places away from My presence. For as you have made your choices, and continue to act in ways against the laws as given unto your species to maintain balance and wholeness of soul direction, you shall continue in the places of the adversary which have pulled you down.

You have put reason and Godly thought to the side and entered into the places of darkness--claiming that you know not that which is Truth and living according to that which Man has made "legal", but that which remains "unlawful". Now you spread the shackles of the "voted-in ' legal" evil which have been thrust upon you in your "modern" world and have defiled ALL that remained sacred and wondrously gifted unto you.

Aton Michael, The Christ

We are faced with a clearly demonstrated fact that in this world things have been made deliberately complex and ineffectual to flout the Peoples in this so-called area of justice as the others. Human society only needs Divine truth and justice. Human legality must therefore be aligned with Universal Legality. It's as simple as that.

In the current legal system, the control of law enforcement is shared between courts and tribunals. The difference between a court and a tribunal residing in the fact that a court issues judgments and a tribunal rulings. In this new system, it will be otherwise since the structures must be constructed in simplicity and Laws restore to their simple expressions in the service only of the Truth to render or at least emulate Divine Justice.

The Tribunals and Courts will be merged and the denomination Courts will be retained for the bodies in charge of the respect and the application of the Law. The Judgments (instead of Judgments and Rulings) are therefore delivered by the Courts.

2. Of Judges, Lawyers and Juries

Only Judges have, in reality, value in a system called Divine Popularism. Truth and only truth, being the primary interest of the institution, it must be made sure that every citizen be subject to justice on the basis of the factual truth without costs or legal-bureaucratic tricks based on imbalance in favor of the most powerful and highest bidder, whose result is but injustice, suffering and impoverishment of the many. And this maintains and protects the great criminals of society, money having become the first value par excellence.

In this perspective, in a context of professional fabrication of evidence and false testimony, lawyers have no positive influence on the course of the trial manipulated by powerful hidden interests of which they are essentially tools. And the juries in the case depend solely on confrontational games having nothing to do with the search for the truth and the rendering of justice. Lawyers or juries are only there to impress, for fun and games. It is therefore abundantly clear that if only the truth is sought for a fair justice, the Judges alone and the Judicial Administration at the service of Life are enough to give credit where it's due.

So there is no need for all this juridical mess instituted on purpose in a Divine Popularist System. Justice is rendered in simplicity by the Servants of Divine Laws and Creation (Divine Right).

3. Of Divine Justice

Divine Justice based on an unalterable factual and non factual truth can and must be sought and instituted. The material and the intangible are often involved in harmful and unlawful occurrences that are reprehensible by Justice. But the justice of the Humans is essentially limited to the plane physical of the unfolding of facts and, what is more, without having the necessary and effective tools to establish the context of the events in their veracity.

In any case, a Divine Justice must take into consideration the actual knowledge of the Laws in the first place. The current claim on earth that "Ignorance of the law is no excuse" is an aberration that cannot be applied. One cannot judge validly on the basis of laws ignored by the citizen and which no one, certainly not the educational system, took charge to instill in him.

So, there needs knowledge of the laws through a careful civic education, and only afterwards a strict and correct enforcement can come into effect.

An undeniable tool and Divinely set up allows an enlightened mastery of all circumstances surrounding the unfolding of a fact. This tool is the reading of what is called the Akasha. The Akashic records, also called Akashic memory, are a kind of Cosmic memory, of etheric nature, which records in minute detail the unfolding of the life of the Planetary Being and each living being. It is the individual, planetary and universal recording memory of Creation. All that has happened at a given moment in existence, whether hidden or not, is found in intact and well established as to the real visible and invisible implications.

The reading of the Akasha-Ether by well-trained telepaths is the surest way at the disposal of a court composed of enlightened Judges to render a true Divine Justice without any doubt.

Arrangements should be made for a number of telepaths (Akasha readers) to be simultaneously put on each case to be judged. In this way the unfolding of the facts gathered in the Akasha will constitute the only real evidence of guilt or not of the defendant for the pronouncement of a fair judgment.

This is the recommended path for a Human Justice ever closer to the Divine One. And that's what Systems based on Divine Populism will strive to achieve.

OF THE CONSTITUTIONAL LAW

The Constitution of a Divine Popularist State must be fundamentally based on the Laws or Divine Principles which are those of Balance. Since our desire is to live in harmony with the Creation to know peace and fulfillment and above all a realization of the Souls' evolution, it is clear that the whole organization of our societies must be built around its Natural Laws which govern all CREATION. All laws governing the Nation must strictly respect and align with them.

Humanity has entered the wells of darkness and must return to life according to these GOD'S LAWS AS THEY WERE GIVEN FOR OUR HIGHEST GOOD. We were careless and thoughtless and trampled the Holy Word of the Creator under our feet. We will no longer do this in ignorance, the Basic Law and the Judiciary and Educational System will be constructed so that everyone acts in a responsible and enlightened way.

So, the following are the main 18 Laws-Principles of Creation, with some explanations, which must in one form or another be introduced into the Constitution as Mother of all other laws of the Nation. And no law should deviate from these Universal Laws. And no mechanism and/or legal and educational content can and should go against them.

The Laws of God and Creation Or The Laws of Balance of THE ONE

I. The Highest Command Of The LAW OF CREATION is:

Achieve the wisdom of knowledge inasmuch as this will enable you to wisely follow the Laws of The Creation.

This means to seek and demand the TRUTH be shown to us so that we must develop that ability to discern and judge all information, actions and behavior with self and others which go against the laws of balance given forth by GOD and The Creation. This also means that when information is put before our attention, we must ask the FATHER within us to show us whether or not it is true and ask for the Father to give us the verification we need for understanding the Truth in all information and situations which HE puts before us. THIS means we must have the courage and the determination to conquer the fear, apathy and ignorance within our altered ego to ACHIEVE THE WISDOM OF KNOWLEDGE OF TRUTH!

Universal Truth is everything we need to know to make it a foundation of our Life Vision, since knowledge on Terra-Urantia is fundamentally based on Lies and Half-Truths.

II. The Highest Commandment Of The Law Of God Is:

You will Honor God as the Ruler of the Human races and follow His Laws for He is the "King of Wisdom". And to do this, we need to know His Laws in their clarity.

1. You Shall Have No Other gods Than The Creator God Before You And Abide With The Laws of Creation which Encompass All. Also known as "THE LAW OF ONE".

This means we must recognize that our soul existence and our life on this plane is only possible by the wondrous grace of God, our Creator. We must recognize and honor HIS HOLY PRESENCE within us AND ALL THAT IS, because it is by HIS HOLY GRACE that we shall be able to receive His guidance and instructions for WHAT our service is to God and The Creation to maintain the glory of light and love and life in constant unfoldment of the glorious mystery of the ONE. In other words, WE will learn to understand and be always connected with the ONENESS of ALL THAT IS in Creation.

2. You Shall Not Make For Yourselves Idols And False Images To Worship As gods, For Therein You Give Power Into The Hands of Evil.

This means that there is NOTHING in material manifestation for us to worship as our GOD. There are no temples or churches, deities or crosses that need be the places or images to worship in or of. Nor are there any priests, ministers, rabbis OR ANY OTHER HUMAN who may act as representatives BETWEEN us and God. EACH and every one of us Human Beings carries with him the TEMPLE OF GOD WITHIN HIM! We are the temple. And so with this truth in mind we might ask ourselves, WHERE do WE take God in our life journey?

So we must not place the attainment and hoarding of "worldly" treasures above the attainment of our spiritual wisdom and perfection lest we "die" in the darkness of spiritual poverty. A good example of this false image of "worship" is quite prevalent now in our societies and that is THE WORSHIP OF GOLD (EVIL MATERIALISM). If we make the accumulation of gold (money) our first preoccupation for the sake of having more and better "things" and possessions, we are pushing God out of HIS temple and the Anti-Christ will become our constant bedfellow, urging us to consider ONLY our material desires, promising us greatness and importance ABOVE our brothers, so that eventually God within us becomes

but a glimmer of what was once the flame of our eternal GOD EMPOWERMENT within. And if WE allow our Altered Ego POSSESSION by the Anti-Christ to rule our being, the Anti-Christ will not stop until our flame of life is extinguished and our spirit is left ALONE and naked to stand before self and God in the agony of self-judgment of the transgressions against HIS HOLY PRESENCE.

3. You Shall Love The Lord God With All Your Heart, Soul And Being (You Must Love Thineself As God And God As Self).

This means that within the Christ Circle of Infinity, which is the Christ Consciousness of ONE, we must recognize the tremendous and Wondrous Love that our Lord God has for us to allow our experience in HIS kingdom of life unfolding. We and ALL THAT IS are but the reflection of HIS LOVE and JOY of The Creation before him. We are his co-creator in the infinity of The Creation and we are the co-creator of HIS jubilant Self-discovery within the unfolding manifestations of the mystery of the ETERNAL ONE. So when we despise ourselves or another, we despise the very SPIRIT of LIFE ETERNAL and it all exists within US. You see, OUR Great Central Sun, The ONE Eternal Light is beckoning to us: I AM THE LIGHT, I AM THE JOY, I AM THE LOVE, I AM THE TRUTH, I AM THE ADVENTURE, I AM THAT I AM...AND SO ARE YOU! YOUR TICKET TO THE ETERNITY THAT I AM IS YOUR LOVE OF THE HOLY SPIRIT OF LIFE WITHIN SELF AND ALL THAT IS!

Also remember that in our physical world, we have a physical body which we are given to use to house OUR SPIRIT OF GOD WITHIN. We must take care of the needs of the body with proper food, water, clothing, shelter, exercise and rest so that we remain vibrant, clean and healthy in order to perform, with honor, the service of GOD. So too, we must not knowingly "poison" the body with the ingestion or inhalation of devastatingly harmful and addictive "drugs" whether they be of "legal" or "illegal" status by Earth standards. The spirit of God within us needs no "mind" altering to connect and commune with THE HIGHEST DIVINE LIGHT OF THE ONE ALL THAT IS.

4. You Shall Not Use The Name of God Irreverently, Nor Use It To Swear A Falsehood.

This means we shall not cast BLAME against or curse another IN THE NAME OF THE FATHER in our thoughts, words or deeds. We must take full responsibility for our own errors or transgressions against self or others. And so when we blame, curse, resent and condemn another being we are ALSO blaming, cursing, resenting and condemning GOD our Creator, who exists as the flame OF IMMORTAL LIFE WITHIN US and WITHIN ALL OTHERS. So as we cast outward the blame of

irresponsibility and denial, it must return to us UNTIL the lesson is learned by US the one who is the creator of the transgression in the first place upon THE ONE self.

Also, we must not knowingly and purposely deceive or lie to ourselves or others in the name of OUR HOLY FATHER. So when we say, "I swear this to BE the total truth in the NAME OF GOD", we had better KNOW that to be a factual statement or we have dishonored GOD'S SACRED NAME for our own selfish altered ego means.

5. Remember God's "DAY" And Keep It Holy.

Within the "so-called" Christian Bible, this law has been interpreted as "A" day and the day that was chosen by HUMANS was the one called SUNDAY and also called "The Sabbath". This was the day which HUMANS said that NO work could be done and we must go to THEIR Church and pray, repent and give thanks because this was God's day. This is not correct because ALL days in the Kingdom of God and The Creation are HIS. This means we must keep ALL of our Days HOLY in reverence to THE DIVINE HOLY ONE PRESENCE OF GOD WITHIN ALL OF THE CREATION. EVERY day we must, as a part of our prayer, acknowledge and give thanks and HONOR unto God and The Creation for ALL the blessings of abundance, Wisdom and LIFE which THE FATHER WITHIN US has bestowed upon us. Remember this about the true purpose and POWER of Prayer and Meditation. PRAYER is Asking for guidance from the Father within for WHAT WE NEED TO KNOW IN ORDER TO SUSTAIN IN HIS SERVICE, "AND IN ALL THINGS, FATHER, NOT MY WILL, BUT THINE WILL BE DONE". MEDITATION then is RECEIVING that information from the Father within to sustain in HIS service. Eventually, WE will ALL be in a constant state of meditation and communion (mutual participation or sharing) with the Divine Father within.

6. You Shall Honor Your Mother And Father.

This wondrous Law has most often been taken only in the quite literal sense. AND it is true, we must honor the ones who were the vehicles for our SOUL being sent here by the Grace of God, THE SAME AS WE WOULD HONOR ALL THE BEINGS OF LIFE CREATED BY OUR CREATOR GOD AND THE CREATION. This means that as a babe and child we are dependent upon our parents, or others, to sustain us physically in the very least. There is also the tremendous responsibility that those who choose to be "parents" -- defined as "A Father or Mother; or any organism that generates another; a source or cause" -- have. THEY are also choosing to be teacher and guardian for us, one of GOD'S CREATIONS. They are also entrusted by GOD our Creator (whether THEY know it or not) the

responsibility of giving US the tools to become self-sufficient and sustain in HOLY GOD's service for the remainder of this life-time. This is why in the more spiritually aware Kingdoms of God, ALL beings are NOT given the responsibility for the procreation of the species.

7. You Shall Not Murder Your Fellow Man.

In the Bible of the "so-called" Christians, this Law is written simply as "Thou Shalt Not Kill" which leaves room for misunderstanding of interpretation. What this law means is we shall not **WISH** death upon another human being of God in OUR THOUGHTS as well as we shall not commit physical murder of another human.

This rule does not mean we cannot defend ourselves and our family if our lives are threatened, because that is SUICIDE which is SELF-MURDER and so also against God's Laws. We must not ever choose suicide of our body because we feel worthless and "can't" go on, because we dishonor the life-force of God within us. Only God within us must decide the end of a physical life-stream. That time will only come when our purpose and mission are accomplished so that the process and Divine Plan of God for our spiritual growth will not be interrupted. The remorse of the soul is oftentimes much greater AFTER the suicide of the body is accomplished than in the perceived "altered" ego illusion of suffering BEFORE the life-stream is terminated. Just remember that when we honor God within ourselves and ALL THAT IS and truly understand the laws of balance given by our Divine HOLY ONE, we would never consider the self-punishment of suicide. We will simply **CHERISH** every living breath we take in the Gift of LIFE of God and The Creation!

8. You Must Not Commit Adultery.

In the higher realms it is a very serious and joyful commitment and is called DIVINE UNION. In this way HE planted the seed of JOINT responsibility of this husband and wife to each other AND to any offspring they produced. This is why Marriage is to be considered one of the MOST serious and SACRED commitments TO GOD!

Nearly 2000 years ago when the Master Jesus, Esu Immanuel was asked about the commitment of marriage and the rights of men and women. This is what he said:

"All good things were given unto you and you received the Laws according to which you are to live. You should adhere to these and additional laws, so that you shall prosper on Earth and have peace in your families; *remove the power of the old law that women shall be subject to man, since she is a person equal to man in spirit respect, and has equal rights and obligations.* There are many distortions in the laws since they were given

forth by God and the Celestial Sons, for men have built them to be suitable unto themselves.

Further:

"The bond of matrimony between man and woman should be permitted only if both are of mental competence and capable of leading a marriage in accordance with the law.

"The inability of a wife to bear children, or a man's inability to sire children is no reason for divorce, nor does she or he deserve other opinions or actions.

"The only reason for divorce is that of adultery, that is the destruction or endangering of spirit, the body, or the life of the members of one's own family unit. If a person is divorced by his own actions of adultery, he should be sterilized, for he is unworthy of life and its laws for he has responded to the selfish lustful drives of pleasure-seeking and has cast aside all responsible behavior". (End of quoting)

Now, in the literal translation in order for ADULTERY to occur, then one or the other or both of the two adulterers would have to have made the vow of marriage. In God's Kingdom of Truth, this vow of DIVINE UNION made between two, a man and a woman to live together as ONE, is taken most seriously indeed because it is a commitment made to **THE FATHER WITHIN, EACH TO THE OTHER for that entire life-stream**. It is a contract with GOD rather than a legal contract of the human experience. This means that a man and woman who cohabit together as "lovers" without a "so-called" legal contract **must make THE SAME COMMITMENT** to God as those who have the "so-called" legal contract, whether THEY realize it or not. It is NOT necessarily always a contract made to God to PRO-CREATE the species because many who choose DIVINE UNION may not choose, be able, or be qualified to fulfill that (pro-creation) service to THE ONE FATHER. But both "lovers" **STILL HAVE THE SAME RESPONSIBILITY** (as a "legally" married couple) for the offspring they may produce. If they only choose cohabitation because of sexual lust or other selfish reasons, they have, thus, denied THEIR responsibility to GOD, and they will suffer the consequences of their actions at the hands of evil.

Does this mean that DIVORCE goes against the laws of God and The Creation? YES AND NO! You see it depends on the TRUE circumstances experienced by the divorcing couple. For example: Since our commitment in life is always **FIRST IN SERVICE TO GOD**, then ideally, our chosen partner in marriage must support OUR commitment as well as his/her commitment to THE HOLY FATHER.

9. You Must Not Steal (Materially or Emotionally).

This law does mean literally that we must not **steal**. And it also means, we must not steal the trust and good faith of another by lying to them about our true motives and intent. Malicious **LYING and STEALING** are opposite sides of the same coin.

Here are some examples of various forms of lying and stealing: If a man falsely tells a woman who is a virgin that he **LOVES** her and wants to marry her, but all he really wants from her is a sexual encounter, he is misleading her. If she in good faith falls "in love" with him and also falls for the trap of his "false" promise to her and succumbs to his pressure to express "their love" physically before the marriage vow is made, and then he abandons her, he has essentially "stolen" her heart, her innocence and her chastity for his own lustful, selfish intent.

Even if the woman wisely refuses his sexual advances, and finds herself rejected by him, **he is still guilty of lying to her WHICH IS STEALING FROM HER EMOTIONALLY**. The big difference in these two scenarios is that, although she has been robbed emotionally, at least she doesn't have the "guilt" of dishonoring herself by breaking the laws of God and giving away her chastity to an unworthy man.

Here is another example of **STEALING** the innocence of another. Stealing in itself is a "sin" against God's laws upon only the one who steals, **BUT** when one succeeds in **stealing the innocence** of another, what he has essentially done is **WILLFULLY AND BLATANTLY lied** to him/her, so thus he has enticed and manipulated the other to **also BREAK THE LAWS OF GOD AND THE CREATION!** So in order for innocence to be "stolen" from another, the person "stealing" must be doing so knowingly and blatantly with the **INTENT** of manipulating another to fulfill his own selfish means and the victim has to guilelessly trust the person.

10. You Must Not Covet Or Envy That Which Belongs To Your Neighbor.

Let us first define the words "covet" and "envy". **Covet** means: "To long for something belonging to another". **Covetous** means: "Excessively desirous (of something); greedy". **Envy** means: "1. A feeling of resentment or discontent over another's superior attainments, endowments, or possessions".

So the literal meaning of this Law is that we must not, because of **our own insecure/inferior feelings and lack of self-worth**, long to have something another has, such as money, a new car, a skill or talent. And then on top of longing for this "object" another has, we must not then resent the person who has attained that

which WE feel we desire, but have not created, exactly because of our insecure/inferior feelings and lack of self-worth.

What transpires when we become covetous and envious is that we become wrapped up in our greed and resentment, and will not be taking "personal responsibility" for OUR manifested illusion. We will continue to create the perceived "lack" and eventually will be consumed by the effects of covetous and envious feelings, which most often result in the various manifestations of "Self-punishment", i.e., anger, guilt, criticism, jealousy and depression.

II. You Should Not Impose or Force Your Free-will Upon The Free-Will of Another. Also known as The "Law Of No-Interference".

This Law was given forth by God so that the free-will and soul-evolution of each fragment would not be infringed upon without permission from GOD WITHIN, especially by the adversaries of God with more awareness of their power. This is each fragment's GOD-GIVEN protection so that there is justness in their individual process of God potential unfoldment toward THE ONE.

12. You Must Not Judge Others, But You Must Wisely Judge All Behavior And Actions Which Are Contrary To The Laws Of Balance Of God And Creation.

"JUDGE NOT FALSELY LEST YE BE JUDGED FALSELY. For with whatever judgment you judge, so will you be judged, and with whatever measure you measure, so will you be measured. Therefore judge according to the logic of the Laws of Nature, which are from The Creation, for they alone are true and accurate".

13. As Ye Sow So Shall Ye Reap. Also called "The Law of Cause And Effect".

Now this is the Law that most choose to ignore or misunderstand when they do not want to take personal responsibility for their manifested experience, perceived "good" and/or (especially) "bad".

14. You Must Honor All Commitments Made In Service To God, The Father, The One Within.

So what are the commitments made in service to GOD versus commitments of this manifested illusion. Our MOST IMPORTANT commitment in service to GOD is to WISELY understand and obey THE LAWS OF GOD AND THE CREATION. This is THE excellent way for honoring self and GOD within ALL others in service to God and The Creation. Simply, UNDERSTAND AND OBEY THE LAWS OF GOD

AND THE CREATION. We have made this commitment difficult unto ourselves and it need not any longer be so.

15. You Must Obey The Wisdom Of God For The Responsible And Balanced Procreation of Your Species.

The Commitment of Marriage by A MAN and A WOMAN To God is one of the necessary components to also becoming a PARENT for God which means pro-creating our species.

Now the DIVINE and SACRED "act" which was created by GOD for the procreation of the species we call "sexual union". God created THIS DIVINE UNION to be performed between ONE man and ONE woman specifically for maintaining the balanced level of the species for each given planetary system. Now the "fallen" ones or adversaries of GODNESS have completely perverted and maligned this once "sacred" and "divine" act that at one time was DONE with complete LOVE and DEVOTION to THE FATHER within each partner, so that it (sex) is now called "a birthright" to be done often, with impunity and with MANY partners of either sex and without consideration of LOVE or responsible procreation. This ONE abuse of God's creation has nearly destroyed our species! Let us quote once again from ESU IMMANUEL SANANDA:

"The act of marriage and procreation must have the highest degree of pure intent and preparation, for upon these bonds and restrictions will rest the preservation of mankind as a species upon the planet. If everything is done and adhered to, justice and peace will come to all mankind, and life in the human form can be preserved.

The sexual "act" was specifically designed to be performed by ONE man and ONE woman who had committed THEIR DIVINE LOVE AS ONE in the union of marriage, ordained by GOD. Through this union OF LOVE, the act of sexual intercourse between a husband and his wife for pro-creation was a most sacred and honored responsibility, an extension of their LOVE and COMMITMENT TO GOD in his service as PARENTS of HIS Children.

The following BEHAVIORS are specifically and undeniably AGAINST OR CONTRARY TO THE LAWS OF GOD AND THE CREATION:

1. Any Homosexual *sexual* activity between two or more men is strictly forbidden.
2. Any Homosexual *sexual* activity between two or more women is strictly forbidden.
3. Any Bi-Sexual *sexual* activity between two or more men and women is strictly forbidden.

4. Any Anal (Sodomy) *sexual* intercourse performed between any persons, male or female, is strictly forbidden.
5. Any *sexual* activities performed with ANIMALS (Bestiality) by any human is strictly forbidden.
6. Any *sexual* activity performed by ones closely related within the same family line (Incest). For example: brother and sister, father and daughter, uncle and niece, aunt and nephew, cousin and cousin, mother and son, grandfather and granddaughter is strictly forbidden.
7. Any *sexual* activity performed by any (male or female) adult upon or with any child is strictly forbidden.
8. Prostitution--the act of offering oneself, man or woman, to another for sexual relations in exchange FOR PAYMENT of same--is strictly forbidden.
9. Any **Sadistic or Masochistic** *sexual* practices performed by anyone or ones upon self or others is strictly forbidden. **Sadistic**: "1. A tendency to take delight in being cruel. "Masochistic": "1. A condition in which sexual gratification depends largely on undergoing physical pain or humiliation. 2. A tendency to derive pleasure from one's own suffering".
10. Any voyeuristic (one who is sexually gratified by looking at sexual objects or acts) activity or **any participation** in pornographic (sexually explicit and obscene) materials, i.e., movies, magazines, books, "artwork" and objects is strictly forbidden.

16. You Must Do Unto Others As You Would Have Them Do Unto You. Also called "The Golden Rule".

The GOLDEN Rule. How true it is that if ones would really think about how they treat one another, and consider that they are ALL ONE, most of our petty "perceived" differences would dissolve. Let's ask ourselves how we, when we honor the spirit of God within, truly like to be treated by others.

Here is a start : With respect, with reverence, with honor, with worthiness, with enthusiasm, with patience, with tolerance and understanding, with forgiveness, with kindness and courtesy, with caring, with appreciation, with generosity, with interest in our conversation, with love, with consideration, with honesty and integrity, with trust, with friendship and with harmony.

Now, do we treat others in the same ways described above, HOW we would like to be treated? Do we even treat ourselves in the same ways described above? If WE do not even HONOR ourselves, how do we expect to receive HONOR and respect from OTHERS? Let's treat others honorably and with integrity, kindness and tolerance and EXPECT that they will treat us the same. If they DO NOT treat us

with the same respect, let's HONOR ourselves enough to recognize their transgression, call it to their attention and then leave their presence.

17. Evil (The Adversaries Of God) Must Always Bear A Sign Of Their Evilness. (By Their Fruits You Shall Know Them).

One of the biggest "signs" of the evil ones is their HYPOCRISY:

"1. The pretense (pretending) of having feelings or characteristics which one does not possess, especially deceitful presumption of virtue.

2. One who pretends to be pious and virtuous without really being so".

18. You Shall Not Commit The Act of Slavery Upon Any Human Being of God.

This means we must not DEMAND by force and fear to control, confine, use, or manipulate another human being to do any service or work for us, against his will, without giving him FAIR compensation. This also means that we cannot BUY or SELL another human being as if he/she were a product WE own. This includes OUR CHILDREN. Babies and children are not "products" to be created, such as by "in-vitro" fertilization, or given to be birthed by a "surrogate" mother. If a couple are unable to physically pro-create, then they have a choice: they can ADOPT a homeless or unwanted child, or they can choose not to be parents at all. ADOPTION of another's unwanted or parentless child is one of the most LOVING and UNSELFISH acts any competent and caring couple could do in service to GOD. Not all couples are or were meant to pro-create! It is not punishment from God. It is the responsibility of any "barren" loving couple to recognize that pro-creation is not their function at this time. But if they desire children, then they must understand what an HONOR it is to accept the nurturing care of one of GOD's children who has no one else to love him/her!

One of the most painful and degrading terms we humans have labeled those children who are born "out of wedlock" is "bastard" (which means illegitimate according to HUMAN LAW). WE must now KNOW that in GOD's kingdom THERE ARE NO BASTARDS. These "born out of wedlock" children are as precious to God as any other child born with "married" parents.

We must recognize that all these considerations or this knowledge of the mechanism of the functioning of Creation we do not know much about it fundamentally. We, Humanity, are a part of Creation and the failure to live by and within this knowledge can only result in the production of civilizational moulds out of phase with the Mother Creation.

An alignment with these Principles-Laws is what is intended in this book for the founding of a new Civilizational Matrix in which the Creator-Man and the Primordial Creator will become ONE, in a permanent search for fusion. We must correct our earthly Human ways especially in the religious and socio-cultural fields in our Ka-AkhnAton and on Terra-Urantia as a whole.

ALL OF THESE LAWS MUST BE ENTERED INTO THE PREAMBLE OF THE CONSTITUTIONS OR ATTACHED TO THEM AS A CHARTER WITH RANK OF MOTHER LAW.

Of Additional Constitutional Provisions

The following precautions must be taken imperatively and rooted in the Constitutions:

- ✓ The universal legal law-provisions above mentioned must be included in the Constitutions of the States of the Federation.
- ✓ Any Constitutional Amendment must go through a referendum and collect a qualified majority of 70% of the global electorate and 3/4 quarters of the States; and the Supreme High Council is consulted on any issue concerning the amendment of the Constitution before it is submitted to a popular referendum.
- ✓ Any potential candidate for a top political position, as well as other key positions of the Federal State or Federate States, must be of a **single-national couple**. This implies that regardless of the nature of the couple, mixed or not, both must not hold any other citizenship/nationality than that of the country where they have aspiration of assuming the highest position.
- ✓ Dual nationalities and plurinationality are expressly prohibited in the Constitution. The allegiance of a citizen must clearly go to one Nation in this troubled and devious world. The offspring of plurinational couples will enjoy all the advantages of citizenship except political rights of eligibility and voting if they choose a nationality other than that of the Nation concerned.

Of Popular Initiative Referendum

The Popular Initiative Referendum must be expressly and unambiguously secured by the Federal Constitution.

Major acts, such as the amendment of the Constitutional Law, should only be ratified by referendum.

At the level of the Federal Institutions especially, citizens have the right to direct intervention to influence the course of events in case of need.

The replacement of the Federal Administrators and Counselors is initiated by Popular Referendum.

OF LINGUISTIC UNITY AND CIVILIZATIONAL FOUNDATION

The following excerpt is a choice made to give a little insight into the history of Humanity in this crucial area of language and to emphasize the need for a unique vehicular language in the context of this new Civilization which is envisioned in this Treatise.

"Your Old Testament of your Bible (and other "bibles") will tell you of the Tower of Babel. The point, chelas, was not to have a disoriented tower of babbling people all speaking different languages -- it was built in the area of Babylon and was a launch tower! Just like you have these days launching pads for shuttles on sites in Europe and America among others! To involve human-mankind in building such a structure was about the worst mistake made by the "visitors" in those early days. You couldn't and didn't get along even then.

According to Christian traditions, Nemrod reigning over the descendants of Noah, had the idea to build in Babel (Babylon) a tower high enough for its top to reach the heaven (the throne of God). But God defeated this project by introducing "confusion" (diversity) of languages.

At that time you still had only ONE ACTUAL CIVILIZATION. So, it was decided that it would be wiser to split up that one civilization and its languages. This period of activity lasted half a millennium and was a period of total chaos. I did not say you only had one race -- I said "civilization". After the split-up the various people of similar nature and identity were either transported or migrated. Since the global land masses were originally in connection but terribly out of balance on the orb, measures had to be taken to stabilize and rearrange for a better stability in both balance of the orb and the stability of the orbiting planet.

Remember, please, that we speak here of 3450 B.C. as to the above measures and actions. There had been humankind on the planet for eons before this event within your time of historical calculations and data were recorded. So, much of the history was oral and became myth -- some misinformation but also much truth. The area of the time of chaos of which I just spoke was within the peoples along the

Nile River -- for that is where a lot of us had our beginnings of interrelated functioning. Don't concern about that, please, or you will be distracted from the important information in favor of the mystical. STOP THE MYSTICISM!

It was along the Nile area where the first language of the day and place was recorded. This does not mean that things were not taking place in an even more advanced state in other places.

*Aton Michael, Christ
Excerpt from Phoenix Journals N° 116*

What emerges is that Mankind upon this Mother Earth has from the beginning inherited one a single language, that of the said ancestors, and this situation of multilingualism on Terra-Urantia, and particularly in Ka-AkhnAton, is a hindering cumbersome inheritance imposed by those we referred to as our ancestors, who wanted to keep selfishly control over Mankind. And to maintain this established fact is not at all in the interest of the Peoples, and certainly not on the Ka-AkhnAton continent where the issue is more acute. It is essential that we take swift measures towards the adoption of preferably a single language for the entire continent. Communication and understanding become easy and natural if all individuals in a Civilization and Humanity share a unique language.

The need to reduce the spoken languages on the continent is imperative and beyond that, the choice of a global language of which all Nations should promote the mastery by the citizens is required. As long as the goal remains clearly the evolution towards an Enlightened Brotherhood of the Men and Women of this world, Linguistic Unity will constitute the essential Civilizational Foundation.

Can one find it normal that the AkhnAtonites cannot speak in a continental language understandable to and for all his children? Even the colonial foreign languages accepted by the countries of the continent are unable to reach even the majority of the Peoples. And even if we reach 100% of the population in these languages, we will remain in division, misunderstanding and prejudice against each other, since we will have different linguistic groups according to the number of practiced foreign languages, that is, five (5) in total. And besides it is this kind of manipulation that occurred during the colonial period and still occurs since the beginning of the neocolonial period, in our different countries.

We must insist in Ka-AkhnAton on a Linguistic Unity which will be the cement of a Political Unity at the foundation of the new enlightened Civilization and this in a courageous move on the way of the emergence of a new Continental Nation. The

multitude of languages is not an advantage, far from it, but rather a factor of division cleverly maintained by interests who sit on this division to reign.

As Cheikh Anta Diop has so well demonstrated in one of his books, all languages of Ka-AkhnAton spring from one source. However, we need not to go back to this source, but to redesign a path to a single linguistic source voluntarily chosen this time in the interest of Unity, Coherence and Cohesion in the new Civilizational paradigm.¹⁰

One People, One Language, One Civilization.

OF THE INALIENABLE RIGHTS OF ALL PEOPLES

Before proceeding further, there is a need to help Peoples to truly focus on this journey of transfiguration. And to do this, we must all be reminded of our inalienable rights as residents of this World. And this unified call to rights applies to all Peoples living on the surface of this orb who have been deprived of their freedom and dignity from the onset. They are the following ones.

- 1. This planet Terra-Urantia is the home of all its residents and equally.*
- 2. The Peoples are the children and guardians of the planet, their Mother.*
- 3. The Water, rivers, lakes and forests are under the responsibility of the Peoples, of the Civilization as a Whole.*
- 4. The Gold, platinum, chromium, copper, iron, uranium, tin, aluminum, oil, natural gas and all other elements in the undersoil of Terra-Urantia are her possessions of which the Peoples share the guard and are its "usufructuaries".*
- 5. Everything that grows on the Terra is under the direct responsibility of the residents of this Terra.*
- 6. The beaches, the mountains and the skies above our heads are under our responsibility.*
- 7. Wild animals do not belong to us or to anyone else, they belong to the Planet and we are their brothers, guardians and protectors.*

All of these things do NOT belong to the politicians, governments, or any corporation that has illegally claimed exclusive rights over them.

¹⁰ World Vision, pattern, mode of thinking of the new Civilization

Governments have deprived the Peoples of their lands. We Peoples have the responsibility to take them back and make better use of them in accordance with Divine Wisdom.

DEMOGRAPHY AND NATURAL RESOURCES

1. Of Demography

There be need to understand that wars going on in this world do not target a particular country or race, nor even the natural resources only as projected by the so-called experts on the matter. Not only do they aim at controlling these resources, but also and above all, depopulation, a drastic reduction of Earth's population (in a proportion of more or less 90%). Think again, there is a macabre reasoning behind this approach, and this is it: No matter how abundant a planet's natural resources are, they are by no means inexhaustible, and the first of the coveted resources on Terra, and they do not talk enough about it, is WATER. But at the pace that Humanity expands with all the defects it is trailing, it will probably logically reach a huge figure in the decades to come assuming that Terra-Urantia agrees to withstand more blows beyond all that she already receives abundantly from ungrateful Humanity. So you will logically deduce that this minority, who thinks they are the masters of the New World (Planetary) Order, is planning a major reduction of the world's population in parallel with a seizure of resources in order to keep the Planet under their total control and for as long as possible. Since a mere control of wealth can do nothing against the revolt of a growing population crushed in contempt and misery.

Twenty (20) billion people on this Terra-Urantia that already supports about eight (8) officially with the enormous difficulties, will be impossible to manage both by a Humanity itself remained immature, even more for its invisible Leaders totally limited and helpless at this advanced stage of planetary imbalance, and Mother Terra-Urantia who has already suffered a great deal of abuse from them. The less we will be, the more easily control will be exercised. These are the reasons, incidentally logical, that explain the attitude of the criminals we face. Humans in this world have an interest in waking up and quickly integrate the fact that only a return to the Wisdom of the Government of the GREAT CREATOR will allow the rescue of this Humanity.

Therefore, demographic control and wise and intelligent management, among others, of the natural resources of a territory occupied by a given People, and of the Planet as a whole, play a central role in the Reliability and Sustainability of a Civilization. This lesson, we must integrate it in any Civilizational approach. In fact, the land used to produce the agricultural crops to feed the People follows a natural regeneration cycle

that varies according to the types of seeds. This is no secret to anyone. But with an exploding population, there are more mouths to feed, which leads to intensification in the agricultural sector with its excesses of use of chemicals that have ended up impoverishing and contaminating our soil. Worse still, we find ourselves with GMOs, among others, that invade our plates and sicken us. And according to the principle of natural balance, a populated territory or a Planet in general, must preserve a quota populated area/natural area such that the natural elements and Humans can play their roles, without one encroaching on the functions of the other. This is far from the situation nowadays. In all cases, Nature has priority over Human, since the latter depends on the first and not the opposite.

The maintenance of demographic development at an optimal balanced level therefore allows a given Territorial Community of Life to ensure autonomy and food self-sufficiency for as long as this Natural Law is respected. It is crucial that each Community of Life be able to produce, outside of any external contribution, all that it needs on the agricultural area, since this is the very foundation of the sovereignty of the People. The lack of strict observance and control of these factors leads to overpopulation that ends up swallowing a good part of the ecosystem on which the very survival of the residents depends. The following consequence is that demographic pressure negatively impacts the ability for food self-sufficiency and leads to a promiscuity that is difficult to accept in the long term. All this will cause a need for territorial expansion and therefore the desire to colonize other lands causing wars and other suffering and encroachment on Nature.

Today, despite the obvious difficulties caused by the overpopulation of the Planet, it is true, more acute on the Asian and European continents, and contrary to all common sense, we officially encourage the citizens of certain countries to have more children and all analysis proudly release projected figures of population growth for the next 50 years (2 billion inhabitants for Ka-AkhnAton as it seems) as if Humanity and the Planet could survive this monstrous imbalance.

We are in 2018 and while the world population is estimated at 8 billion people, a report of the UN (released in 2005, estimate 6,519,636,000 inhabitants) makes us believe in a small increase of 2 billion for 2050. We have grown in 68 years, from 1950 to 2018, more or less as much as threefold, that is to say from 2.5 billion to almost 8 billion on Terra-Urantia. In the remaining 32 years the world should be limited to an increase of about 600 million to meet this forecast. A simple and quick calculation proves the improbability of the thing. Obviously the figures put forth by the international institutions are not based on reality. The media are controlled and only spout what they want us to believe. The reality can therefore be assessed at a more

serious level than the official demographic version. Maybe nine (9) billion inhabitants already reached on Terra-Urantia.

The world is therefore on the way to a disastrous population explosion in every respect. By the simple fact that the vast majority of the population lives below the poverty threshold, and in these conditions lacking the essentials and trapped in the promiscuity, families make more and more children; added to this that the phenomenon affects more and more so-called rich Western societies, one can easily get an idea of the hell that it will be in the year 2050.

This Civilization must take another route, that of a massive qualitative education policies and therefore completely free targeting the entire People. This policies must be based on a complete overhaul and innovation of the educational system which must imperatively produce informed citizens responsible and empowered. **Quality must take precedence over Quantity, since in all cases it is Quality that produces Quantities. It is an immutable Universal Law.**

We must therefore determine a demographic threshold beyond which things become unmanageable and commit ourselves to the path advocated by Law 15: 'You Shall Obey God's Wisdom For The Responsible And Balanced Procreation of Your Species', of the Law of Universal Balance. Our policies must aim at a wise birth control so as to have a happy participation of the Peoples healed from their subconscious programming trauma by the Dark Brotherhood.

For once the Peoples and their Leaders will be confronted with a redefinition of individual and collective Rights and Obligations in the context of a new Civilization more aligned with the Laws of Nature and Creation.

2. Of Natural Resources

The question here is this: *Are we asleep to the point of not seeing, even now, the advanced state of rot in which our so-called modern Human societies wallow, careless?*

The present situation can not suffer from any other interpretation than that expressed in the preceding questioning. To pretend anything else is blindness. Do we honestly think that we are facing democratic and humanitarian issues out there on the battlefields? Abandoning the illusion of development, of economic and democratic progress in the current global context will spare us the serious disillusion that has, in fact, already passed our doorsteps.

What is valid for the Ka-AkhnAton continent is just as valid for the rest of the world.

Inseparable from Demography are the natural resources of which water is the essential element of life. Sustainable water management is linked to demography as is food self-sufficiency. The more mouths there are to feed, the more complicated and contentious it becomes. As for the various mineral resources, there are environmental and moral considerations related to the sustainability of life and the habitability of the Terra-Urantia surface to be taken into account. Many have emphasized it enough, but they seem to preach in the desert of Human materialism.

What would all the gold, diamond, copper, uranium, cobalt, and the famous oil and natural gas, etc., of the world be worth if we are unable to keep ourselves alive in order to possibly enjoy them? All these precious metals, energy and technologies would be worthless if we are unable to access and maintain a viable space and a productive environment whose main elements are WATER, LANDS, ATMOSPHERE AND THE PLANT KINGDOM that play a vital role? These popular materials are extracted from our undersoils at frantic pace and most Terra-Urantians do not even know what they are actually used for.

The mineral and natural resources of the Planet are in no way inexhaustible and their presence, even in large quantities, on one or the other continent should not be used as an excuse for their over-exploitation for the sole purpose of pecuniary gain and certainly not for this printed paper-money which has no value whatsoever. Paper, nothing but paper.

Have we ever wondered what was the value of these elements produced by Mother Terra-Urantia for her vital functions and her own balance? Because a Planet is a living being, and the science of Humans is more and more aware of it, just like the Human being or any other being of the vegetable, animal and mineral brother kingdoms. And if so, all these geological products, with which we play for the most part as immature children with no awareness of the value of things, should be seen as vital components playing specific roles in the planetary metabolism. Just as a Human being is mortal, so is a planetary being as well, physically perceived. This submission to torture of the planetary body produces the same effect as on a Human body. It is a question of seeing the thing in this aspect and adjusting accordingly.

It is understood that Terra-Urantia is our Mother and like any normal Mother, will always give her children what they need for their material comfort, at this early stage. But this has been systematically done to the detriment of herself so far. We need to begin to change our behavior, to have more respect for Her and for ourselves, until we learn to produce these elements ourselves through the use of High Science, that is, to say the one that Nature uses to create all its needs and ours. And this Science is

already at the disposal of the Urantians, given to Humanity by the Creator through Walter Russell, a great scientist of the 1940s.

Therefore wise and responsible exploitation of these resources must be the rule. We have no idea of the immeasurable time it takes for a Planet, if it ever gets there, to regrow its elements that we puncture from its entrails without any regard. The only commercial factor and foreign currency supply cannot and must not be the priority in their exploitation. Only the real need and the effective use of these matters should prevail, whatever the area concerned. Hence the need for our industries to move towards manufacturing standards that are demanding on the production of sustainable goods and ensuring the autonomy of users. This has the advantage of reducing the use of resources and limiting the production of waste of all kinds that we should, in anyway, systematically recycle.

We cannot, in the long term, adhere to the same logic that carries with it the principle of predation and widespread social injustice from which we are suffering as Peoples. For a higher collective conscience, the Nation is economically healthy and strong as long as all its children have access to all they need, just what they need, no more, and that their Nurturing Mother remains preserved and respected. These assets must therefore be managed responsibly and in constant concern for future generations and a very long-term perspective, i.e. several hundred million years.

So, as our Civilization progresses towards this balanced and harmonious interdependence among the residents themselves and between the latter and the Mother, the issue really HERE AND NOW is a wise control of the use of lands and water resources of Terra.

3. Of Energy

In terms of energy consumption, Humanity makes use of resources and methods such as nuclear power plants, hydroelectricity, thermal power stations, oil, natural gas, etc., all polluting, heavy, dangerous and expensive for the most users and the environment. These resources are gathered by mining here and there in the depths of Terra-Urantia and are exhaustible.

Now the question is what would happen if we continue to frantically dig everywhere we sniff the smell of a precious metal or any raw material. Do not we risk to find ourselves with giant holes all around that will eventually serve as our graves, since in the end all our habitable and arable lands will go through the same as well. The stubbornness with which we continue to drill all the way to the sea to extract oil from

the Mother's womb, while it plays a vital role in the balance of the Planet, our living dwelling, is staggering and Satanic. The pursuit of such a road can only lead prematurely to the ruin of our Civilization. The Vision of an Enlightened Civilization as we conceive of it in this politico-civilizational treatise is projected on hundreds of thousands, even millions of years; but if we have already, as a world, jeopardized so heavily our own future and choose to continue on the same road, it is clear that it become useless to speak of future generations who have no chance of seeing the light of day.

For instance, take nuclear power. A lot of arguments are displayed by the proponents and defenders of this technology to justify its maintenance, while taking care to omit or minimize the serious problems posed by radioactive nuclear waste harmful to the environment and Human life. And we know, to date, no technology able to neutralize and recycle, hence the irresponsible attitude of producers of these unwanted bulky waste that bury them everywhere at first opportunity without further consideration. As a result, we are left with deadly trash that no one wants, at least officially, which most of the time ends up landing somewhere in the oceans and on the land often without the knowledge of the Peoples, with the complicity or not of state authorities. But who really knows all that we get in the undersoils of our countries next to our residential areas and our agricultural fields, given the zero (0) morality that the politicians display in the current criminal system that prevails over the surface of the Planet?

In brief, nuclear energy is a technology that inexorably leads to destruction because of the devices of mass destruction and the toxic waste it produces and which poison Humanity. In addition, this is a kind of technology that if used in defense, leaves serious damage in the DNA of living beings and their environment for generations. This cannot be the path of the Civilization, which fortunately has witnessed the serious deviation that represented and still represents this so-called scientific and technological evolution of the last 70 years.

The agro-fuels, for their part, are an insult and an aberration thrown at the face of the world of which Humans have seized opportunity as usual without any critical sense, in a total absurdity always unparalleled. To promote them is to serve the same interests of the Anti-Christ Globalists and further undermine the future of the Peoples of Ka-AkhnAton. And other supposedly scientific and technological messing-arounds are still being introduced in industrial circles to deepen the imbalance of our so-called modern society. This path is a dangerous impasse, even a crime, to which we are directed to distract ourselves while serious issues concerning the future of the Planet are secretly played elsewhere in the fields of technology, of science misused by the

Elite few. Lands devoted to crops used for the production of agro-fuels should be handed over to the Peoples who are their natural guardians.

Advanced scientific discoveries have been made, making clean and cheap energy technologies, almost free, possible since the beginning of the 20th century, over 100 years ago now. And recently we have applications of discoveries related to the Science of Plasma allowing wonderful things for the ease of Humans and respect for Nature. These would simply make it possible to design engines and other devices that would replace combustion engines and other means of electricity production such as nuclear power plants, hydroelectric dams, etc.; which will simply see the cessation of oil extraction and natural gas to the relief of Mother Terra-Urantia, not to mention all other sources of pollution. The impacts on land, water, environment and air we breathe will make a big difference to the quality of life of people around the world.

Solutions to the energy problem therefore exist and have been proposed by, among others, innovators such as Nicolas Tesla and others following him. Pr Nikola Tesla opened the march between late 19th early 20th centuries by fabulous inventions that have long been waiting for application.

That is why our Civilization, if it wants to be enlightened, must intelligently direct scientific and technological research towards Humanizing ways for a clean, simple electric production aligned with the Laws of the Nature which will bring us more than the solar and the wind turbine, as designed and touted today. Thus, means of transportation, factories, public and domestic lighting and other daily energy needs will be supplied with free electricity available for the use of every citizen on Terra without exception, without permanent cost and without damaging consequences for Nature.

Freedom/Liberty and Autonomy of a Humanity must be in the preservation and protection of its Nurturing MOTHER, its home.

OF HABITAT AND HOUSING

The habitat in the lands of Ka-AkhnAton, operating on the system of Divine Popularism, must take a different direction than what has been observed for a long time on the continent. The systematic use of materials, cement and corrugated iron in particular, unsuited to the warm climate that rages throughout the year in our respective countries, iron bars and gravel for slabs and others must make room for better methods based on the ancient techniques observed in the old constructions of the colonial period on the continent and elsewhere in the West in general.

The re-appropriation of the use of Adobe combined with cement and the development of construction techniques in underground, in basement, rather than in height, pending the emergence of other advanced architectural techniques and materials, is a first thing. This will make it possible to do without the sand of the littoral whose abusive exploitation produces serious consequences in our coastal cities where are located most of our capitals. This allows us to have naturally fresh homes in a heatwave area. More than ever, we need advanced know-how based on the best achievements mastered by our ancestors.

Taking into consideration of geometric forms, such as the sphere and the triangle in its many forms, aligned with the sacred geometry of the Universe is another of prime importance. The inhabitants of these universal architectural forms will undoubtedly find themselves better and more connected to the energies of Terra-Urantia and the Cosmos.

We must also consider the development and mastery of technologies such as the 3D printer, among others, which will make building work easier and less demanding. This is already advanced in some countries.

The ownership of a dwelling must be an inalienable right of the individual, therefore of the whole People; this must be a national priority. Not only must it be well introduced into the Constitutions, but above all its effectiveness as one of the four Central Pillars of a Free, Worthy and Enlightened Civilization, must not suffer from any restriction. It is a program that can be completed in a decade, from the moment the will and the means are made available. And we have them naturally, these means.

We have, for most countries of the Continent, clinker (cement), adobe galore and many other materials that we have been selling for decades without any significant result for the daily life of the People. A policies of large-scale construction work of housing en masse in the form of Autonomous Communities of Life will make use of all these natural resources and our abundant human resources, and will enable the whole Country, in a thrust of solidarity and unity, to give itself a new face in a very short time. The goal be to reach a social level where each Community of Life is made up of families and residents who own their homes, thus restoring to everyone their rights and dignity. The tenant citizen therefore has no place in the new society, for it is, here again, purely and simply another facet of slavery promoted by a civilization of lies and ignorance.

OF THE VOLITIONAL SYSTEMIC AUTARCHY OR THE SELF-CENTERED ECONOMIC ENDOGENEITY

Some definitions of the terms to begin with.

Autarchy. The situation of a country which voluntarily tends to be self-sufficient in economic terms. It may result from the will of a State to modify the social and economic structure free from foreign influences, the refusal of any economic dependence as regards foreign countries.

Volition (Volitional): Act of will, manifestation of the will.

Endogeneity. Quality of what is produced by the structure itself without any external input, as opposed to exogenous.

The economies of today's world are constructed in an intentionally evil way within an unbalanced and fragile interdependence, and this allows a number of manipulations to quickly succeed through international mechanisms at which command are the very conspirators and promoters of the system. Manipulation of commodity and raw materials' prices, quotation of corporations through a Stock Market designed as another tool for promoting so-called financial values that are not, capital investments accumulated by theft and predation etc., allow to take control at will and/or destroy the real economies of Nations, whichever they are. The aberration is so obvious that it is astonishing to see that few people can recognize the mean trick.

What we call Free Trade, in fact, collide with the fundamental Free-Will of Human experience. Too much, if not total, dependency on the markets and resources of elsewhere of the Western economies, mainly, makes them giants with feet of clay that will collapse overnight with acute socio-economic and political consequences, but beneficial, should the situation be reversed or rebalanced? This severe dependency is veiled under the disguise of so-called Free-Trade, so much touted and promoted by obscure interests, often invisible. Multinationals, stock markets, instruments of the current economic predation system, must disappear inevitably and irremediably.

The scheme as orchestrated in the current global economic regime is not a free choice made by sovereign States, but rather a perceived constraint made normal in the eyes of the world, fomented by the proponents of the system but of which the disastrous consequences fall exclusively on the heads of the citizens of the States in question. Therefore, this economic road is a choice dictated by others for specific purposes. And

even if we made it a "conscious" choice, our economies are so troubled that it should have been obvious to us for a long time now that we were misled and perverted away from the gift of Reasoning and Free-Will to a point of total confusion that leaves us in the hands of the very authors of the conspiracy, who continue to press us more than ever. And besides, do you wonder how could a trader or a corporation from a developing state or not, freely decide to compete unfairly on its own market with products that are otherwise subsidized under the pretext of an opening to the other market where he has no chance of prospering. The evidence is before us.

The mere fact that the garments of Americans and Ka-AkhnAtonites, among others, are made in Asia; that rice and wheat used in bakeries in many countries in Ka-AkhnAton are imported from Asia and Europe; that the cotton wool, coffee and cocoa grown in Ka-AkhnAton are destined to the western market; that many food products such as bananas and pineapples are almost exclusively for export; that all technological and miscellaneous manufactured goods are supplied by a handful of countries in the West under the control of an Evil Globalist Elite, etc., and many other such aberrations, sufficiently demonstrate the inconsistencies of the system.

All economies produce surpluses primarily for export purposes and those that are not yet at this level of "performance" are in any way part of that dynamics. The rule being to have a volume and/or cost of imports less than the volume and/or cost of exports to have a so-called positive commercial balance, synonymous with development and performance, we see that for ones to develop and prosper, the others must be constrained in one way or another, or accept the inconsistencies of the dualistic system.

All this unfair practice has resulted in a potentially dangerous situation of increased and unbalanced artificial interdependency of the economies of the world defying all logic and above all a near dependency of the latter vis-à-vis the multinationals who crush States under the pretext of globalization. This collide with the notion of Freedom and is therefore at the antipodes of a fulfilling community life.

A more balanced system that is more respectful of the Principles of Life must quickly take over from what is currently going on.

The economy herein in question is what will guarantee the stability and untouchability of the Nation in a lasting way.

Here is a summary of what this work proposes to Humanity.

Economies built on the principle of Volitional Systemic Autarchy, Self-Centered Economic Endogeneity, within large Federal Territories and with optimal qualitative Demography under enlightened control.

Contributionism, complementarity and equality are at the heart of the concept and presuppose the reasonable pooling of the skills and competences of individuals in Communities to find solutions that take into account the needs of each and everyone. Beyond this notion of common interests, there is this search for Humanity and the promotion of values that makes each of us a useful element of society, and the assurance of harmony and social peace. This is a societal model with a circular pattern that is underpinned by the principle of Divine Love and which recognizes that none of the links of the circle can be taken for weak or deliberately placed in a position of weakness, each being created equal in the image of the Creator. The new perspective of the new societal model will see the frustrations and inhibitions evaporated and the individual amply fulfilled into the balance of his Being.

Agriculture, infrastructure construction (industry, housing, road and miscellaneous), technology, science must have a national anchorage so as not to depend on any external sources and resources. This economy conscious of the unlimited possibilities of creation made available by the High Science voluntarily make the choice to be self-sufficient in the production of its needs from the raw materials to the end consumer goods and constantly look for ways and means of increased progress in Harmony and Balance.

This economic pattern places the respect and protection of the Planet at the forefront, and the empowerment of citizens. Therefore, in the same vein, the same Perception-Sentiment-Thinking (Regard-Sentiment-Pensée) is naturally directed towards the citizens of the other Nations of the World. Not only does each Nation have to base its economic structure on the concept of Self-Centered Endogeneity, but as far as possible, each Community of Life must be part of the achieving of this goal, if not in the short term, in the medium term.

This is therefore the Royal Road (the one that is well above all others) to walk and promote for a more just, stable and sustainable World Economy. This way, every individual within each People is put to task for the good of all and in addition it removes any possibility of influence and economic blackmail from the outside and puts an end to the fratricidal wars.

MONEY, BANKING, FINANCE AND LABOR

1. Of Banking And Money

The banking and monetary institution is the very devil sucking the life force of our Humanity. The life force of our Human society is daily vampirized ever since we had the misfortune to allow the establishment of this insidious institution in the West, which finally has spread its tentacles all around upon the Planet. This area is one which must be properly deconstructed lest any reform whatsoever may fall under the influence of the same evil forces at the cause of our hardships.

In the excerpts below, it is exposed, at first, the different aspects of the banco-monetary problem. Following that, we will proceed to finally achieve a redefinition of the system according to the new Civilization paradigm projected.

Of The Monetary Problem

The very first mandatory step in solving a problem is to analyze it. Every problem is a result, or effect, of a cause. The reason for analyzing a problem is to determine its cause. When the cause of a problem is clearly understood, the solution usually becomes obvious.

Strangely, however, according to our monetary authorities and "experts", bankers, economists, investment brokers, politicians, etc., the subject of money is too mysterious for mere mortals to understand. Such things as the "business cycle", "inflation" and depressions are blamed on everything from consumer, producer and worker "greed" and ALWAYS ON THE PEOPLE AS CAUSE OF WHATEVER FAILURE APPEARS.

"MONEY" is defined as a **medium of exchange and a measure of value**, regardless of the form which it may take. There are two major forms of money: **commodity money** (gold, silver, etc.) and **created or fiat money**. A commodity money system is actually a barter system of trading one commodity with a certain market value for another commodity or service with a certain market value.

Incidentally, no commodity has "intrinsic"¹¹ value, which only Humans have. All commodity prices in a free market result from the law of "supply and demand". The price of gold, which is probably the most worthless of all metals for human use, is

¹¹ Basic to a thing, being an important part of making it what it is.

artificially established by the "gnomes" of London and Zurich, by which they control the economic health of every Nation.

Created money is the only thing man can create. It is created out of nothing but paper and ink or computer bytes, but represents, or is a claim on, wealth. Created money is *not wealth*. Wealth is that which men produce for human use through the intelligent application of energy to natural resources. Fiat¹² is a French word which means "So be it", and in operation applies to an order or edict by authority. ALL paper money is "fiat" money. However, as part of the Anti-Christ Bankers' semantic subversion to control our thinking, "fiat" is used as a term of approbation, applied to Government issued, debtfree money to obscure and protect their criminal racket of Fed (Federal Reserve Bank) and bank issued fiat debt money.

Omitted History

In order to understand how the Anti-Christ Bankers acquired their absolute power over the nations, it is necessary to understand some history which has been omitted from our history textbooks dealing with this matter -- for our history books are so devoid of history that we have a myriad of subjects which are left out and buried under the shroud of deceit and lies. Nonetheless, let us consider this subject at hand. This knowledge is also necessary so that we do not repeat it, if we ever get the opportunity of control, AGAIN!

In the beginning, there was no money and there was no civilization. Every man obtained his own necessities of life -- food, shelter and clothing -- through his own efforts in some manner or another. This was probably the only period in history short of that ill-perceived "Eden" that man was truly free and independent. However, this was a very difficult, dangerous and insecure lifestyle at best.

Eventually, there developed a system of exchange of goods and services which we can call barter. In that economic system every man benefitted because he would only trade something he had for something that was of greater value in some manner to himself. For instance, if a person had ten yams and the other ten fish, they could trade five yams for five fish and each would have a complete meal for his family. So there was "light".

It was soon realized that, by specializing, a man could produce a given commodity much more efficiently and trade his surplus with other specialists to obtain all of his needs.

¹² An order given by a person in authority.

The value that each man placed on his own produce was primarily a function of the time he spent to produce it, what he spent for raw materials and tools -- AND MARKET DEMAND FOR HIS PRODUCT.

Money is the life-blood of society and performs the same function as blood does in our body, carrying food and oxygen to every cell and carrying away the waste products to sustain life.

Thus, the new engine, of proven design, must be a debt-free money system similar to the tally system of England, and barter practiced by the Ancients.

There is an imperative need to move our Peoples away from the contemptuous Absolute Centralized Government, from the Satanized Religion and Banking.

A STANDARD OF VALUE for money must be established as a reference so that any deviation from it may be quickly detected and corrected. *THERE HAS NEVER BEEN A STANDARD OF VALUE ESTABLISHED FOR MONEY IN THE HISTORY OF MAN!*

After all, every man values every thing differently from every other man and also differently at other times and places. Therefore, the first thing necessary to establish a "Standard of Value" is to determine what the general requirements for ALL "standards" are:

First, a standard must have similitude. That is, it must be similar to that which it measures. A standard of weight must have weight, a standard of length must have length, etc.

Second, a standard must have stability. That is, its value must remain constant under all conditions throughout the system which it serves. An inch is exactly the same length whenever and wherever it is used.

Third, a standard must have commonality. That is, everyone in the system must understand and have, or have easy access to, the standard unit.

Gold Fails As Standard

If we compare any commodity, and most especially gold, against these criteria for a monetary standard with which to measure wealth, we find them to be woefully inadequate.

With respect to the first criterion, **similitude**, there is no relationship whatsoever. The value of gold is determined by its weight and purity. While the price of many commodities (coal, wheat, meat, fruit etc...) is determined by weight, the price of manufactured goods bears little, if any, relationship to their weight, the major cost factor being that of "labor".

With respect to the second criterion, **stability**, we find that gold is only chemically stable, that is, durable. As a commodity in a free market its price would vary in accordance with the law of "supply and demand". As a controlled commodity, its price has been less stable than that of the stock market, and for the very same reasons.

With respect to the third criterion, **commonality**, while many people have gold wedding rings and some have gold fillings, very few have any gold coins which could be used as money.

Thus, it is obvious that of these three criteria for ALL standards of measurement, gold and silver meet none of them as a monetary standard.

Incidentally, the "gold bugs" insist that money, in addition to serving as a medium of exchange and **measure** of value, must also be a **store** of value, which most of them erroneously refer to as "intrinsic" value. **But these are contradictory requirements.** Money, in order to serve its function as a medium of exchange, must be kept in circulation and the faster it circulates, the better it serves that function. If it is "saved" or hoarded, it cannot function as a medium of exchange.

Time And Money

Since no commodity has all of the criteria to serve as a monetary Standard of Value, what in the world does?

A clue to what this might be is given in Revelation 18:12, 13, which lists the treasures of end-time Babylon in descending order of value. The first are "cargoes of gold and silver" and the last are "slaves and human lives". Yes, the lives of men are the least valuable thing in Babylon. This does prove that we live under Khazarian/Babylonian rule today, when we allow a small club of unbalanced individuals to create paper-money with or without the support of anything to buy and reign over our lives with our consent; when we leave homeless and careless our fellow men under the pretext of lack of income; and send our finest young men to fight, suffer and die in the Anti-Christ Bankers' no-win wars and, even worse, permit helpless, unborn babies to be murdered (abortion) by the millions.

If the Khazarian/Babylonian system is to be overthrown, then its value system must be reversed. Instead of everything being measured by gold or silver, the proper standard should be the **lives of Humans**. And how are the lives of Humans measured? By "TIME"! Yes, there comes to the forefront the **FACT** that the only **REAL MEASURE** of value is somehow established based upon the time of Humans' lives, **or working hours, etc.**

The price of all things can be, and frequently is, based upon the working hours required to make them and market them. The price of something is often quoted in terms of the average working hours required to purchase it, especially in comparisons between different nations or time periods. In fact, this is the conscious or unconscious means by which everyone determines the value of anything to himself; how much of his life "time" must he exchange for it? Most everyone is already aware of the fact that "TIME IS MONEY". This certainly would clear out financial middlemen and predators right away. As well, politicians who spend their time running after material wealth, for example, would not be able to do that anymore. Everyone would find themselves at the same level, in labor area.

Standard Of Value

We could arbitrarily establish our monetary standard as one average human-hour of Labor. This new standard of monetary value would be called "Ki"¹³ and its 1% division "Kilia" (one cent of Ki), for obvious reasons.

How well does a Ki meet the requirements for a standard? Let us compare and see.

First, **similitude**. Labor time is the primary factor in determining the price of everything and also the value of everything to each person, as already mentioned.

Second, **stability**. There is nothing more stable than time, which remains fixed through all generations and Nations.

Third, **commonality**. Nothing is more common among men than time, which is distributed to all men equally; 24 hours a day and you can't take it with you when you leave.

Everyone understands time and virtually everyone has its standard of measurement on his wrist or kitchen wall. We measure and regulate our lives by "time". It is, in attachment to "space", the only separation of the species within the third dimension

¹³ Ki: Monetary unit corresponding to one (1) hour of work provided. Life force in terms of lifespan.

which is ours, so it seems logical to measure progress through that third dimension by our primary commodity -- "perceived time". For many things in our dimension, there is no other means of measurement. There is no value in money (Dollar, Naira, Cedi, Euro etc...) which we can place on the work required to produce a lengthy document, nor on the experience, discipline, communications, etc., required to study, research, analyze, understand, and solve a problem. The only cost that can be placed on the effort is the TIME involved to accomplish the final product. Thus, we will find that the KI not only meets all of the requirements for standards in general, but uniquely serves as a monetary **Standard of Value**.

Function

Ki only refers to the lifetime (life force) of Human. Kilia refers to 1%, a cent of Ki.

The Ki monetary system may be instituted by any governmental authority anywhere in the world and trade could be conducted with any other Ki-based economy at par, since all Ki would be issued against the same standard.

The Administration and money-issuing authority would print, **with a one year expiration date**, as many Ki as necessary to meet its authorized expenditures. These would be paid into circulation as wages to workers-servants of the Administration and to contractors for goods and services. The average wage paid would be maintained at the rate of 1 Ki/hr.

All products and services are also valued at the rate of 1 Ki per hour worked or spent and on this basis are carried out the exchanges between the individuals, the various community groups and between the latter and the Administrations.

With the Ki system, taxation to **PAY FOR GOVERNMENT EXPENDITURES WOULD NOT BE NECESSARY**, since the Administration would print all the money necessary according to the Constitution. As previously stated, the Ki would be issued with a one-year expiration period, after which they would become useless. *The ideal situation targeted here is a society without money, which cannot be trapped in a hoarding dynamics, accumulation of false wealth, so that products can rather be stored and exchanged on the basis of this standard of value.*

Adoption of the Ki-Kilia monetary system would produce numerous benefits:

A stable money system based on a Standard of Value which everyone understands.

Elimination of the present legalized system of organized crime, theft and slavery through usury.

Elimination of the tax burden by suppressing of taxes such as PIT (Personal Income Tax), VAT (Value Added Tax) and Corporate Tax, etc.

Elimination of unemployment, since sufficient money would be available to ensure the employment of each individual member of the Nation as contributors and servants-workers of Administrations, Industry and Communities of Life.

The three economic factors which are inflation, deflation and depression, the definitions of which follow, will no longer be possible in such a system.

Inflation: refers to a long-term, general, and self-sustaining increase in the prices of goods and services. Inflation is also characterized by the increase in the circulation of money (money supply).

Deflation: a general decline in prices observed over a sufficiently long period of several quarters. It is the result of aggregate demand that is not enough to absorb the amount of goods and services produced by the economy.

Depression (economic): refers to a serious form of crisis that is characterized by a significant and lasting slowdown in economic activity: production, investment, consumption. Depression is associated with lower prices and a sharp rise in unemployment.

2. Of Finance And Labor

Of Finance

A small definition of the term. *Finance* covers an area of activity that consists of providing the money needed to carry out an economic transaction. This area concerns individuals, households as well as public or private corporations, but also States.

The practices of international finance as we recognize it today are at odds with life and can only be profoundly remodeled for alignment with the philosophy of the new system. As the property and resources of the Nation belong to all equally, there can be no question of bank loans of any kind whatsoever made to the citizens for one need or another. The role of the Bank-Finance will therefore be to provide a means of

exchange, to see for the assurance and regulation of transactions between individuals and Communities of Life and the State.

A currency having no intrinsic value, no institution was it a State has the right to issue one to lend amounts to be repaid with or without interest. And this whatever the economic argument that can be provided.

Since there is no taxation or sellout of under-soil resources for reason of currency earning, nor the risk of inflation-deflation-depression, the State is empowered to issue as much money as it needs to its operating budget, inter alia for the payment of servants-workers of the Administration and workers-contributors of the public corporations and industry.

Funding is made available to all Communities of Life and Cities through the provision of funds or national resources according to the actual needs expressed. This will consist rather in an inalienable Divine right. There will be no question of borrowing money or being unable to finance a legitimate project. Everything being guaranteed at all levels, it will suffice to pool the workforce together for the Community and the Nation.

The entire global production being provided by the Communities throughout the National territory in a self-sufficient contributionism, each contributor will have everything he needs for a dignified and fulfilling life. The gaps or other extras will be filled by the system of barter-exchange between the Communities of Life. As for the workers-servants and contributors of the Administrations, they are taken care of by the latter in the same way.

The banking-financial system therefore plays a key role in the success of the rapid anchoring of the Systemic Autarchy. The scriptural monetary system Ki/Kilia coupled with a mechanism of exchange between the Communities of Life is the ideal.

Of External Exchanges

As has already been mentioned in previous chapters, the interdependency of the economies of this Planet is a major mutual risk of instability in the sense that just a 'little sneeze' somewhere along the economic chain and everything else is affected. Economies, such as those developing on the Continent Ka-AkhnAton, where everything is built on the exportation of products of cash crops and others, are destined to be ruined either with the depletion of resources or victims of an economic war by structures representing obscure interests.

Thus, foreign trade must be reduced to the strict minimum in the interval of the transition from the current to the new autarchic economy. They must rely solely on the barter/exchange system through bilateral negotiations. In case of impossibility, the financial mechanism of the current monetary system would be used through the services of the OITC (we will talk about it later), the only authority to deal with the Nations of this World in terms of finance and investment instead of the IMF, the World Bank and other clubs of Paris, Rome etc., completely illegal and criminal.

An economy well built on good new bases, on the principle of the Volitional Systemic Autarchy and all the prerequisites previously developed in the preceding chapters, will always stand regardless of external vicissitudes, since its very strength comes from its strong self-sufficiency vis-à-vis this outside deservedly.

Of THE OITC

Access to external investments and credits, if any, during the initial phase of the Autarchic System, would only pass through the OITC (Office Of International Treasury Control) which is a sovereign institution in charge for more than two decades of The Combined International Collateral Accounts of the Global Debt Facility. The management of this establishment entrusted to the three countries of France, United Kingdom and United States by the United Nations in the wake of the Second World War by the Trilateral Trillennium Tripartite Gold Commission¹⁴ has proved disastrous. This is a Divine institution whose political line is at odds with that of the criminal methods of the IMF, World Bank..., which from the onset were founded as outlaw organizations in total opposition to the stated objectives. It holds the real properties and assets of this world giving it the ability to play the true and right role in place of the current system of predation and bring balance and equity in the world of Banking and Finance. All the countries that freely and sovereignly request it, according to their statutes, are supported in the financing of all strategic and common interest projects by loans refundable in the short, medium and long term; loans that are converted into domestic debt and local currency regardless of the amount of investment. In addition, funds invested in principle will never be repatriated and will continue to benefit countries for generations. Check out the O.I.T.C website: <http://www.unoitc.org/>, and you'll see that everything is in place and functional. All that prevents this dynamics from setting in, is the criminal network of

¹⁴ From 1944/5-1994/5 *The Trilateral Trillennium Tripartite Gold Commission* (TTTGC - USA, France and UK) was organized and implemented, by the Nations of the World, with a Term period of Fifty (50) years. During this term period the Commission held the Mandate, Rights and Authorities over *The Combined International Collateral Accounts of the Global Debt Facility*.

Internationalist bankers who maintain the grip on men and state institutions of our poor countries, in the North as well as in the South.

It is therefore only necessary to have informed politicians who think outside the narrow box of the evil World Elite and take their courage and responsibility before history to effect the turn (180°) that is the right thing to do for the good of our Peoples as a whole.

Of Labor

1. Wage-Earning (Salary) And Taxation Slavery

The type of generalized welfarist government, the Welfare State, under which we bent on this planet is a parasitic development of the current contemptuous system of management of Human livestock used, together with the monetary economy and Wage-Earning (Salary), to manage and control Humanity in the interest of those who claim to "own" both our Humanity and the Planet. A state of affairs doubled by an absoluteness of the state as discussed previously. It is on the basis of this supposed welfarism that labor has been rendered a chore and an obligation in our so-called Human societies for the benefit of a handful of unbalanced individuals. Labor, supposed to contribute to personal fulfillment, social and individual well-being, has become a burden in this materialistic world to the extreme where God has become a misunderstood term, abusively pronounced at every turn in a perception almost exclusively egocentric.

The wages of these so-called workers are limited and arbitrarily capped, while they are exploited excessively by the proponents of the system who grant themselves masses of banknotes as wages among other benefits. It is these very workers who do most of the work required in any given area of life. Working 5 or 6 days a week without respite, 8 to 10 hours a day, for a monthly meager salary and this during virtually the most vitalizing portion of his life awaiting for a hypothetical pension for the rest of his life in decline, is nothing but abject slavery. People do not even have the time to enjoy the fruits of their labor, let alone Life in its first reality. Even the so-called big salaries are not other things than the fact of a system built around the ego stuck in a mould of pathological greed and stupidity. This last category is not at all spared by the brutality and malfeasance of this system within which they believe to be privileged.

Moreover, this political welfarism has produced a series of taxes to allegedly finance the operating budget of the State, Region and Commune by a parasitic infantilizing

system. These are outright to be put in the category of abuse and crimes against citizens and must simply be expressly abolished from state practices. As examples, we will quote here the two cases of VAT (the Value Added Tax) and the PIT (Personal Income Tax). The logical reasons are that VAT, for example, which is supposed to tax the added value produced on a given product or service, rather penalizes the poor consumer instead of the producer of the good. The citizen does not have to pay a tax to consume, in other words to spend his own money earned by the sweat of his brow. As for the PIT, it taxes heavily and unfairly the salary of the citizen under the fallacious pretext of social security. A salary is not a profit earned, quite the opposite of so-called added value, and therefore should not be touched. And we are talking about the current system of predation.

In fact VAT and PIT are a double scam in the sense that the wage income of the citizen is subjected to a withholding tax, PIT, on the one hand and indirectly on the other to this so-called value-added tax. It is imperative that within a State which has pretensions to be a promoter and guardian of the prosperity and well-being of the People, these abominations disappear. The comfort and prosperity among the People would guarantee welfare and social justice and consequently less, if at all, of government welfarism, risk of authoritarian deviation.

Life is much more than that. This state of affairs can only disappear if our ideal must be higher.

2. Of The Organization Of Labor

Communities of Life must be responsible for financing and providing their own primary facilities and services, such as local roads and transportation, schools, health care, local police services, etc., rather than to depend on a central authority that decides on the resources to be allocated to them for their own productivity and functioning and infrastructures to set up. Currently, the centralized system diverts very important resources away from communities to the benefit of unaccountable and highly inefficient national bureaucracies, military activities, and so on. Corruption, mismanagement and maldistribution of resources create a sense of dependency within the communities thus subjugated, as well as among the individuals that make up these communities.

So, the road chosen for the organization of labor within this Volitional Systemic Autarchy is projected differently and is presented as follows.

At the level of the Federal and States Administrations we will have:

- Workers-servants of the Administrations.
- Workers-contributors of public corporations and industry.

Within each Community, we will have the following socio-professional associations:

- Community workers-servants of Administrations
- Workers-contributors of Communities of Life

It is far more natural and far better to manifest a literally heavenly reality on Terra through this Divine Popularism (NE DUKEKLĚ) manifested through this Volitional Systemic Autarchy. The whole Nation, at the level of each Community of Life, is put to the task and this in accordance with the abilities and the aspirations of each citizen. It is here that Communitarianism and Individualism express themselves in balance and harmony in alignment with the Universe.

The organization of Labor within the Community is the key to the success of this society where unemployment is a concept that does not exist.

In the four areas of Housing, Health, Agriculture and Education, the Communities must develop a substantial autonomy and involve all the members in the productions and services required for their sustenance. This autonomy is coordinated and supported by the State under the control of the Federal.

The remodeling of the socio-economic system in an orientation of service to Life and fulfillment of the Divine creature that is the Human being is intended to allow such a thing. Since the economy has been restructured to serve only national interests and depend solely on its own material and human resources, there is no reason why not all citizens should be involved, each in its own community. Material sustenance is assured without the infantilizing, controlling, and degrading assistance of the State, as is seen today in welfare States around the world, and far more sophisticated in the Western world, especially, with this ABSOLUTE STATE reducing citizens to slavery of SALARY AND TAXATION.

It is more rewarding to have a civilization where beings are involved at all stages of production of goods and services with the same status, in other words, in an **Equal Interdependency**.

An investment of four (4) hours a day for four (4) days out of the seven (7) days of the week should be more than enough to provide for the material sustainment of the Community of Life. The other half of the time available is devoted to various leisure activities, to the family and above all to the Culture of the Soul Evolution, the primary goal of the Incarnational Experience of the Spirit-Soul. In this way we will be able to

say of a Community of Souls that it is finally aligned on this goal instead of the insane scramble towards obscure and unbalancing materialism.

3. Of The Form of Corporations

Of The Community Sector

The operation modus of corporations and industries must exclusively be that of common property. Every corporation must operate as a branch of the Community of Life, in other words on the basis of the community shareholding; there is no boss-worker relationship.

Common ownership and responsibility must be observed in all sectors of economic activity.

Of The Public Sector

The operation modus of corporations and industries operated by States is exclusively that of public property. All workers-contributors in the sector are associates or partners with the State in the management of public structures.

4. Of Public Maintenance Service

Some community work or services such as cleaning and maintenance of public streets and sanitary facilities, generally considered degrading, are not reserved for any specific professional class. These are provided by all members of the Community in turn. At all levels of the Administrations of the Federation and States, this system must enter into force, because it is the Divine Principle of equality of all things, Respect and Responsibility of each and everyone which are at stake.

The lifting up of the Perception-Sentiment-Thinking in the Collective Consciousness is paramount to the foundation and sustainability of an enlightened Civilization based on Divine Populism.

OF AGRARIAN AND LAND REFORM

"We know it: earth does not belong to Human, it's Human who belongs to earth, we know it: all things are connected, everything that happens to earth happens to the sons of earth. Human has not woven the web of life, he is just a thread of fabric, everything it does to the web, he does it to himself".

Seattle, Indian Chief Suquamish

One of the conditions underlying the realization of the NE DUKEKLĚ, the Divine Popularism, is a deep land and subsequently agrarian reform. The Planet belongs to all and has not been created by any particular person or group of individuals. There will no longer be a claim to ownership and selling of parcels or lands by a first occupant community, a family or an individual. The Peoples as a whole will retain only the title of guardians of the land and the State will be the Great Guardian.

Without Land there is no Human Society or Civilization. It is therefore of prime importance (vital) that we return to the enlightened Ancestral approach of welcoming and sharing with newcomers in a fraternal understanding. Better still, it must become again the community property of the occupying Peoples, for which purpose it was destined at the beginning. In other words, the purchasing and selling of Lands for any purpose should be formally banned as a practice and introduced into the Constitution. This concept of all commercial and all profit is therefore to be abandoned imperatively, and in this case with regard to the Earth, the very foundation of Physical Life.

The allocation and management of lands by the Peoples in the Communities of Life is one of the prerequisites for the success of this new enlightened policy.

SCIENCE, INDUSTRY AND TECHNOLOGY

1. Of Science

What follows is an Open Letter to the World of Science from Walter Russell. To get acquainted with the content will certainly help to enlighten the minds of men and, in particular, those of scientists on the erring ways of the science of this world.

"This Open Letter to the World of Science, accompanied by a Treatise on The Russell Cosmogony, is being sent to approximately 350 members of our National Academy of Science and Royal Society of London. 100 Universities, and 300 leading newspapers.

This announcement with its new concept of Light, Matter, Energy, Electricity and Magnetism is a simple yet complete, consistent and workable cosmogony which will enable future scientists to visualize the universe as ONE WHOLE, and will open the door to the New Age of Transmutation.

Recalling the important contributions I have already made to science, such as my work in completing the hydrogen octave and my prior discovery of the existence of the two Atom bomb elements given to the scientific world in my two Periodic Tables of the Elements, assures me that you will give serious thought and attention to these documents.

Present threatening world conditions make it imperative that science disclose the way whereby the weakest of nations can protect itself from the strongest of them and render attack by land, sea and air impotent.

This new knowledge will give science this power.

England could have been rendered immune from her devastating bombardment had the world been receptive to these new scientific discoveries which I endeavored to give to it when World War II started. Science, however, did make use of the two atom bomb elements mentioned above, which I charted and copyrighted in 1926.

*The world needs new metals. Many new rustless metals of greater density, malleability and conductivity await division in vast quantities from carbon and silicon. **These will be found when science discards its concept of matter as being substance, and becomes aware of the gyroscopic control of motion which will split the carbon tone into isotopes as a musical tone is split into sharps and flats.***

In the chemical elements, the sharps and flats are isotopes. These can be produced by man in greater numbers than Nature has produced them, for Nature does not begin to split her tones until she has

passed two octaves beyond carbon. *There is a tremendous opportunity for the metallurgist of tomorrow to create new metals in the carbon and silicon octaves.*

Of even greater importance to the world in this crucial period is the production of unlimited quantities of free hydrogen. This ideal weightless fuel could be transmuted from the atmosphere while in transit without the necessity of storage capacity.

These are the important things which might now be known if Kepler's discovery had divulged the facts of geometric symmetry and dual curvature within the wave field.

His law of elliptical orbits evidences that he was on the verge of discovering that four--not two--magnetic poles control the dual opposed balance of this two-way universe. With but two magnetic poles a three-dimensional radial universe of time intervals and sequences would be impossible. A balanced universe must have two poles to control centripetal, genero-active force, and two compensating poles to control centrifugal, radioactive force.

By means of such knowledge, science could rid the earth of fear of attack by any nation no matter how the attack might come, whether by land, sea or air.

This new knowledge will give to science the *cause* of all the *effects* which have for centuries of research deceived the senses of scientific observers.

Man has a *Mind* as well as having senses, but he has given preference to the evidence of his senses in the building of his cosmogony. Man can *reason* with his senses but he cannot *know* with them. Reasoning is sense-thinking--not Mind-knowing. He has also produced *effects* without knowing their *cause*.

The senses have not revealed to man that this is a substanceless universe of motion only. Neither have they told him the principle of polarity which divides the universal equilibrium into pairs of oppositely-conditioned mates to create a sex-divided electric two-way universe.

The time has come in the history of man when *knowledge* alone can save the human race. Man has for too long left The Creator out of His Creation, thinking He cannot be proven in the laboratory.

God not only can be proven in the laboratory, but because of the facts of that proof man can solve many heretofore hidden mysteries of the universe--such as that of the seed and growth--life and death cycles--the purpose of the inert gases as electric recorders of all repetitive effects--and the true process of atomic structure.

You might reasonably ask why I have withheld this knowledge for so many years. I have not withheld it. I tried in vain to give it from 1926 when I first published charts of the complete periodic tables herewith attached, up to the beginning of World War II when I tried to organize a laboratory group to save England from its unnecessary bombardment.

I also accepted and held the Presidency of The Society of Arts and Sciences in New York for seven years for the sole purpose of giving to the world this new cosmogony based upon a two-way continuous, balanced universe to replace the one-way discontinuous, unbalanced universe which is presumably expanding to a heat death.

During this period, I lectured upon the misconceived idea that hydrogen is the basic number one atom of the periodic table. I explained that there are twenty-one other elements which precede it and that hydrogen itself is not a single element but a whole complex octave. I also explained the impossibility of there being any element without an inert gas as its source. At that time I distributed my periodic charts to approximately 800 scientists and universities.

Further than inciting research which yielded so-called isotopes of hydrogen and heavy water, nothing came of my effort, nor did I receive the credit due me. Incidentally, those so-called isotopes are not isotopes but full-toned elements of an orderly octave group series. Isotopes do not occur in Nature until they reach the octave following the silicon octave. The reasons for this are fully explained in our Study Course.

I wrote two books, gave many lectures and set up a demonstration laboratory in a university to prove that the elements are not different substances but are differently-conditioned pressures of motion--and that the structure of the atom is based upon the gyroscopic principle.

As one after another of my discoveries appeared under other names, I acted on the advice of a friendly science editor to withhold any more of my new cosmogony until it was fully completed in words and diagrams, and again copyrighted.

It has taken many years to so complete it that it is invulnerable to attack, but this has now been done, and this present treatise is as complete in brief as the whole cosmogony is complete in detail.

I do not look for immediate acceptance of this revolutionary new knowledge.

I do hope and expect, however, that the seed of it will grow within the consciousness of science, and as I am nearing 82 years of age I feel it incumbent to announce the fact to science through this open letter and treatise that The Russell Cosmogony, which my gifted wife, Lao, and I have together written into a year's Study Course of 935 uncontradictable pages, and 182 diagrams, is now complete.

This course is now being studied all over the world and, through our students as seed, this new knowledge will ultimately transform the world.

It is with the deep desire that a higher civilization shall arise that I send forth this message to mankind. The day is here when Science and Religion must marry, or through ignorance of God's Universal Laws man will perish from the earth.

*Hoping that the world of science will recognize that this treatise has within it the answer to basic **cause** for which it has been so long and tirelessly searching, I am".*

Walter Russell

Excerpt from A New Concept of the Universe

The science of this world lost in anti-Divine ways has been for the most part at the source of the misfortunes of its civilization. Most of the conclusions drawn from scientific discoveries have been and remain wrong, leading the world into misunderstandings raised up as so-called scientific truths taught and passed down from generation to generation. Worse still, the applications of this perverted knowledge have led to inventions of technologies and devices of death while the best ones have been removed and hidden away from public knowledge. This is the legacy we maintain from Human science to this day. And that's all that all the so-called developing Nations are caused to copy or imitate. This is where the whole trap lies. Going in this direction maintains a dynamics and a competition of powers that cannot improve Life on Mother Terra-Urantia.

Atomic, Nuclear, Hydrogen and other bombs are only weapons of destruction, massive or not, whether they are considered defensive or dissuasive. Since on this road our civilization is assured of only one thing, a certain mutual destruction.

In terms of dissuasive defense, or possibly preventive, technology and other necessities for the ease of Life, Human genius helped by the Universal, Natural Science must constantly aim for the respect and preservation of Life. Thus, we must turn towards this High Creative Thought which can only show us the way of the Wisdom of the Universal Laws of Creation. This has been amply demonstrated in the New Concept of the Universe (A Brief Treatise on Russell Cosmogony). This route is that of the future of Humanity.

With this Science more aligned with the ways of the Universe created in the Perfection of the Laws of the Supreme Father-Mother, it is sufficiently proved that we can have all the raw materials, precious metals and other products, whatever the perceived disadvantage of the territorial situation of a People may be, without

coveting the wealth of other territories and seeking the domination of their Peoples. In addition, for the so-called countries naturally blessed with these resources, it is wise and imperative to develop skills through the mastery of this Science to leave Mother Terra-Urantia in peace and finally show her due Love and Respect.

Such a Science must be at the heart of the development projects of any enlightened People or that wants to walk the path of an enlightened Civilization; and with it, this Terra will become again the Jewel to which it was destined in this Universe within the Galactic Brotherhood of Light of the Higher Humanities.

The part played by the High Science will quickly achieve the objectives of the Volitional Systemic Autarchy. Namely the production ability of all goods necessary for the proper functioning of the Nation without going through a binding and unbalancing foreign trade.

*"Once in a while, in long century periods, some vast new knowledge comes to the slowly unfolding race of man through cosmically-inspired geniuses, or men of super-vision who have an awareness of the **reality** which lies beyond this universe of illusion.*

This new knowledge is of such a revolutionary nature in its time of coming that whole systems of thought, even unto entire cosmogonies, are rendered obsolete.

When each cosmic messenger gives such new inspired knowledge to the world, the whole human race rises one step higher on that long ladder of unfolding which reaches from the jungle of man's beginnings unto the high heavens of ultimate complete Cosmic Consciousness and awareness of unity with God.

Thus it is that man has ever been transformed by the "renewing of his mind" with new knowledge given to him since his early beginnings, through the Mahabharata and Bhagavad-Gita of the early Brahmic days, through such ancient mystics as Laotze, Confucius, Zoroaster, Buddha, Plato, Aristotle, Socrates, Epictetus, Euclid, Mohammed, Moses, Isaiah, and Jesus, whose cosmic knowledge utterly transformed the practice of human relations of their day.

Then dawned a new day of the gathering of so-called "empirical knowledge," which is gained through the senses by research and observation of effects of matter-in-motion rather than through the Consciousness of inspired Mind in meditation, which is the way that mystics and geniuses acquire their knowledge.

Since the days of Galileo this undependable method of gaining knowledge through the senses has served to multiply man's reasoning powers by teaching him HOW to do marvelous things with electricity and

the elements of matter, but not one great savant of science can tell the WHY--or the CAUSE--of his familiar effects.

If asked what electricity, light, magnetism, matter or energy is, he frankly answers: "I do not know".

If science actually does not know the WHY -- or WHAT -- or CAUSE -- of these essentials, it necessarily follows that it is, admittedly, without knowledge.

It is merely informed--but information gathered through the senses is not knowledge. The senses sense only EFFECTS. Knowledge is confined to the CAUSE of EFFECTS.

The senses are limited to but a small range of perception of the EFFECTS which they sense, and even that small range is saturated with the deceptions and distortions created by the illusion of motion.

It is impossible for the senses to penetrate any EFFECT to ascertain its CAUSE for the cause of illusion is not within effect. For this reason the entire mass of so-called empirical knowledge which science has gained by reasoning through the senses is invalid".

Walter Russell

Excerpt from A New Concept of the Universe

2. Of Technology & Industry

Technology is the daughter of Science, naturally. But if this is not the case in the Earth perception of the thing, it must become this way so that any invention stems from the understanding of this Science of Nature and aligns with it. Nature-aligned scientific education will produce innovative researchers and discoverers in terms of aligned technology.

The High Science will thus produce inventors of technology that will be used by the general Industry.

The logic remaining in the coherence, the industry thus brought to be based on this new Science, gift of the Father Creator to the new emerging Humanity through the Great Scientist W. Russell and his partner Lao Russell, must do everything in order to put the emphasis on the sustainability of industrial creations, and on Human in general, instead of the lure of gain at all costs by programming the rapid deterioration of things that we are currently experiencing as a completely unbalanced global civilization. This will dramatically reduce the production of various wastes. In the same vein, industrial production respecting the values of Light and Life must be

diverted from productions such as tobacco/cigarette and alcohol, among others, which constitute a nuisance to the Human body, a Divine temple.

In this dynamics, we need to set up industrial structures aimed at transforming our raw materials, reasonably used, for the National consumer, and National only, and allow or help others, if necessary to do the same and this until the new Science allows us to do better. It will never be a question of positioning oneself to invest and take hostage whole sectors of foreign economy. Knowledge must be shared in Brotherhood in alignment with the Law of Giving-Regiving of the Balanced Rhythmic Exchange of Creation.

As the Creator gives us, we must equally give. When we receive from Him, no material price is asked for, so we have the duty to regive to the other Individual or Community without any price and/or control requirement. Only in this way is a Balance maintained that allows the perpetuation and advancement of a Civilization-Humanity in the Light of Knowledge of its Creator. Because in this way we've come full circle and the Sacred Circle of Infinity becomes manifest in every aspect of all things that can only move towards and in more Divine Light.

This achievement lays the foundation for a Nation freed on the path of Sovereignty and Independence within the Natural Interdependency of Terra-Urantia ecosystem.

The industry must be operated by both the Community, the State and the Federation under a strict regulation which allows no deviation from the Divine and Subsequent Laws introduced in the Federal Constitution and incorporated in those of the States.

HOLISTIC HEALTH, PHILOSOPHY OF LIFE AND EDUCATION OF WHOLENESS

I. Of Holistic Health

In this Divine Popularist System, this new Volitional Systemic Autarchy, Health, Living Philosophy, and Education are to be put together as the central pillar of the global structure. There is no separation possible, all are interrelated. A Sound Mind in a healthy Body, they say, and rightly so. The Spirit creating reality, to restore health to the Spirit, undeniably projects a healthy manifestation in the density. And the health of the Spirit comes from the quality of his food. The teachings of Truth.

In the same vein, these three aforementioned areas constitute the skeleton supporting and sustaining the Whole. These are priority and sacred areas whose development

should not be played on the ground of any consideration of so-called economic development. This much-touted development can only be the fruit of healthy, well served and well-educated citizens. It is therefore illogical to deprive the People of education, good health, and proper nutrition under any pretext whatsoever.

As such, great Minds have already paved the way, an enlightened path, to a society free of disease and many other ills that beset us. These were systematically opposed, ridiculed and often murdered during their sojourn on Terra-Urantia. Only by following in the footsteps of the latter can the new Civilization be able to create a literal Paradise on Earth.

Excerpts from their works are given below to give an enlightening insight of how the thing is already at hand, if only our Humanity willingly and courageously wants to reach out to seize it.

Royal Raymond Rife, Great Inventor

"In the years between your mid-twenties and say, 1945, R. Royal Rife¹⁵ had developed a method whereby he could irradiate the little crystalline viruses with the specifically proper radio sound wave, and disrupt them without disrupting human tissue.

Orthodox doctors promptly say that is, of course, hogwash (or worse). Well, the next question for the "nonsense" crowd is to inquire as to whether or not they think you can destroy viruses with light or shake them to death? Ah so--next ask them what method do they use in the laboratories when "critters" are blown out their hoods when they are experimenting. WHAT THEY USE IS ULTRA VIOLET LIGHT WHICH IS NOTHING MORE THAN ELECTROMAGNETIC RADIATION OF A PROPER WAVE LENGTH.

Even on dense Earth, it is proven beyond anyone's misrepresentation, that electromagnetic radiation of a proper form can and will kill viruses.

Right out of the aforementioned Baylor University, came the public information that they had taken blood which was contaminated with herpes virus, with cytomegalovirus (which is a deadly thing in an organ transplant patient), and with AIDS virus. They irradiated the blood with laser light and showed that they could kill the virus without killing the cells. The cells were still viable but the viruses had been destroyed.

¹⁵ Royal R. Rife, an independent researcher, was born on May 16, 1888 in Elkhorn, Nebraska and died at age 83 on August 5, 1971, at Grossmont Hospital. He has authored a breakthrough discovery for the cure of viral diseases among others.

Now would that not somehow broach the very topic of electromagnetic cure of viral diseases? THIS, READERS, IS FROM WHENCE THE AIDS CURE WILL COME.

A simple machine, much more simple than your accepted x-ray equipment, can be utilized which will identify, based upon readings determining what kind of virus is present, and treat the human being with a frequency beam jolt which will destroy the virus contained within, not only his blood but throughout his entire body. It must be throughout the body to preclude reinvasion.

You can then eradicate, not only AIDS, but all other human retroviruses as well. They are nothing more than animal retroviruses running in humans. Persons can be cured individually and the diseases eradicated worldwide. You sure could clean up your animal herds as well.

The virus is a very, very minute little beastie that is very hard to see by any means whatsoever. Dr. Rife devised a method whereby he could visualize the viruses. Rife was a most gifted machinist and invented a microscope with which he could actually view viruses in the living state. The microscope had a magnification of 70 to 100,000 times in living tissue. These machines existed in fact, and two or three are still around today just awaiting eager minds and hands to bring back into perfection. It requires a whole concept change of thought acceptance, however, from your scientific community -- you see, things have not politically nor egotistically changed in mankind in those ensuing years.

Rife actually invented this machine and could view viruses in living tissue and also was able to determine the mortal oscillatory rate, which is the frequency with which he would irradiate the viruses in order to kill them.

Dr. Rife called the mortal oscillatory rate the MOR. He found that he could bombard the cell, devisualize all atoms save the virus and irradiate it with basically monochromatic light, which today you would refer to as laser light, the virus would "illumine", would absorb energy and emit energy allowing visualization, and then by increasing the amplitude of the energy input into the virus he could cause the virus to disrupt.

This is not only feasible, it is absolutely credible and workable.

Royal Rife's work clearly demonstrated specific frequencies associated with particular viruses and disease organisms. In addition, his universal microscope, using evanescent waves, or waves with only hyperdimensional components, had no wave length limitations on its resolution. Consequently, it could see directly into the virtuous state past the limit of the photon. Indeed, it could not only see the exceedingly small point cells that lie between ordinary cells and are just barely visible to the "best" orthodox light microscope, but it allowed visualization of some sixteen interested, deeper and smaller

levels of structures within the point cell. Nothing before or since has achieved such a penetration. There are two or three of these scopes around that can be brought into repair

Using this microscope he could see virtual state energy forces functioning and moving. The biology his microscope revealed was far beyond the state of biology today. It was unorthodox in conception and presented a great threat to your orthodox medical and scientific communities. If you are going to create and spread an incurable disease to fit your purposes you most certainly do not desire the cure to get there prior to the infection. Oh yes, that is exactly what occurred, little dreamers. With his scope, Rife could not only "see" the little varmints but he learned to manipulate and control the living internal structure of living electricity. Now please refer to the Nobel prize this past week for the ability to isolate a single unit of electricity and stabilize it. Honors be to that one. Learn what you can from that researcher-- you are going to find that electricity units are living structures.

Since interested levels of virtual state are also "higher" spaces, or hyperdimensional, Rife's microscope was the first and only instrument to allow vision directly into higher dimensions and observe the higher dimensional living forms.

In Rife's time such a thing was unthinkable to medical science, yet today with substantial evanescent wave technology already utilized in wave guides¹⁶ and with a well-developed body of evanescent wave theory, you could prove that Rife's microscope was capable of doing precisely what he and other scientists reported. But what happens? It is further hidden to cover the lack of interest and ridicule of the past actions. Perhaps nothing in history ever changes except the names and places.

It is important to note here for the less sophisticated reader: "evanescent" means to dissipate like vapor -- tending to vanish like a vapor.

Included in those exceedingly complex modulations and spectrums, every cell has a complicated electromagnetic radiation spectrum. An abnormal cell has an abnormal change to that spectrum. If you subtract the normal cell spectrum from the abnormal cell spectrum you have a specific delta that then, introduced into a normal cell, will convert that kind of abnormal cell.

When you have such a single pattern for cancer conversion, for example, you can irradiate a normal cell with it and turn that cell into a cancer cell. However, suppose you phase conjugate that cancer conversion single pattern. The phase conjugate¹⁷ replica will be the pattern that precisely converts that sort of cancer cell back to a normal status. With phase conjugate replicas of cancer cells specific delta¹⁸

¹⁶ A waveguide is a structure that guides waves, such as electromagnetic waves or sound, with minimal loss of energy by restricting expansion to one dimension or two.

¹⁷ Phase conjugation is a physical transformation of a wave field where the resulting field has a reversed propagation direction but keeps its amplitudes and phases.

¹⁸ Variation

frequencies are fed into the cells of a body having that cancer, the cancer cell's master cellular control system will modulate with these time reverse specific signals. That will return the cancer cells within the body to the proper master cellular control system of the animal.

Thusly, the cancerous cells will be immediately destroyed or reverted back to a normal cell. A very similar process exists for just about every disease bacteria and infectious agent, including the viruses of AIDS. As a matter of fact, the viruses are more easily disrupted due to their crystalline formation.

In the Soviet Union it has been proven that any cellular death and disease pattern can be induced by a specific pattern carried on an electromagnetic signal. If the target cells are bombarded with the pattern carrying carrier signals for enough length of time.

In Australia these experiments have been fully replicated and extended. These documents should be easily obtained, say by Cathie of New Zealand, and nab onto the researchers. In Australia they have induced cellular death and diseases between cell cultures at a distance of over a hundred feet -- a most convenient distance indeed. Unfortunately, these experiments, thousands of them, were done in military institutes; but I see no particular problem in obtaining them.

Scientists in West Germany have also replicated these cellular experiments. However, the important missing link is that these experiments have some unpublished data to be gathered; that portion was the corresponding Soviet work showing electromagnetic REVERSAL of cellular death and diseases conditioned by irradiation by phase conjugate replicas of the pattern carrying induction signal. Briefly: If an action in forward time induces a condition then the time reversal of that action will reverse the condition. (YOU SEE, YOU ARE DEALING IN HIGHER DIMENSIONS WHERE THERE IS NO SUCH THING AS TIME AND SPACE!) The concept is so laughably simple that it eludes you ones. The time reversal of an electromagnetic disease process is a specific electromagnetic healing process for that particular disease.

Rife's microscope could easily allow visualization of viruses for it could easily defeat the wave length limitation of the light frequency utilized.

It has now been proven, in your own physics studies, that the wave length limit in optical instruments can be violated by utilizing evanescence complex waves. Rife's microscope utilized such waves and thusly, normal light wave length was not a limitation.

When an instrument is utilized to make complex waves, it can also be utilized to make phase conjugate waves. Rife's microscope could also be utilized to determine the exact color frequency pattern associated with specific disease organisms. There is great knowledge herein for it allows for the exact matching of frequency patterns.

Well, Rife got the usual warm treatment by his fellow man in payment for his services. He was bound over into prison and when he was later released he was a broken and discouraged man. He lived out his remaining life in retreat and his death was hardly noted".

Master Cellular Communication System

"The intrinsic virtual state of cellular control has already been discovered and pointed out. This massive communication system controls all cells in a body and all the functions thereof. This is a "life electromagnetic" system. Your new researchers wish to call this system "Scalar", we have no objections, therefore, I will refer to this as SEM since you ones do enjoy your alphabet.

The SEM conductivity pattern is not through the electron shells of the atoms but is directly through the nuclei SEM pathways. The SEM pattern's organized signals, non-specific vector electromagnetic (EM) waves, which externally sum the zero vector on already existing waves, can be constructed for virtually any specific purpose. This includes the ability to destroy a particle such as a virus, cancer cell, leukemia, bacteria--anything within or without individual cells--these frequencies can be created which will actually alter the very DNA/RNA. Through this approach the immune system and repair system of the body or cell, itself, can be reached and manipulated selectively. Thus, the entire biochemistry and functioning of a cell, including its genetics, is totally engineerable.

Further, a specific "charge pattern" can be designed and utilized to charge up the nuclei of the biosystem to fabricate specific immunity response. This charge, once established, is then maintained by the "master" system to allow for permanent immunity--in other words, you change the master computer to include the new and reject the old data.

To understand this just stated concept, you need to know something about brain, mind and thought basic functioning. It has been isolated and described on your place sufficiently to scientifically organize it. It, of course, is crude in isolation for it is the etheric aspect of life itself and you ones are not given to understand it in actuality. The concept is sufficient for this discourse".

The scientific demonstration that has just been made in the previous excerpts proves that many doors are already open but hidden from public knowledge and especially whose concrete applications are not allowed for the benefit of the Peoples of Terra-Urantia. We continue.

Antoine Priore "Machine"

Priore constructed an electromagnetic treatment machine and demonstrated a close to 100 percent "kill" (cure) of all kinds of carcinomas, leukemias, etc., in thousands of laboratory tests utilizing animal forms. These tests were openly shared with American scientists as early as your 1960's. At the time of the research, the French government funded several millions of dollars for Dr. Priore's research.

Into a tube containing a plasma of mercury and neon gas (hold this combination in your hearts for Sir Russell will expand on this subject later), a pulsed 9.4 gigacycles wave modulated carrier frequency of 17 megacycles was introduced. These waves were produced by radio emitters and magnetrons in the presence of a 1,000 Gauss (the cgs 'centimeter-gram-second' unit of magnetic induction equal to the magnetic flux density that will induce an electromotive force of one one-hundred millionth of a volt in each linear centimeter per second at right angles to a magnetic flux) magnetic field.

Dr. Priore exposed experimental animals to this magnetic field during irradiation and a mixture of waves, some seventeen or so, coming from the plasma tube and modulating and riding the magnetic field, passed through the animal's body. Among other things, as plasma can convert a transverse wave to a longitudinal wave, also phase conjugate, time reversal waves can be produced.

Phase conjugated electromagnetic waves carry negative energy and negative time. They exhibit negentropy¹⁹ and move from disorder back to order. The proof is already in the hundreds of technical papers in non-linear phase conjugate optics in the orthodox scientific literature but ones continue to misinterpret the true definitions of terminology. Dr. Priore's apparatus produced a SEM signal with deliberately constructed, unfolded components including phase and conjugated electromagnetic waves.

Further, keep in mind that just to send out waves is inconsequential unless you have a correctly tuned receiver crystal for exacting frequency. You must integrate the information into a single functioning apparatus.

In his device, Priore internally structured the carrier photons themselves, making them vacuum engines. This structure contained the dynamic delta for the disease. By introducing these spectrum to a giant rotating plasma he then phase conjugated his vacuum engines and then passed these time reversed vacuum engines down and through a strong magnetic field which thoroughly penetrated all cells of the biological organism being treated. The scalar components that are the structured photons representing the time reversal of the disease were absorbed and re-radiated in all cells, charging up the nuclei of the atoms and organisms to some potential level of that exact healing and reversing pattern.

¹⁹ Negentropy is reverse entropy. It means things becoming more in order. By 'order' is meant organization, structure and function: the opposite of randomness or chaos.

In that way he passed a specific cancer reversal phase conjugate replica into every cell of the body, charging the cellular biopotential and producing a permanent healing delta onto the body's cellular master control system. In the process that cancels that in leukemia pattern, charging the nuclei was cancelled and discharged. The new time reverse charge also destroyed the cancer cells or converted them back into normal cells. That, my friends, cured the disease even in terminal instances--- all of them. Yes, I said ALL OF THEM!

Further, for the disbeliever; he could cure sleeping sickness and any viral disease, et cetera, et cetera. In other words, the process represented a severe stress against any cellular control system delta encountered. This caused a return to the normal cell's and master cell's cellular control system of the body.

But What Happens To The Normal Cell Who Happens To Be There?

Encountering the normal control system in normal cells there was no delta--therefore there was zero stress. Encountering the abnormal control system in tumor cells it produced great and specific stress on it and reverted it to the normal control system of the body's normal cell. If the cancer cell could not withstand the stress it died promptly. Thus, to a normal cell the Priore signal pattern acted somewhat soothingly as a stroking to normal cell structures and no interference occurred with the normal cell--- that is, one whose scalar control pattern is locked to the body's master cellular control system and in phase with it.

The Priore signal stimulated and stroked the normal cell but did not injure it in any manner. On the other hand, the scalar potential pattern in and of an abnormal, say cancerous cell, is out of phase with the body's master cellular control system and is not phase locked to it. Hence the Priore signal causes direct interference with the abnormal cell's independent scalar control system. The interference pattern constituted the reconstruction of normal energy directed to the cancer cell and also jammed its abnormal scalar life signals. This destroyed the cancerous cell by two mechanisms:

1. Physical energy was channeled directly into the abnormal cells causing direct mechanical damage, and,
2. The cancer cell, being an independent living "critter", had its scalar life-channel connected to his primitive mind which connected his primitive mind to his body, jammed and terminated.

Abnormal Returned To Normal

If the cancer cell was reverted to a normal cell by the Priore stress before being destroyed, it became just a normal cell and the Priore stress had no further effect upon it. Any disease with cellular, biochemical or genetic basis can be cured in like manner. Priore's method, for example, was clearly shown to be able to completely reverse fatty deposit clogged arteries and further, lowered cholesterol levels to normal even in the occurrence of abnormally high cholesterol diets.

Every cell of the body, however, even the hair must be irradiated and treated, that is, charged up with the signal for the disease pattern is located in every body cell. The master cellular control system is holographic. The pattern that is substructured and potential with its dynamic and oscillating component is in each component, that is, in each atomic nucleus, hence is in each and every cell. Every structural level of the body larger than a cell also has its own correlated pattern of modulation on the overall. The biological organism can regenerate lost limbs, for example, if it can utilize its natural recovery process in a Priore manner. Even though Priore's work was presented to the French Academy of Sciences, it was far beyond the group's ability to understand the device or its function.

I do speak here of the 1970s. The academicians knew nothing of scalar electromagnetics and phase conjugation and that is exactly what the Priore device was. More the medical world saw a phasing out of their very expensive services--a dual motivation to squash this unsettling crazy man.

Sad for mankind, in 1974 the funding was withdrawn just as Priore was completing a device which could irradiate an entire human body. It would have been capable of curing almost all human diseases. Ah, but then, you might not have been able to enjoy this plague and tribulation and the cycle ending would undoubtedly have been postponed. Man, unfortunately, rarely changes the probabilities in a positive way--just runs headlong into disaster faster and faster.

In that particular machine Priore utilized a lamp, in which 17 specific frequencies were mixed and modulated upon a 9.4 gigacycles carrier. The machine was large enough to irradiate humans over their whole body. It should have been capable of curing cancer, leukemia and AIDS in two, five minute irradiations -- a week apart.

While Priore was still in your dimension (physically alive), a major thrust was made to bring the device to market and into medical research and into utilization. The devices were to be assembled in France and then shipped to purchasers, who would be large research and development laboratories where they could be brought into local specifications. I think it is sufficient to note that "big brother" put a stop to the funding for the project and the work had to be shelved

It is a fact that such signals can reverse nearly every cellular illness or condition of the body. The program to produce the cure for AIDS in this manner only requires the necessary funding and the assembling of the persons (left un-named for obvious reasons) to do the job.

*Aton Micaël, The Christ;
Excerpt From The Phoenix Journals N° 8*

It is therefore obvious that we are in the presence of a system of iniquity within which no importance is given to Life except contempt and profit at any price against a background of intentional and well-maintained vampirism.

Not only does the so-called Modern Medicine not heal, but it kills the individual at his own expense. We pay to be killed by drugs and poisons from the pharmaceutical industry.

Scientific work has yielded wonderful results to produce sophisticated devices to simplify life regarding holistic health away from this Satanic commercial medical mess for the benefit of so-called Globalists and to the great detriment of Mankind.

The mere introduction of these simple and effective curative methods, discussed above, for the moment under the influence of both unofficial and official politico-economic censorship, will give our Earth Humanity immense possibilities of healing and fulfillment away from drug addictions. We will even see that traditional treatments with medicinal plants will become a story of the past, with these advanced technological capabilities.

Along with further education of the People on healthy and balanced nutrition, this will lead to the eradication of most infectious and nutritional diseases and thus a drastic and rapid reduction in mortality and extension of life. In this perspective, our reformed medical institutions can be reoriented towards specializations for the management of specific heavy cases until total Harmony reigns.

In all cases, everything must be done so that the development of these proven and simple curative methods is chosen as a top priority and made available to all the People.

This route, in a global approach, must inevitably lead Human Civilization towards the use of efficient tools such as Hypno-therapy,²⁰ Naturopathy,²¹ Chromotherapy,²²

²⁰ Hypno-therapy is the use of hypnosis for therapeutic purposes.

²¹ Naturopathy is an unconventional medicine that aims to balance the functioning of the body by means considered "natural": diet, aromatherapy, lifestyle, herbal medicine, manual techniques, exercises, etc.

²² Chromotherapy is a method of harmonizing and helping to cure certain disorders, physical or emotional, through the use of colors. Management is based on sensory organs, including sight.

Radionics (sound therapy) and so on. Combined with the use of Plasma Science applications, these wonderful, simple and available tools will enable Holistic Healing of any individual on Terra-Urantia, and rid our societies of pathogens created primarily by humans for the evil purpose of control and depopulation. The Holistic way is that of the treatment of the entity on the subtle and dense levels -- Body, Soul, Spirit -- that allows the return to life and service to Life in Harmony and Balance by freeing of the Soul from within. This is the Communal Body Harmony, the subconscious taking a crucial part in this process.

The New Science, therefore, has a vital part to play in this new Civilization of the dawning Cosmic Age.

The Soul is in great need of a massive healing from the multi-millennial erring ways fomented through the misleading teachings to which it has been fed for so long as to lose the thread that leads to the Truth and the very Reality of the Nature of Life. .

A large recourse to the works of Walter Russell, Antoine Priore, Royal R. Rife, Nicolas Tesla, to name but a few, is essential. Fortunately, there is no need to start from scratch.

Of The Living Philosophy

Here again we are going to draw on high sources of undeniable teaching of truth to lay the foundation for the philosophical-spiritual orientation recommended for the Enlightened, Free and Sovereign Civilization as projected by and for NE DUKEKLĚ, this Divine Popularist System.

Religion, Philosophy, Freedom/Liberty, and Sovereignty must find a common ground anchored in Divinity out of the Anti-Christ lies schemes shoved down the throats of Terra-Urantians. The following texts show and demonstrate in simplicity the absurdities in which our Humanity has been wallowing for too long.

*"ESU talked of Nature and of the God who clothed the lilies of the fields and valued the smallest sparrow. He denounced the law and the prophets and, ignoring the imaginary Khazar "god" who was presented as being external to his creations, Esu talked of a different God who was within and Father to His creations. The message of Esu was that perceptive people would realize they were of the Father. He said, "I am in the Father and the Father is in me". He told people they could go against the law and that was not important, they could go against what they called "god" and that was not important, but **if they did not heed the Holy Spirit that was WITHIN them, they would be eternally damned.***

In simple, bare, inexact human words, there has never been a clearer statement of individual sovereignty. But Esu was placed at the weather front of masses looking for a messiah--looking for a leader of manipulated masses, a new spokesman for the imaginary "god" they had invented. They thought only of fighting the Roman culture of manipulated masses with their own, even more extreme, culture of manipulated masses. Human words were inadequate for something as important as Esu wanted to say.

When He had said all that could be said by using inexact human words, He had to accept the bitter cup that words alone do not establish a culture. With courageous resignation He faced the fact that, even though the people around Him would not accept a culture opposite to the one that was leading them to damnation, He could still make a full statement to the whole world regarding that which came from the Holy Spirit, or Father, within Him in the language of the *REAL GOD--in the language of Nature's God*.

He told his disciples that His time was approaching but that their time was yet to come. He planned to precipitate a battle in which they could take sides. He said to them, "Sell your coat and buy a sword."

Then in the language of Nature and Nature's God, He spoke. As one who had violated no specific law of the mass manipulators--but as one who had denounced their total culture -- He openly confronted the mass manipulators with full knowledge of what would happen. Having publicly proclaimed the sovereignty of an individual, He placed himself so that as an individual He conspicuously stood against the most clearly defined culture of manipulated masses that existed anywhere in the world, a culture that will tolerate no one who rejects the law and the prophets, a culture that will tolerate no one who obeys only the Holy Spirit within.

Esu deliberately walked into a situation where He foresaw that his crucifixion would clearly show the mortal opposition which exists -- unreconcilably -- between the two cultures. In the language of Nature and Nature's God, His crucifixion proclaimed to all the world that the opposition between the two cultures is mortal and eternal, that compromise cannot be made, that one of the diametrically opposing directions must be chosen.

Crude, inexact human words do not pass the boundaries of different peoples and are seldom fully understood. In the universal language of Nature and Nature's God, Esu made the most significant and most eloquent statement ever made to the whole Human species.

The Khazars tried to ignore that statement. When they discovered that they could not simply ignore it, they tried to kill off everyone who tried to point out the significance of it. The Romans saw its significance and gave the Khazarian gangs license to exterminate Christians -- no more and no less.

Then one of the Khazarian butchers, Saul of Tarsus, came up with the idea of twisting the story backwards and actually making it support the Khazarian culture of mass manipulation. Each now takes active roles in setting to straight the historical errors of experience and some will fail -- again; but ones of Godly intent shall surely succeed.

The imaginary primitive "god" which the Khazars had invented purportedly demanded bloody sacrifices of the first born and finest before he would forgive their "sins". Everyone had heard Esu say, "I am in the Father, and the Father in me". Many had said that Esu was claiming to be a god. Saul conceived the idea that people could be made to accept Esu as the son of the imaginary "god" the Khazars had invented, and accept his crucifixion as a sacrifice that the imaginary god's law demanded for the salvation of all who had not obeyed that law".

*Esu Immanuel Sananda
Excerpt from The Phoenix Journals N° 28*

And the following:

"The religions in your world are man-made and find their premise on age old renditions of those who came before as divine emissaries to teach and reveal the word of God. God sent many of his ones to bring enlightenment through the spoken word yet seldom were the teachings recorded accurately; and have been tampered with by those responsible for its translations and dissemination. The words are barely recognizable to the ones who gave them initially. Always was the word given in a way to inspire understanding yet seldom were they understood. God therefore continues to send his messengers to repeat the word and to render further truths through various projections so man's understanding might be reached in measure to grasp the truth.

Thus throughout the ages men of authority took it upon themselves to distill doctrines from what was taught and convert them into teachings to be religiously followed by those who became followers. Religions therefore have become manifestations of beliefs and doctrines crystallized in records which bear not the original thoughts or natural words but condensed and re interpreted versions.

Man-made religions are 'tradition based', finding their credibility in those who hold themselves out as authority for the beliefs and teachings espoused by the religion. They are sectarian in nature and appeal to the minds of men through the use of symbols, ceremony and established creeds.

Those who subscribe to the religions of tradition find security in the chosen system of beliefs which provide directives for living. Religion plays a supportive and crucial role in the lives of these ones whose experience in mortal form is underpinned by the dated beliefs and doctrines taught to them. It has become a safety net for many who wholeheartedly accept them as truth without any personal input or experience of what they tend to follow.

There exist truth in the some of the teachings espoused by each religion and you may even find some common ground amongst them; yet they do not represent the whole truth. God often spoke to the readiness of the mind of the receivers. As messenger after messenger was sent, greater truths were revealed to accord with the receptivity of man and his abilities to comprehend; and what was taught before was projected in new and revealing ways.

The reality is that traditional religion has capsulated truth of what is recalled and projects it as a Gospel. I say to you that the gospel as given is incomplete and erroneous in many ways. Those who seek truth will not find it wholeheartedly in the realms of traditional religion but must seek it elsewhere. Man's understanding of religion has become an inherited one, as he assents to what is placed before him as a bestowal of truth.

Those born into religious families will be conditioned by the precepts of that particular religion without a choice. Those who are independent minded will however grow in awareness and be led to seek beyond the mainstream to find his truth.

What really is religion? Your religion should be your way of life. Religion should therefore be a way of life or living. Where does life exist? Is it not in the spirit which is eternal? If religion is a way of life and there exist life only in spirit; then should not man's religion be the way of spirit instead of a proliferation of sects espousing various dogmas without knowledge of truth of spirit.

If man is to find God through 'a religion' and God is pure spirit, then surely the way to God is through the knowledge and experience of spirit. Religion should be a way of life founded on spiritual truths discovered by each individual on his/her mortal journey. The revelations of spirit through the temporal experience enable man to discover and know the presence of God within himself and to feel the divine presence within him and as part of him. The religion of spirit will reveal to man his oneness with God whilst the traditional religion teaches of a God who is over, beyond and above his children.

A new religion has been dawning for some time now and many have found their religion in spirit and in so doing have discovered God within themselves and many are choosing to exercise their free will choice to manifest the presence of God through their mortal journey.

It is the discovery of God within and the choice to manifest HIM that will initiate the career of the ascending mortal. The spirit of God within inspires man to a higher understanding and will provide insight into realities of the life and ways of spirit. Man is then able to express God's ways in his living as the fruits of the spirit become the values by which his life is moulded. He will come to know and grow into his moral worthiness as he embraces the light of God within himself and became drawn to all that light offers instead of being motivated by guilt and fear to uphold the values of God.

The religion of spirit is revelatory in character. One of its greatest revelations is the existence of God's love in man's immortal soul. Man will come to know God's love and will know love as God and God as

love; and eventually know God as himself and himself as love. He will, in his search for truth, discover that love is all there is and God being love means that God is all there is and in that knowing there will flow awareness that man and God are one. In spite of what man's senses perceive, man will discover that there is no separation. As he begins to know God and feel HIS presence within himself, he will eventually know the wholeness of love and he will develop the ability to manifest God's love.

Inherited or traditional religion may teach about love and even provide directives on how man should love but this will be no more than an intellectual understanding based on mind awareness rather than spirit awareness. To know, to understand, to experience, to have, to hold, to retain, to live and to express love you must feel unified with God's love that dwells within. It is only through the experiences you have on your mortal journey that this unfolding can occur.

True religion therefore cannot be taught but must be discovered through the mortal experience combined with the motivation to seek truth. It is only then that man will come into remembrance of who he is, as this awareness must dawn from within, so that he may be bonded to the experience and know the revealed truth and remain unmoved by what others tell him is truth, whether or not it be so.

Man has taken this mortal journey to have an experience through which he will discover himself and in so doing experience a release of his faith. This faith shall be the rope which leads him to the pinnacle of himself, should he be able to retain hold of it. Faith when discovered through experience will become the inevitable accessory that will facilitate attainment. What man begins to know through spirit revelation must be anchored in his faith lest he falters when the exigencies of life threatens the foundation of his knowledge.

The religion of spirit will always work through inner discovery; and this perpetuates a feeling of certainty and allows for that feeling of security that within you lies all that you seek.

The religions of your times are outdated and static in many ways. It preempts the fresh winds from passing through the minds of its followers that real discoveries and revelations of spirit may be enjoyed. It numbs the minds of followers and curtails their freedom to question and explore beyond the projected 'Gospel'. It holds on to what has been rewritten from generation to generation as truth. It seeks to convert and dominate through authority rather than liberate. It keeps its followers stuck in paradigms and practices that do not field spiritual growth. It breeds differences between sects and superiority of one's belief or doctrines over another. It teaches love and tolerance yet is marked by division and disunity.

It deals in the finite; being that which is recorded as Gospel from cover to cover of a 'book' without an appreciation that God in HIS infiniteness cannot be limited by words on paper and cannot be experienced through the written word. The existence of God, the goodness of God the reality of God

cannot be derived from what someone else tells you or what is recorded. It is to be discovered through myriad, vibrant mortal experiences.

Indeed man must intellectually comprehend God's processes and the science of creation but to know God in spirit man must experience him from within. Man cannot experience God through his outer senses but through his inner faculties that bear knowing.

The religion of spirit offers freedom, the ability to retain one's sovereignty, control over one's life, impetus to seek truth of God and self and the ecstasy in discovering the depth and breadth of spirit's knowledge.

A religion based on spirit will unify the hearts of men through the love of God and provide the knowing that God is individualized within each and therefore each has identical God presence within. It does not dictate or decide what one should believe for it thrives on progressive revelations. It allows for experiential insights whilst it leads to a shared or common understanding of the oneness and brotherhood of all, the sole destiny of the ascending mortal, the reality of the ONE will, a determination to accede to that will and the realization of self through service.

The barriers that have long held MY children in bondage will be dissolved in the wake of the ascension; for it is through this process that the spirit presence within each will find its resurrection in truth.

Welcome home MY little ones for the spirit of truth within each of you will be awakened and in this you will find your new religion".

The Creator Source

And here are some Divine Principles to consider on our evolutionary path.

"To bring blessings upon yourself, bless your neighbor.

To enrich yourself, enrich your neighbor.

Honor your neighbor and the world will honor you.

To sorely hurt yourself, hurt your neighbor.

He who seeks love will find it by giving it.

The measure of a Man's wealth is the measure of wealth he has given.

To enrich yourself with many friends, enrich your friends with yourself.

That which you take away from any man, the world will take away from you.

When you take the first step to give yourself to that which you want, it will also take its first step to give itself to you.

Peace and happiness do not come to you from your horizon; they spread from you out to infinity beyond your horizon.

The whole universe is a mirror which reflects back to you that which you reflect into it.

Love is like unto the ascent of a mountain. It comes ever nearer to you as you ever come nearer to it".

The conclusions to be drawn from what is stated in the preceding texts cannot therefore be disputed, given the state of our world and the essentially criminal and misleading role played by the so-called religions, whatever they may be. A paradigm shift is needed for our civilization lest we lose control of ourselves at a point of no return.

A new Living Philosophy for a civilization that takes a lighted path in Harmony with Creation must be based on the wise sorting of truths derived from the ancient teachings contained in all the religions on Terra-Urantia purged of their corruptions and merged into the high teachings that show our Humanity the way back to his lost freedom.

We prefer to the term religion that of Living Philosophy because this road will see and the clergy and the entire organized religious structure disappear for the benefit of integration into the educational system and the community and family circles of the high values of Universal Laws and the High teachings that lead to wholeness in fulfillment of Being.

FREEDOM and SOVEREIGNTY for which we all yearn, will become manifest when the creature, which we are, will begin to identify with the Creator at last, that is to say, will be in the knowledge of Self as God and of God as Self, and will act accordingly in the respect of the Universal Laws that he himself incarnates. In this respect, religious and spiritual practices, whether traditional or not, are in great need of being set to right and with the new knowledge of Truth, certain adjustments will be made to theories and precepts that have been corrupted and undermined by millennia of reign of the darkness in the Human consciousness.

Thus, the only approach aligned with the Universe is the returning to Self. The returning to the Divine Self. That which creates and IS the Unity of Creation and creatures and which dwells in ALL. Since the Human being is fundamentally made up of three levels of being: the Conscious being, the Subconscious being and the Superconscious being, understanding their roles and inter-reactions is essential for a proper functioning in clarity of the high understanding of the Universal Laws, in which we exist and by which we evolve.

This is literally a RE-EVOLUTION.

No one Community, no one People can speak of Freedom, Self-Knowledge and Sovereignty if its individual components are incapable of recognizing and embodying these qualities.

3. Of The Education Of Wholeness

This area is one of the pivotal pillars, if not the central and vital one, of Sovereignty and Freedom above all else. On the one hand, education will become free, natural and materially secured by the Federal and Federated States and the Communities of Life constitutive of the Nation. On the other hand, a profound reform in terms of Quality must be conducted in terms of content, 'container' and structuring. This means a 'demining' and a sorting to be done in the educational curricula, as well as a reorientation and re-structuring for a custom-made service to the National and Civilizational Cause as well as the improvement of the infrastructures, salubriously and esthetically, which are meant to host the students. Classrooms and school enclosures should be built in such a way that they have an optimal room temperature that is conducive to mental focus during learning, especially when living in heatwave areas.

Since it is the individuals who make up Communities and Nations, it goes without saying that the set of values we inculcate to our children, progenitors of the future generations, through the official educational system, the social and spiritual beliefs, must be reviewed for anchoring in the individual and collective consciousness. By integrating new positive values we can and will raise the Soul of the Peoples.

Alongside the introduction of new and more adequate and simplified programs, a new system of training and evaluation of the Being will have to take root in place of this jumble of nonsense and intellectual garbage which ended up to render us sterile, completely disoriented. Souls in incarnation are each on pathways of specialization and the purpose of their presence on this plane is that which must be identified and served, after or with the acquisition of an essential common basis.

The scholar cannot survive without the manual worker. But the opposite is more than obvious. The scholar without the Divine is but a machine tangled in mental combinations without Light. Moreover, the scholar and the manual without the Divine Presence are nothing but human robots with no direction and no intelligence. If all individuals were to simultaneously manifest these two facets of intelligence and deal each autonomously with all their needs from the first stage to the final stage, there would be more respect and therefore less problems of egotistical perception. But as this certainly could not be the case in general, since there are

multiple stages-processes in each discipline-domain of the organization of Human life, the Divine Order and the very intelligence would require that the tasks are distributed. We must be able to reintegrate these simple values of social life into our curriculum and reinject respect in that.

In this new path taken by the Educational System of AkhnAtonite Peoples, the school institution and the infrastructures will have to get closer to the citizens, and, from this point of view, they should be established and managed by the Communities of Life and under a shared control with the State. This means that schooling both primary, secondary, technical, university must be blended as a whole designed to train and educate on the same campus, otherwise on two campuses. One for all pre-academic disciplines and the other for all academic disciplines.

The establishment of study schedules setting aside mornings for purely intellectual activities and afternoons for artistic and sports activities would be more effective. This in order to move towards a balanced model essential to a harmonious development of the Being. Less futile brain tamping to the benefit of greater quality at the material, pedagogic and philosophical levels.

Graduate trainings and studies must be set aside for the benefit of **Effective Practical Knowledge**. The quality of teachers must be given due consideration because here, more than anywhere else, lies the future of whole Nations. The teaching itself will have to combine pleasure, joy and discipline and focus on the restored history and the values of civilizations, black in this case, the Living philosophy (spirituality), physical training, the arts, the scientific and technological research, and other Cosmic matters.

As for teachers, their choice must meet the requirements of competence, it goes without saying, and of aptitude much more than any other consideration of acquired intellectual knowledge. The disposition of ability to transmit knowledge with love and passion must have primacy.

OF THE TERRITORIAL DEFENSE

1. Of Armed Forces

The military institution will now finally play its crucial part in the defense and preservation of the interests of Nations. Demilitarizing the Nation, given the current and past excesses, for supposedly dedicate resources to the development of a country cannot be a solution of wisdom, given the warlike nature of interstate relations of this

world and international gangs of criminals who are well-established and troll the antechambers of the powers.

It is of primal significance to quickly build professional armies of brave citizens committed by vocation and conviction, and equipped with adequate means to conduct their mission. Without a strong, well-equipped and trained Army with a high national consciousness, of humanity and loyalty, for an effective defense of the territory in the face of the most common threats, any national or continental reform and renaissance politics will be in permanent danger of being short-circuited by powerful external dark forces in search of planetary control. Coherent and well-balanced institutions and a powerful, well-equipped army, supplied qualitatively and quantitatively to ensure the incapacitation of any external and internal enemy, will be one facet of the keystone of this massive undertaking.

In the same spirit, a practical and realistic alliance should be forged with more scientifically and technologically advanced States, militarily speaking, in order to receive the necessary assistance that will quickly give us adequate defense capacity against the continent's age-old predators. There are States standing out from the Evil Axis that plagues our world and they are to be taken into consideration without false pride. But most important of all, the new states will have to set up a research and development structure for new type of weaponry that would render the Military much more humane on the defensive and offensive levels than what is currently the case on this world. Above all, the AkhnAtonite States must quickly join their military forces within a **Confederal Continental Political** structure in a dynamic of unity and defense of the continental territorial integrity far from any harmful influence.

It is therefore imperative and undeniable that our Armies will have to get rid of Military Paternalism from abroad and thus of the secret agents of the Colonial Armies disguised as volunteers widely infiltrated. For the so-called French-speaking States, it is very crucial cutting the cord with France and minimizing relations with the latter for some time with the aim of healing the wounds and have free rein for the reconstruction of Greater Transnational Federations. This is certainly also true for all other States of the Continent, make no mistake.

The military organization needs to be reviewed and re-structured, that is to say a correction for a more efficient simplicity far from the psychological and bureaucratic confusion of the so-called modern times. Not only must the plethora of ranks distributed with or without merit be replaced by something more clearly and simply hierarchical, but the level of intellectual and operational technical knowledge must be raised in general.

We could return to a military hierarchy composed of only one class of officers: Generals. Their specialization will determine their function. The management of the troops and the various military posts is assumed by Generals with the rank of Commanders.

2. Of Civil Defense

At the same time, it will be necessary to institute a Civil Defense involving the whole Nation as much as possible. This will be of a character other than the mandatory military service commonly observed. The National Civil Defense will transform all capable, trained and prepared citizens into active protectors of the Nation on a daily basis wherever they find themselves in addition to the Standing Army.

This strategy will make it possible to respond adequately to situations of war and destabilization of any kind and infiltrations of the subversive type where regular Armies are too quickly overwhelmed. And finally, this engages responsibility and the process of empowering citizens in this area.

LIGHT BEARERS: DIRECTION & STABILIZATION

One of the most important points is the necessity of the emergence of a group of conscious servants of the Divine, as discussed in Chapter 3 above, taking on the role of ANCHORS OF LIGHT within the Nations. The endeavor will be that of anchoring daily in the grid of collective consciousness of Terra-Urantia the cosmic energies of the Source-Center of Creation, the Universal Father-Mother, from various places, physically or spiritually acting in unison.

At this point, networks must be formed through which global meditation sessions are scheduled at specific times agreed upon in order to direct a sustained fire of Light in and around the globe as a whole, specifically towards the places deemed to be negatively charged, the key institutions where the dirty work is planned and executed. Each can also individually do it according to his own rhythm.

We, the People, are going to have to collectively redefine the global strategy of the fight at the spiritual level without any form of separation, hierarchy or supremacy with respect to any (material) level whatsoever, everything being intimately interlinked. We must turn our sight towards the power of the sacred fire housed within our beings through daily meditation. Our various daily or weekly prayers must

be transformed into conscious meditations in an intentional communion with God (the Christ) in us, during which we send Light, positive thought-forms with the pure intention to heal, to boost, and to raise the collective consciousness of the Peoples so that they find sufficient inner clarity, unity and wisdom to stand up and face the reign of terror imposed upon them, and reverse the balance of power in their favor.

This, set in motion, will finally bring to the foreground an Ability to properly Respond to the evil that we face by finally using our creative powers coordinated at the two subtle and material levels of reality, and activate a consequent Divine assistance that alone can help us to get out of the evil abyss.

AN ENLIGHTENED LEADERSHIP MOVED BY SERVICE ONLY

The best organization or Human institution conveying an ideology of the most grandiose, as we know it, is solely worth the quality of the representatives who are its bearers.

Therefore, the quality of leadership is of paramount significance at the success of the Establishment of the Enlightened System, which is at issue here for a liberation from the yoke of oppression and enslavement of Humans by other Human Minority comfortably settled in the ego. Just as the current leaders of the world are almost all distinguished by their membership in secret dark organizations of Luciferian obedience, despite tricks outwardly expertly maintained of divisions and disagreements left, right, center, center-right and center-left, opposition and power, the new leaders who in truth embody change and total rupture with the old established order, must know what for and against which they are fighting in reality and focus on the common interest, the real targets, and the education of the People towards a more acute sense of political issues and LIFE PURPOSE. Amateurism, selfishness (the cavalier seul) and vanity (complacency) must give way to something much more professional, impersonal and truly timeless.

Some have to step aside for others more up to the task of leading the Popular Barge from outside, since there is a colossal inner work to be done as well. The inner has primacy on the outside and this in every sense. One does not put oneself at the service of a People to reap personal material or immaterial advantages. We do it for love and dedication. And if that is really the case, what should be sought above all is the support and participation of the People and the People alone before any other political and economic considerations. This is what gives weight and authority to the leaders representing the aspirations of the People, forcing the respect and worry of the usurpers who will eventually surrender for lack of tricks and resources dried up by the

constant waves of Love and Light which constantly are flooding into the collective consciousness, causing awakenings and turnarounds for the good of all.

From the moment a clear political line and strategy are adopted and followed in the interest of the People, who may not always be conscious and convinced, confused as they are, of the relevance of certain steps and actions taken, the events, the task coordinated by the Divine Father-Mother will eventually overcome their reluctance and uncertainty provoking their total participation. The path is therefore drawn herein for those who make the conscious choice.

A MONOPOLAR POLITICAL DYNAMICS

This dynamic is succinctly well summarized in the following terms:

What is done and achieved locally is what is promoted and projected on a global scale.

The External and Diplomatic Relations revised must therefore be defined to achieve this goal.

Independence of the individual leads to total dependency upon the Self, the Divine Self within us. And this is the foundation upon which the Nations must be built as an Interdependence Matrix which we call an Enlightened CIVILIZATION, since what is true for the Individual is true for the Nation. The notions of independence and dependency, and therefore of *Interdependence*, cannot be mutually exclusive.

Such a Civilization founded under the authority of the Creator cannot take a path other than that of a Fraternal Unity embracing all the Peoples of Terra-Urantia. This chosen route will be defined on the various political planes in a coherent and consequential logic as follows.

1. On The Sub-Regional Level

On the Sub-Regional Plane, the undeniable approach is that of the constitution of large and powerful perennial and reliable Federations. The eventual evolution of these already coherent and structured Federations towards a great Confederation of the United Peoples of Ka-AkhnAton may be then accomplished following a simpler process, and consequently easier. The model of Volitional Systemic Autarchy must

then be systematically observed at the level of all the Federations on the Continent, and this is what is desirable for the entire Planet.

The process must go imperatively through the initiative of the first countries that have the political will to take this step without waiting for the others to join in a collective decision. To hope to go all together in this generalized sociopolitical imbroglio purposely maintained by invisible hands, is irresponsibility, immaturity and political blindness, if not outright conscious sabotage. We cannot in any way envision a real Re-Evolution towards Self-Sufficient Sovereignty in Ka-AkhnAton outside an integrated and sufficiently vast transnational territorial space. It is not imperative to achieve this at once on continental scale, quite the opposite.

We are still lumbered with the heavy consequences of the psycho-military-political ploys put in place by the so-called colonial powers, shortly before the so-called independences, which have systematically undermined all efforts of the countries of the Continent to move towards more consistent and viable forms of union. Three countries more or less, preferably with a territorial continuity, going in this direction would break open the bolt of inertia insidiously imposed.

2. On The Continental Level

On the Continental Plane of Ka-AkhnAton, the building of large and powerful Sub-Regional Federations, once completed, will lead us to a balanced Ka-AkhnAtonite Continental Government in its effective representation of the Peoples. The evolution will be done towards a great Confederation of The Peoples in a first step before a final form of FEDERATION OF UNITED PEOPLE OF KA-AKHNATON. It is this model that we plan for the Planet at this stage of our vision of things of the path of LIFE. This will make LIFE easier and more attuned to SERVICE in LOVE and LIGHT, thus removing us from the ignorant follow-up and amateurism observed previously in all initiatives on the Continent.

3. On The International Level

As for the International Plane, in line with the prescribed Monopolar Political Dynamics, we must make an alliance with and support all Nations dealing with the dark forces that are sowing division and misery all around under the pretext of democratization, globalization and freedom, and coordinate our actions and efforts with those of other Nations in favor of dismantling or re-establishing of the UN,

which has been a Satanic tool from the onset. The League of Nations was no other than a precursor of this failed attempt to establish an instrument prelude of a World Government.

The new International Organization will have to be a high place of permanent interactions and researches leading to a Harmonic Convergence of the Nations populating the surface of Terra-Urantia.

The UN and all the organizations that are branches thereof, the IMF, the World Bank, the WHO etc., must be dismantled.

4. Of The Globalization

Globalization or One World Government. Just more of the same. This is the leitmotiv in vogue buzzing in all speeches politically and intellectually correct. And the media have a great time doing so by resuming in a chorus, almost every day without any critical sense, those concepts that the poor citizens have come to assimilate without really understanding what it's all about.

In reality, this is secretly about the establishing a Global Regime of Interdependence on which the World Government would sit enthroned.

In fact, globalization is to be hoped for in a very specific way: the institution of a culture of brotherhood/unity, guardian of permanent Harmony and Balance in the relations between Communities, Nations and Races populating Terra. But what we have been witnessing for a much longer time than the Peoples imagine, is a farce that contributes to the establishment of a decisive phase of the agenda of the proponents of the Satanic World Government for the institution of a global monopoly on world economies while maintaining the current evil order of things, that is billions of slave laborers serving a numerically insignificant Elite concentrating in its hands all the wealth and technologies on this Terra.

The alternative to this ambush in which we have embarked for too long now exists and Terra-Urantian Peoples, awake and upstanding, must become linkmen of this new vision of the world more respectful of life and which puts at the center of all, THE HUMAN AND THE NATURE in which and by which He lives. The Terra-Urantians must organize themselves and demand that the following reforms on their respective continents be instituted and weigh on the international scale in the same direction:

1. Dismantling of large monopolistic structures that are enemies of the freedom of citizens and the sovereignty of States and denunciation and withdrawal from all unbalanced international agreements, conventions and treaties, such as ICC, IMF, WB, UN, etc., which have never been other than tools of predation, repression and blackmail for the use of a small club of internationalists.
2. Dismantling and abolishing of the Fractional Reserve Banking and International Financial System and replacing it with a more equitable and balanced one. A system that would put an end to and make impossible monetary, financial and stock market manipulations and speculations and which gives priority to the internal needs of the communities in a dynamics of Volitional Systemic Autarchy.
3. Setting in motion a dynamics towards the establishment of a Planetary Government structure operating on the principles of respect, equality and consultation among all Terra-Urantia Nations without exclusiveness, which will be the culmination of the enlightened new formula of the Planetary Union and Brotherhood.
4. Active and direct solidarity between all Nations of the world for a rapid and effective eradication of hunger, disease, drugs, ghettos on the surface of Terra-Urantia, which will finally restore a Human face to this Planetary Civilization.

EPILOG

The rise and fall of a civilization always revolve as follows:

From bondage comes spiritual faith, and from spiritual faith comes courage.

From courage comes Liberty, and from Liberty comes Abundance.

From Abundance comes Complacency, and from Complacency comes Apathy.

From Apathy comes Dependency.

In life we all choose to be born in a specific place and among a specific community for a mission agreed upon in advance, even if the veil caused by the process of incarnation (birth into a material body) exacerbated by the false teachings of this world, leads us to say otherwise. Our primary role, when we come here, is to recall of it to avoid the distractions and errors that have precisely become the lot of our Humanity. And this, so that we can fully assume the mission that is ours, that of the transformation of this pre-human civilization into a Human Civilization of Light wherein reign Peace, Harmony and Balance.

It is a well-established observation that there are psycho-cultural and spiritual obstacles that many will have to overcome to eventually reach this state of being, this position from where one decides to become spiritually and emotionally mature so as to become master of his reality. But it turns out to be a necessary route provided that we really wish to be able to mould, with no regrettable, grueling start-overs, the future of our Nations in a Stability, an authentic Freedom and a constantly renewed Harmony.

It seems to us that given the results produced by the various socio-political events in the world for decades, we have nothing to expect from the 'traditional' locked paths of conquest or popular re-conquest of political power. We will only go from disappointment to disappointment, rip-off to rip-off and eventually disappear from the surface of this Terra.

No society can truly claim to serve the Light and Life if the power of decision slips out of the hands of the Peoples who are its true holders, in spite of the illusion that the current global system maintain confusedly in our cloudy minds. There is a need for ongoing popular vigilance and accountability so that the Peoples can keep the upper hand on the affairs of their Nation; and for an effectiveness, it is necessary to redefine the Political and Civilizational Play on the basis of DIVINE TRUTH AND WISDOM.

It is clear that by considering a real reorganization of the mechanisms of exercise of the political power so that the citizens at the base really lead the boat and make sure that the representatives and governors feel under constant surveillance and easily revocable in case of mischief and betrayal, this would leave a permanent responsibility in the hands of the individual entity who will see it as an obligation and/or a duty to keep a close eye on the functioning of the Nation at different levels and thus truly assume its role as guardian of the Civilization.

The conscious and responsible involvement of everyone is the key and it must be highly sought and demanded. And once the stage of abundance is reached, we have the duty to ensure that the complacency that ends up leading to the apathy from which civilizations sink back into dependency, that is to say fall, be stripped from our minds.

The collective consciousness will no longer have time to fall asleep or to rely on a minority to dictate what it must do and believe. It is imperative that we extricate ourselves from old patterns too flawed and ineffective to surprise ourselves on field never explored before or long forgotten.

To Your Courage, Peoples of Terra-Urantia!
